Chapter 01 - Preface

Please read this page before preparing your Jetpack Joyride Arcade product for game play.

The following safety instructions apply to all game operators and service personnel. Specific warnings and cautions will be included throughout this manual.

Use the following safety guidelines to help protect the system from potential damage and to ensure your personal safety:

- Electronic components in the game cabinet run on 110V AC 60Hz (220V/ 50Hz in most of Europe, the Middle East and the Far East delivered units).

- To help prevent electric shock, plug the system into a properly grounded power source. These cables are equipped with 3-prong plugs to help ensure proper grounding. Do not use adapter plugs or remove the grounding prong from a cable. If you must use an extension cable, use a 3-wire cable with properly grounded plugs.

- To help protect your system from sudden increases and decreases in electrical power, use a surge suppressor, line conditioner or Uninterruptible Power Supply (UPS).

- Be sure nothing rests on the system's cables and that the cables are not located where they can be stepped on or tripped over.

- Keep your system far away from radiators and other heat sources.

- Do not block cooling vents.

Precaution for Game Operation

Adrenaline Amusements Inc. assumes no liability for injuries incurred while playing our games.

Operators should be aware that certain health and physical conditions may make people susceptible to injury when playing video games.

Safety

To avoid electrical shock, unplug the cabinet before performing installation or service procedures.

If a power cord is damaged, it must be replaced by the equivalent power cord available from your distributor.

Adrenaline Amusement Inc. assumes no liability for any damages or injuries incurred while setting up or servicing the cabinet. Only qualified service personnel should perform installation or service procedures.

Environmental Conditions

Cabinet is intended for indoor use only. Be sure to keep the cabinet dry and maintain operating temperatures of 59° - 86° (15° - 30°C).

Chapter 02 - Unit Features

Hardware Features

- Amazing Jetpack Vibration System
- 42'' Monitor
- Ticket redemption

220V AC	2 AMP

Chapter 03 - Unit Installation

Assembling your Jetpack Joyride Arcade Unit

1. Carefully remove the wood Cabinet and the Jetpack Seat section from the shipping container by giving you enough space.
2. Move the cabinet to the desired location.
3. Adjusts the 6 leg levelers.
4. Carefully slide the Jetpack Seat metal section inside the wood Cabinet, align the holes to the cabinet locking brackets.
5. Install and tight the 4 screws.

Sliding (Step 4)

Leg Levelers (Step 3)

(Back of the unit)

4 screws (Step 5)

Configuring your Jetpack Joyride network

Your network can be configured via Ethernet cable or Wireless 802.11b/g.

If you have an Ethernet cable available to be plugged in, insert it into the motherboard LAN RJ45 connector. If not, here's how to configure your wireless network with your own existing Wi-Fi network.

-Start the unit.

-There will be Adrenaline Amusements wallpaper with a 150 seconds delay before the attractmode shows up. It gives enough time for a wireless network to connect.
(*This delay will be present on each reboot if you don't connect your unit to the Internet*).

-Open the coin door and press the Operator button.

-Press once the left joystick so "Exit to Windows" is highlighted.

-Press the right joystick thumb switch to exit to Windows.

-Open the monitor rear panel and connect USB keyboard and mouse.

- Open Connect to a Network by clicking the network icon (📶 or 🖥) in the lower right corner of the screen.

-In the list of networks, click the network you want to connect to and click connect.

-Enter your security key.

-Once connected, double-click the JetpackJoyride shortcut on the desktop.

Having your unit connected to the Internet includes free software live update!

Chapter 04 - Operator Menu, Game Setup

This chapter describes how to use and navigate the Operator Menu to set up your product and adjust all of the game's parameters. To access the operator Menu, use the Operator Button located inside the coin door. To navigate the menu, the left handle trigger button moves up, the right handle thumb button is Select/Deselect, the right handle trigger button moves down.

OPERATOR MENU

Chapter 07 – Software Recovery

If your unit software needs to be restored please follow those instructions.

- Connect a USB keyboard to the motherboard.
- Power on the unit.
- Press F11 on your keyboard when the AsRock E350M1 splash screen is displayed to enter the boot menu.
- Choose USB: and press Enter.

The process takes 25-30minutes and the unit will reboot back in the game at the end. The Wireless credentials will need to be re-entered and Operator settings will be back at the default ones.
