Enjoy a World of Innovations, that's the motto that Injoy Motion Corporation has been representing in its daily strive to make gamers from all over the globe smile. Its roots come from more than 20 years of research and development in the field of integrating motion simulation technology with 3D animation engines generating a virtual reality environment. This cutting edge technology may be applied to a variety of fields, from highly complex national defense systems to jaw-dropping space ship flying.

Enjoy a World of *innovations*

- Injoy Motion Corp.

With the global trend for group activities, Injoy Motion's range of simulators can satisfy all kinds of tastes by offering players an opportunity to experience drifting with designer cars, jumping waves with turbo speed boats, and even driving world war tanks.

The constant development and launch of new machines has also been one of the driving forces of this corporation. Always tuned to the latest demands from gamers, Injoy Motion keeps refreshing the fan's vision and enthusiasm with the latest launches.

Smart integration of edge technology and entertainment device

Injoy Motion Corp. is an affiliation of Internet Motion Navigation Corp. (IMON) which began with heavy capital infusion focused on research and development since 1989.

The supporting members of the company's core technology includes valuable professionals of electrical engineering, computer science, mechanical engineering, electrical controls, signal communications, art graphic displays, and industrial designs. The R&D team has devoted its focus in project applications for more than a decade, which supports and enhances the core competency of an independent, innovative, and technology-driven company.

Injoy Motion patented motion base platforms have been successfully applied to many industries. Electrical Series Motion Simulator is targeting for military training and high-end entertainment simulation purposes. Cruiser (6-axis simulator), our first innovative product made a great impact to the industry. Injoy Motion's 3D/VR technology realizes player's imagination and brings everybody true to life driving experience. Air Series Motion Simulator now rolls into the markets and it is mainly for amusement machine use.

Injoy Motion successfully produces simulator games with the least cost for the max values of stakeholders involved. The Air Series is featured with exciting motion base for favorable and affordable price.

Blue ocean strategy for the amusement industry

One of the solutions Injoy Motion has offered is to apply its innovative technologies to develop motion simulation video games; different from arcades, our machines can bring players true-to-life experience in going car racing, boat racing or even flying. This kind of simulation becomes a competitive edge the amusement industry can employ over the console games.

Injoy Motion has successfully integrated the motion base platform with vivid 3D animation game software and produced cost-effective simulators. Accompanied with exciting interactive game contents, Injoy Motion's simulators provide people of all ages the joy they have never experienced before. They also attract players to leave behind the console game and come out of their homes, which assures the amusement machine industry a new flow of profit!

All for Fun, Fun for All

Injoy Motion's collections cover present Panzer Elite Action, Power Boat, Dido Kart 1, Dido Kart 2, Street Racing Stars, Top Gunner, and Project X-Pher. These games integrate exciting video games and our patented simulation technology. Our driving and boating games' upward, downward, left and right movements will interact closely with player's every intention. In other words, Injoy Motion's interactive simulation games will bring players closer to real-time actions!

Moreover, Panzer Elite Action, supported by its individual motion system, has presented a unique feel for riders in a tank cockpit environment. Power Boat was designed to apply super deluxe motions - the game is equipped with a full 360-degree movement and is often used by operators as a crowd puller. In addition, with the popularity of Dido Kart 1, Dido Kart 2 is introduced with new story settings, card functions, and exciting 3D graphics. Last, Top Gunner and Project X-Pher have become the new market topics of shooting games. Injoy Motion's shooting game collections are all equipped with its company-designed machine guns, which provide real and highly-impacted force feedback effects!

Injoy Motion is increasing its game development talents in order to develop multiple new game projects and to update game and technical features based on customers' feedbacks.

Furthermore, Injoy Motion will launch new types of games such as redemption games, videmption games, and music video games. These new games will be integrated with 3D graphics, touch panels, and our company's core technology. Ultimately, we will keep bringing games that are – All for Fun, Fun for All!

Interesting Game Items

The animals' world is on challenge again. Injoy Motion Corp. launches a new version which depicts the cute, distinctive, and colorful animal characters in the world of Dido Kart racing.

Dido Kart 2 utilizes High-definition 3D graphics and innovative motion to improve the simulation effects. With vivid facial expression and special costume, the animal characters' personalities are sharper and more humanized. They would lead players to race in famous tourist sights and festival celebrations around the world. Player can collect and use interesting items to improve abilities or attack competitors. You can't imagine what is coming up the corner!

PANZER ELITE ACTION MDX

PROJECT X-PHER

In 2131, due to the impact of extreme climate change, humanity was forced to live underground. A century later, scientists created a new energy element "X-Pher" which gave humanity hope to return living on the surface. However, another intelligent life-form came and colonized Mother Earth. They took over X-Pher.

Players would join the elite team of United Nations to fight back the invaders. The elite team would embark on board of tanks, robots, and starship fighters. The extraordinary mission awaits you.

Players will experience combination of motion simulation driving with force-feedback shooting. The deluxe eye candy cabinet which accommodates 2 players will give the gamer an advantage of teaming up with a partner to blow the enemies away!

TOP GUNNER

Top Gunner is adapted from a legendary chapter of history; it will transport the player back to 1944. Days before the German troops were shifted around, a secret agent reported that the enemy troops were reluctant to surrender because they held a secret weapon. In order to verify the rumor, the Allies assigned a special unit to sneak into the heart of the enemy defenses. Things went smoothly at the beginning, but suddenly they fell into an ambush. A devastating battle starts; they doubt if they can break the siege and survive the mission.

The game is equipped with Injoy Motion signature machine guns. Our own designed guns have two force feedbacks which offer a unique feel and recoil on every shot. The true-to-life feelings will bring players into the story environment.
