THE FUTURE OF RACING

At flashing speeds, experiencing up to 2G's and 100 movements per second, the Ballistics player feels every super-boost, collision, the jet-powered acceleration, even the vibration of the engine under the seat!

As a pilot in the Ballistics seat, the player drives a sleekly designed jet-propelled "Speeder Bike" through a magnetic tube. Players are given a full 360 degree range of movement as they spiral along the futuristic track while avoiding obstacles and maneuvering towards various power-ups.

THE NEXT GENERATION IN MOTION BASED ENTERTAINMENT

"At the location we first placed two **Ballistics with Motion**, the collections were number one!

We've been very happy with the numbers and the players love the motion platform.

It's a great piece indeed!"

THE NAME OF THE GAME IS SPEED...

This BRAND NEW 2003 version features our incredible Mad Wave Motion technology. Players can now feel the super-boosts, the collisions, the acceleration and the totally mad vibration of a SONIC BOOM!

Motion By

Pure and simple. As a pilot in the BALLISTICS races you unblinkingly propel your Speeder Bike through magnetic tubes that serve as the racetrack.

Players are given a full 360 degree range of movement as they spiral along the magnetic track, avoiding obstacles & other racers that could slow them down, while at the same time maneuvering towards various power-ups.

Power-ups include "Super Boosters" which allow players to accelerate at twice the normal capacity and "Ice" which super-cools the high-octane engine.

Specifications

Length: 84"

Width: 27"

Height: 72"

Features

- High Earner in all locations
- Now features "Mad Wave Motion"
- Deluxe piece: compact size
- Appropriate for any location
- 8 Linkable
- Coin operated
- Non-violent
- Exciting game play
