US 110 Model # SD-A-E2-10
240 Model # SD-A-E2-24

Shelti Eye² Machines come with:
6 Darts, 250 Tips, Stability Kit, Allen Wrench, Throw Line, Standoff Tool, Warranty Registration, and Instructions.

Available Kit/Options:
• Dollar Bill Acceptor
• Four color, Bristle-Board Looking Target
• International Size Target

Height:
Full 86" Folded 45"

Foot Print:
24" x 24¼"

**Ship Weight:**
250 lbs.

Fold-in-Half Transportability
Hinged ¾" plywood cabinet design makes the game easy to set up, break down and transport.

Universal 110 Volt Light Fixture
Easy mantainance with optimal light distribution on the target.

"TRU-SCORE" for Absolute Scoring Accuracy

Tavern-Tested T60/30 Target
Since the late 1980's, the T60/30 target has provided more target area and less "spider" than any competitor.

Hinged target design enables easy access to the matrix and segments from the front of the game.

Interchangeable with 4-color and international size targets.
Piezo "Missed Target" Sensor

Expandable Controller Design
Forward-thinking design includes hardware support for current features and displays, as well as SD (Secure Digital) Flash Memory and MMC (Multi-Media Card) Flash Memory, RJ12/RS232, and a serial port for expansion and future capabilities.

Software upgrades and operator-specific pricing and feature settings are simply done through the portable SD or MMC Flash Memory devices. This class of device was also selected for future storage capabilities, if needed.

RJ12/RS232 enables future online features and the serial port provides a path for controller board expansion, if necessary.

Closed Cabinet Back With Door Access
Easy access to the key pad, player change, and LCD electronics through the locked door.

Diamond Plate

Standardized and Adjustable Handicap Systems
Compliant with leading dart associations, including the National Dart Association guidelines for spot points and spot marks handicapping. Operator programmable adjustment for minimum starting score and maximum awarded marks. Also includes standardized American Darters Association Neutralizer® system.

Highly-Visible Overhead Scoring
Forward facing and tipped at 8 degrees for easy-to-see viewing for both players and spectators, even in the busiest locations.

New dot matrix display area provides player instruction before and during game play, and improves communication of feats afterward. The new display also enables a path for future capabilities, including personalizing the game to the operator, location, and player.

Auto and Manual Player Change
Operator programmable, including delay timers for automatic and manual player change. New electronic player change button features no moving parts.

Phone-Style Keypad and LCD Menu Operation
Back lit LCD and 3-button menu enhance operator setup and statistics reporting. Phone-style keypad provides path to support future features that require player or operator alpha-numeric input.

Multiple Games and Game Options
Includes "old favorites" like "01" games, Cricket, and Hi Score games, and popular Wipe Out, You Pick It, and Cut Throat options. Also features fun, speed-based games like Rapid Fire.

Coin and Currency Door
Validator door provides room for a bill acceptor with either a 250-bill or 500-bill stacker. Door is standard with two coin mechanisms.

T-Molding On All Exposed Edges

Optional League Slot

Throw Line Notch

Programmable Operator Pricing and Round Limits

1-Year "Top to Bottom" Limited Warranty

Designed to hit the mark.

The tavern-tested Shelti Eye² combines the best features of past models with smart user-friendly updates in a structurally solid single piece base, with vinyl covered ¾" plywood cabinet. A familiar hinged cabinet design makes the game easy to set up, break down and transport. The back is fully enclosed with a locking door to provide protection and easy access to internal components.

Player enhancements include a new face-forward angled overhead scoring unit, universal 110v light and newly enlarged LCD display for optimal player viewing. The backlit programming keypad, expandable controller design and engineered space for the addition of an aftermarket dollar bill acceptor are just a few features that help put you ahead of the game.
