

## BEFORE USING THE PRODUCT, be sure to read the followng:

## To maintain safety:

To ensure the safe operation of this product, be sure to read the following before usage. The following instructions are intended for the users, operators and the personnel in charge of the operation of the product. After carefully reading and sufficiently understanding the warning displays and cautions, handle the product appropriately. Be sure to keep this manual close to the product or in a convenient place for future reference.
Herein, explanations which require special attention are enclosed with dual lines. Depending on the potentially hazardous degrees, the terms of DANGER, WARNING, CAUTION, etc. are used. Be sure to understand the contents of the displays before reading the text.

Indicates that mishandling the product by disregarding this pictograph will cause severe injury or death.

Indicates that mishandling the product by disregarding this warning will cause a potentially hazardous situation which can result in death or serious injury.

Indicates that mishandling the product by disregarding this caution will cause a slight hazardous situation which can result in personal injury and/or material damage.

For the safe usage of the product, the following pictographs are used:

Indicates "HANDLE WITH CARE." In order to protect the human body and equipment, this display is attached to places where the instruction manual should be referred to.

Indicates a "protective earth terminal." Before operating the equipment, be sure to connect it to the ground.
(The step may be omitted for products in which a power cable with earth is used.)

## - Perform work in accordance with the instructions herein stated.

Instructions for work are explained by paying attention to the aspect of accident prevention. Failing to perform work as per the instructions can cause accidents. In the case where only those who have technical expertise should perform the work to avoid hazardous situation, the instructions herein state that the site maintenance personnel should perform such work.

- Be sure to turn off the power before working on the machine.

To prevent an electric shock, be sure to turn off the power and unplug the power cable before carrying out any work that requires direct contact with the interior of the product. If the work is to be performed in the power-on status, the instruction manual herein always states to that effect.

- Be sure to ground the earth terminal.
(This is not required in the case where a power cable with earth is used.)
This product is equipped with the earth terminal. When installing the product, connect the earth terminal to the "accurately grounded indoor earth terminal" by using an earth wire. Unless the product is grounded appropriately, the user can be subject to an electric shock. After performing repair, etc. for the control equipment, ensure that the earth wire is firmly connected to the control equipment.
- Ensure that the power supply used is equipped with an earth leakage breaker. Using a power supply which is not equipped with the earth leakage breaker can cause a fire when earth leakage occurs.
- Be sure to use fuses which meet the specified rating. (Only for the machines which use fuses.)
Using fuses exceeding the specified rating can cause a fire and an electric shock.
- Specification changes (removal of equipment, conversion and addition) not designated by SEGA are not allowed.
The parts of the product include warning labels for safety, covers for personal protection, etc. It is very hazardous to operate the product by removing parts and/or modifying the circuits. Should doors, lids and protective parts be damaged or lost, refrain from operating the product, and contact where the product was purchased from or the office herein stated.
SEGA shall not be held responsible for any accidents, compensation for damage to a third party, resulting from the specifications not designated by SEGA.
- Ensure that the product meets the requirements of appropriate electrical specifications.
Before installing the product, check for electrical specifications. SEGA products have a nameplate on which electrical specifications are described. Ensure that the product is compatible with the power supply voltage and frequency requirements of the location. Using any electrical specifications different from the designated specifications can cause a fire and an electric shock.
- Install and operate the product in places where appropriate lighting is available, allowing warning labels to be clearly read.
To ensure safety for the customers, labels and printed instructions describing potentially hazardous situations are applied to places where accidents can be caused. Ensure that where the product is operated has sufficient lighting allowing the warnings to be read. If any label is peeled off, apply it again immediately. Please place an order with where the product was purchased from or the office herein stated.
- When handling the monitor, be very careful. (Applies only to products with monitors.)
Some of the monitor parts are subject to high tension voltage. Even after turning off the power, some portions are still subject to high tension voltage sometimes. Monitor repair and replacement should be performed only by those technical personnel who have knowledge of electricity and technical expertise.
- Be sure to adjust the monitor properly. (Applies only to products with monitors.)
Do not operate the product leaving on-screen flickering or blurring as it is. Using the product with the monitor not properly adjusted may cause dizziness or a headache to an operator, a player, or the customers.
- When transporting or reselling this product, be sure to attach this manual to the product.
* In the case where commercially available monitors and printers are used in this product, only the contents relating to this product are explained herein. Some commercially available equipment has functions and reactions not stated in this manual. Read this manual together with the specific instruction manual of such equipment.
* Descriptions herein contained may be subject to improvement changes without notice.
* The contents described herein are fully prepared with due care. However, should any question arise or errors be found, please contact SEGA.

## INSPECTIONS IMMEDIATELY AFTER TRANSPORTING THE PRODUCT TO THE LOCATION

Normally, at the time of shipment, SEGA products are in a status allowing for usage immediately after transporting to the location. Nevertheless, an irregular situation may occur during transportation. Before turning on the power, check the following points to ensure that the product has been transported in a satisfactory status.
$\square$ Are there any dented portions or defects (cuts, etc.) on the external surfaces of the cabinet?
$\square$ Are casters and adjusters damaged?
$\square$ Do the power supply voltage and frequency requirements meet with those of the location?
$\square$ Are all wiring connectors correctly and securely connected? Unless connected in the correct way, connector connections can not be made accurately. Do not insert connectors forcibly.Do power cables have cuts and dents?Are all accessories available?Can all doors and lids be opened with the accessory keys? Can doors and lids be firmly closed?

## INTRODUCTION

This manual is intended to provide detailed descriptions together with all necessary information covering the general operation of electronic assemblies, electro-mechanicals, servicing control, spare parts, etc. for the product,
"SHOWDOWN STANDARD"

This manual is intended for the owners, personnel managers in charge of operation of this product. Operate the product after carefully reading and sufficiently understanding the instructions.

In the unlikely event that the product does not function correctly, DO NOT allow anyone other than a technician to touch the internal system. Turn off the power to the machine, making sure to unplug the electrical cord from the outlet, and contact the office listed below or the point-of-purchase for this product.

Use of this product is unlikely to cause physical injuries or damage to property. However, points that require special attention are indicated by bold text, the word "IMPORTANT" and the symbol below.

## stop IMPORTANT

## Indicates important information that, if ignored, may result in the mishandling of the product and cause faulty operation or damage to the product.

## Definition of 'Site Maintenence Personnel or Other Qualified Individuals

> stor IMPORTANT
> Procedures not described in this manual or marked as 'to be carried out by site maintenance personnel or other qualified professionals' should not be carried out by personnel without the necessary skill or technology. Work carried out by unqualified persons may cause serious accidents, including electrocution.

Parts replacement, maintenance inspections and troubleshooting should be carried out by site maintenance personnel or other qualified professionals. This manual includes directions for potentially dangerous procedures which should only be carried out by professionals with the appropriate specialised knowledge.

The site maintenance personnel or other qualified professionals mentioned in this manual are defined as follows:

Site maintenance personnel:
Individuals with experience in maintaining amusement equipment, vending machines, etc., working under the supervision of the owner/operator of this product to maintain machines within amusement facilities or similar premises by carrying out everyday procedures such as assembly, maintenance inspections, and replacement of units/ expendable parts.

Activities to be carried out by site maintenance personnel:
Amusement equipment/vending machine assembly, maintenance inspection and replacement of units/expendable parts.

Other qualified professionals:
Persons employed by amusement equipment manufacturers, or involved in design, production, testing or maintenance of amusement equipment. The individual should have either graduated from technical school or hold similar qualifications in electrical/electronics/mechanical engineering.

Activities to be carried out by other qualified professionals:
Amusement equipment/vending machine assembly, repair/adjustment of electrical/electronic/mechanical parts.

## Waste of Electrical and Electronic Equipment (WEEE) Statement.

The WEEE (Waste of Electrical and Electronic Equipment) directive places an obligation on all EU based manufacturers and importers of Electrical and Electronic Equipment to take back products at the end of their useful life. Sega Amusements Europe Ltd accepts its responsibility to finance the cost of treatment and recovery of redundant WEEE in the United Kingdom in accordance with the specified WEEE recycling requirements.

The symbol shown below will be on all products manufactured from 13th August 2005, which indicates this product must NOT be disposed of with other normal waste. Instead, it is the user's responsibility to dispose of their waste equipment by arranging to return it to a designated UK collection point for the correct recycling of waste electrical and electronic equipment.

For more information about where you can send your waste equipment for recycling contact your local authority office.

For non-UK users contact your local authority office for information on the recycling of Waste Electrical and Electronic Equipment.

## Battery Recycling Statement.

The EC Directive on Batteries and Accumulators (2006/66/EC) aims to minimise the impact of batteries on the environment and encourage the recovery of the materials they contain. To achieve increased collection and recycling of waste batteries, the Directive places 'producer responsibility' obligations on manufacturers and importers of portable, industrial and automotive batteries.

The symbol shown below will be on all equipment fitted with batteries from 26th September 2008 and indicates they must NOT be disposed of with other normal waste. Instead, it is the user's responsibility to dispose of used batteries by arranging to return them to a designated collection point for the correct recycling.

For more information about where you can send your waste batteries for recycling contact your local authority office.

## 1 HANDLING PRECAUTIONS

When installing or inspecting the machine, be very careful of the following points and pay attention to ensure that the player can enjoy the game safely.
Non-compliance with the following points or inappropriate handling running counter to the cautionary matters herein stated can cause personal injury or damage to the machine.

## A WARNING

Before performing work, be sure to turn the power off. Performing the work without turning the power off can cause an electric shock or short circuit. In cases where work should be performed in the status of power on, this manual always states to that effect.

To avoid an electric shock or short circuit, do not plug in or unplug quickly.
To avoid an electric shock, do not plug in or unplug with a wet hand.
Do not expose power cords or earth wires on the surface, (floor, passage, etc.) If exposed, the power cords and earth wires are susceptible to damage. Damaged cords and wires can cause an electric shock or short circuit.
To avoid causing a fire or an electric shock, do not put things on or damage the power cords.
When or after installing the product, do not unnecessarily pull the power cord. If damaged, the power cord can cause a fire or an electric shock.
In case the power cord is damaged, ask for a replacement through where the product was purchased from or the office herein stated. Using the cord as is damaged can cause fire, an electric shock or leakage.

Be sure to perform grounding appropriately. Inappropriate grounding can cause an electric shock.

Be sure to use fuses meeting the specified rating. Using fuses exceeding the specified rating can cause a fire or an electric shock.

Be sure that connections such as IC BD are made properly. Insufficient insertion can cause an electric shock.

Specification changes, removal of equipment, conversion and/or addition, not designated by SEGA are not permitted.
Failure to observe this may cause a fire or an electric shock. Non-compliance with this instruction can have a bad influence upon physical conditions of the players or the onlookers, or result in injury during play.
SEGA shall not be held responsible for damage, compensation for damage to a third party, caused by specification changes not designated by SEGA.
Do not perform any work or change parts not listed in this manual. Doing so may lead to an accident.
If you need to perform any work not listed in this manual, request work from the office indicated in this manual or the point of purchase, or inquires for details.

Be sure to perform periodic maintenance inspections herein stated.

#### Abstract

For the IC board circuit inspections, only the use of a logic tester is recommended. Using a Multi Tester or General Purpose Tester may result in damage to IC Circuits. Static electricity from your body may damage some electronics devices on the IC board. Before handling the IC board, touch a grounded metallic surface so that the static electricity can be discharged. This video gaming cabinet utilises a motorised steering feedback system. Do not attempt to service this part or any other part in close proximity to the steering mechanism whilst power is applied.

Some parts are not designed and manufactured specifically for this game machine. The manufacturers may discontinue, or change the specifications of such general-purpose parts. If this is the case, SEGA cannot repair or replace a failed game machine whether or not a warranty period has expired.

## CONCERNING THE STICKER DISPLAY

This SEGA product has stickers attached describing the product manufacture No. (Serial No.) and Electrical Specifications. It also has a Sticker describing where to contact for repair and for purchasing parts. When inquiring about or asking for repairs, mention the Serial No. and Name of Machine indicated on the Sticker. The Serial Number indicates the product register. Identical machines could have different parts depending on the date of production. Also, improvements and modifications might have been made after the publication of this manual. In order to ensure you order the correct parts, mention the Serial No. when contacting the applicable places.

## CONCERNING WARNING DISPLAYS

This SEGA product has warning displays on stickers, labels and/or printed instructions adhered/attached to or incorporated in the places where a potentially hazardous situation could arise. The warning displays are intended for accident prevention for customers and for avoiding hazardous situations relating to maintenance and servicing work. Some portions of the cabinet contain high voltage and may cause accidents if touched. When performing maintenance, be very careful of the warning displays. It is especially important that any complex repair and replacement work not mentioned herein should be performed by those technical personnel who have knowledge of electricity and technical expertise.
In order to prevent accidents, caution any customer ignoring the warnings to cease and desist immediately.

## 2 PRECAUTIONS REGARDING INSTALLATION

## A WARNING

This product is an indoor game machine. Do not install it outside. Even indoors, avoid installing in places mentioned below so as not to cause a fire, electric shock, injury and/or malfunction.
Places subject to rain or water leakage, or places subject to high humidity in the proximity of an indoor swimming pool and/or shower, etc.
Places subject to direct sunlight, or places subject to high temperatures in the proximity of heating units, etc.
Places filled with inflammable gas or vicinity of highly inflammable/volatile chemicals or hazardous matter.

Dusty places.
Sloped surfaces.
Places subject to any type of violent impact.
Vicinity of anti-disaster facilities such as fire exits and fire extinguishers.
Areas where the temperature exceeds the applicable temperature (ambient temperature) range of 5 to 30 degrees centigrade.

## LIMITATIONS OF USAGE

Be sure to check the Electrical Specifications. Ensure that this product is compatible with the location's power supply, voltage, and frequency requirements. A plate describing Electrical Specifications is attached to the product. Non-compliance with the Electrical Specifications can cause a fire and electric shock.

This product requires a breaker and earth mechanism as part of the location facilities. Using the product without these can cause a fire and electric shock.

Ensure that the indoor wiring for the power supply is rated at 15 A or higher (AC single phase $100 \mathrm{~V} \sim 120 \mathrm{~V}$ area), and 7 A or higher (AC $220 \mathrm{~V} \sim 240 \mathrm{~V}$ area). Noncompliance with the Electrical Specifications can cause a fire and electric shock.
Be sure to use an independent power supply equipped with an earth leakage breaker. Using a power supply without an earth leakage breaker can cause an outbreak of fire if a power surge occurs.
Putting many loads on one electrical outlet can cause generation of heat and a fire resulting from overload.
When using an extension cord, ensure that the cord is rated at 15 A or higher (AC $100 \mathrm{~V} \sim 120 \mathrm{~V}$ area) and 7 A or higher (AC $220 \mathrm{~V} \sim 240 \mathrm{~V}$ area). Using a cord rated lower than the specified rating can cause a fire and electric shock.

## STOP IMPORTANT

Securing a safe area for operation as described in this manual will ensure safe operation for players and observers.
SEGA shall not be held responsible for damage or compensation for damage to a third party, resulting from the failure to observe this instruction.

## OPERATION AREA (US CABINET)

## A WARNING

For the operation of this machine, secure a minimum area of $1.86 \mathrm{~m}(\mathrm{~W}) \times 2.73 \mathrm{~m}(\mathrm{D})$.
Be sure to provide sufficient space specified in this manual. Do not allow objects to block the ventilation ports. It can cause generation of heat and a fire.
Sufficient space either side of the playing area must be allowed for the player to enter or exit the game safely.

## stop IMPORTANT

To install this product, the entrance must be at least 1.25 m in width and 2.1 m in height (without Assy Billboard) and 2.17 m (with Assy Billboard).

Do not attempt to push/pull whilst holding onto the Assy Billboard. This may result in part damage and or personal injury.

## 3 PRECAUTIONS REGARDING OPERATION

To avoid injury and trouble, be sure to pay attention to the behavior of visitors and players.

## A WARNING

In order to avoid accidents, check the following before starting the operation:

- To ensure maximum safety for the players and the customers, ensure that where the product is operated has sufficient lighting to allow any warnings to be read. Operation under insufficient lighting can cause bodily contact with each other, hitting accident, and/or trouble between customers.
- Be sure to perform appropriate adjustment of the display (LCD, Plasma, CRT or Projector). For operation of this machine, do not leave monitor's flickering or deviation as is. Failure to observe this can have a bad influence upon the players' or the customers' physical conditions.
- It is suggested to ensure a space allowing the players who feel sick while playing the game to take a rest.
- Check if all of the adjusters are in contact with the surface. If they are not, the Cabinet can move and cause an accident.

Each leg adjuster MUST be lowered so that the casters are raised approximately 5 mm off the floor.

- Do not put any heavy item on this product. Items, if placed on this product may fall and cause injury to the player / observer.
- Do not climb on the product. Climbing on the product can cause falling down accidents. To check the top portion of the product, use a step ladder.

## A WARNING

－To avoid electric shock，ensure that all covers and panels are undamaged and fitted．Do not operate with covers removed．
－To avoid electric shock，short circuit and／or parts damage，do not put the following items on or in the periphery of the product．
－Flower vases，flowerpots，cups，water tanks，cosmetics，and receptacles／ containers／vessels containing chemicals and water．

## A CAUTION

－To avoid injury，be sure to provide sufficient space by considering the potentially crowded situation at the installation location．Insufficient installation space can cause making bodily contact with each other，hitting accidents， and／or trouble between customers．
－Everyday when cleaning the Controller，inspect the controller and make sure that there are no cracks in the surface，and that the fastening screws are not loose．If the game is played with cracks or loose screws，it can cause injuries to the player．
－Do not allow more than one person in any seat at any time．Do not allow adults to play the game with a child sitting in their lap．

## A WARNING

It is recommended that wet towels（paper towels）be provided．

## DURING OPERATION (PAYING ATTENTION TO CUSTOMERS)

To avoid injury and trouble, be sure to constantly give careful attention to the behavior and manner of the visitors and players.

## A WARNING

- For safety reasons, do not allow any of the following people to play the game.
- Those who have high blood pressure or a heart problem.
- Those who have experienced muscle convulsion or loss of consciousness when playing video games, etc.
- Those who have neck or spinal cord problems.
- Those who are intoxicated or under the influence of drugs.
- Pregnant women.
- Those who are not in good health.
- Those who do not follow the attendant's instructions.
- Those who cannot grasp the Control Unit securely because of immobility in fingers, hands or arms.
- Persons who disregard the product's warning displays.

This product is intended for a single player only. Having two or more persons simultaneously playing this product can result to injury to the player and possible damage to the product.

Even players who have never been adversely affected by light stimulus might experience dizziness or headache depending on their physical condition when playing the game.

Small children are especially likely to experience these symptoms. Caution guardians of small children to keep watch on their children during play.
Instruct those who feel sick during play to have a medical examination.
To avoid injury from falls and electric shocks due to spilled drinks, instruct the player not to place heavy items or drinks on the product.

To avoid electric shocks and short circuits, do not allow customers to put hands and fingers or extraneous matter in the openings of the product or small openings in or around the doors.

To avoid falls and resulting injury, immediately stop the customer from leaning against or climbing on the product, etc.

To avoid electric shock and short circuit, do not allow customers to unplug the power plug without a justifiable reason.

Instruct the guardians of small children to keep an eye on their children.
Children cannot sense danger. Allowing small children to get near a player who is playing the game could result in the children being bumped, struck or knocked down.

4 PART DESCRIPTIONS

Illustrations purposes only..

## 5 ACCESSORIES

Confirm that the accessories listed in the table below are present when setting up the product． Accessories marked＂Spare＂in the note column are consumable items but included as spares．

```
DESCRIPTION：OWNER＇S MANUAL
Part No．（Qty．）：420－0023－02UK（1）
```

Parts not labeled with part numbers are as yet unregistered or cannot be registered．Be sure to handle all parts with care，as some parts are not available for purchase separately．

KEY MASTER
220－5575－01UK（2）
For operating／closing the doors

KEY
（2）
For the cashbox door
（Tethered to the steering wheel at time of shipment）

POWER CORD

LM1226（1）＜EU $>$
LM1500（1）＜US＞
For installation．See chapter 6.

LAN Cable 200 cm 600－7279－0200UK（1）

BILLBOARD PLATE
DSD－1507UK \＆DSD－1508UK（STD x1）
For installation．See chapter 6.

## 6 ASSEMBLY AND INSTALLATION

- Perform assembly as per this manual. Since this is a complex machine, incorrect assembling can cause an electric shock, machine damage and/or improper functioning as per specified performance.
- When assembling, more than one person is required. Depending on the assembly work, there are some cases in which working by one person alone can cause personal injury or parts damage.
- Ensure that connectors are properly connected. Improper connections can cause electric shock.
- Be careful not to damage the wires. Damaged wires may cause electric shock or short circuit or present a risk of fire.
- Do not unnecessarily push the display screen.
- This work should be carried out by site maintenance personnel or other qualified professionals. Work performed by non-technical personnel can cause a severe accident such as electric shock. Failing to comply with this instruction can cause a severe accident such as electric shock to the player during operation. If no one with proper technological expertise is available, request service from the office indicated in this document or the point of purchase so as to ensure safety.
- Provide sufficient space so that assembling can be performed. Performing work in places with narrow space or low ceiling may cause an accident and assembly work to be difficult.
- To perform work safely and avoid serious accident such as the cabinet falling down, do not perform work in places where step-like grade differences, a ditch, or slope exist.
- This product does not use any connectors other than those connected to and used by the game board when it leaves the factory. Do not needlessly connect wires to unused connectors. This could lead to overheating, generation of smoke and burn related injuries.

## A CAUTION

- Handle molded parts with care. Excessive weight or pressure may cause them to break and the broken pieces may cause injury.
- To perform the operation safely and accurately you must use a safe, steady footstool or stepladder. Working without this may lead to a fall and possible injury.

## 6-1 INSTALLING THE CABINET

## A CAUTION

- Billboard weighs approximately 10 kg . Have at least 2 people during this operation. Working alone could result in personal injuries, etc.
- To perform work safely and securely, be sure to prepare a step which is in a safe and stable condition. Performing work without using a step may lead to injury of damage to components.

Tools required for installation

Allen Key (M5)

- Attaching Billboard Panel to Assy Billboard.
(Not Supplied)

Hex Driver or Wrench (M6, M8)

- Attaching Assy Billboard / Coin Tower to cabinet.

Step or Ladders

- Aid in fixing Billboard and Billboard Panel.

KEY

- Gain access to Coin Tower

## 6-1-1 INSTALLING THE ASSY BILLBOARD

Remove the (6) sets of fixings from the front face of the Billboard apature and the (5) sets of fixings from the underside. Once all (11) fixings have been removed, using 2 people, carefully offer the Billboard into postion.

Once in position, carefuly secure the Billboard into place using the fixings removed from step 1. Losely fit the lower (5) fixing initially, followed by the upper (6) fixings.. Only once all fixings are in place should you then tighten them. Do not overtighten the upper (6) fixings. If these fixings are over tightened damage may occur to the billboard.

## 6-1-2 INSTALLING THE STABILIZERS

## A WARNING

It is IMPORTANT that both STABILIZERS are fitted. Failure to fit the STABILIZERS may result in the machine toppling over which may causing exreem injury and damage to the cabinet.

Place one of the two STABILIZER plates near the fixing location. Remove the M8x30 Bolts (2) from the lower section of the cabinet as shown in Fig 6.2.1a.

Fig. 6.2.1a

Fig. 6.2.1b

Remove the Strengthening strap and discard. Offer the Stabilizer brkt up to the cabinet and secure using the fixings removed from step 1.

Fit and secur the STABILIZER to the cabinet
using the $M 8 \times 30$ fixings removed from step 1
Fig. 6.2.1d

Repeat the step 1 and 2 to fit the STABILIZER BKT to the right hand side of the cabinet..

Fig. 6.2.1e

## 6-2 FIXATION TO INSTALLATION SITE

## A WARNING

- Make sure that all the adjusters contact the floor. Otherwise the cabinet could move, causing an accident.
- Provide a ventilation space at least 20 cm wide behind the cabinet. There are ventilation holes on the back of the cabinet. Do not block the ventilation holes. Doing so could trap heat inside resulting in fire. It could also result in equipment damage or cause parts to become exhausted prematurely.

The product is equipped with 4 casters and 4 adjusters.

When installation position / site has been determined, have the adjusters come in direct contact with the floor. Establish a gap of about 5 mm between the floor and the casters and adjust the unit so that it will remain level.

1 Move the product to the installation site.

2 Bring the adjusters into direct contact with the floor. Use a wrench to align the height of the adjusters until the cabinet is perfectly level.

3 After setting, turn adjuster nuts upwards to tighten them and secure adjuster heights.

## A WARNING

- Provide a ventilation space at least 20 cm wide behind the cabinet. There are ventilation holes on the back of the cabinet. Do not block the ventilation holes. Doing so could trap heat inside resulting in fire. It could also result in equipment damage or cause parts to become exhausted prematurely.

## A WARNING

- Use the power supply equipped with an earth leakage breaker. Use of power supply without such a breaker could result in fire if there is a current leakage.
- Have available a securely grounded indoor ground terminal. Without proper grounding, customers could be electrocuted and product operations might not always be stable.
- Do not expose the power cord or ground wire. If these are exposed, customers could stumble over them, for instance, and easily damage them. Additionally, if these lines are damaged, there could be a risk of electrical shock or short circuit. Set these lines at locations where they will not interfere with customer traffic, or attach covers to them.
- After laying out the power cord on the floor, be sure to always protect it. If the power cord is left exposed, it can easily be damaged, resulting in electrical shock.

1. Confirm that the main switch is at OFF.

Mains Switch shown in OFF position

Fully insert the power cord connector on the side opposite the power plug into the AC unit IEC inlet. Insert the power cord plug into the outlet.

When the power cord is laid out indoors. Protect the power cord by attaching a wire cover to it.
If the power cord is left uncovered it may cause a trip hazard and could result in injury. Please cover the power cord as illustrated below.

## 6-4 TURN ON POWER

Set the main switch of the AC unit to ON and engage the power.
When you turn on the power, the billboard fluorescent lights will come on.
After the SEGA LOGO start up screen is displayed on the LCD screen, the Advertise (Attract) Mode will start.

The decorative LEDs on the Base Box, Seat and Control Panel flash on/off.
Start up sounds are output from the speakers on the left and right of the cabinet together with display of the SEGA startup screen.

Even when the power source has been cut off, credit count, ranking data, game settings and bookkeeping data are kept stored in the product. However, fractional coin counts (inserted coins that do not amount to one credit) and bonus adder counts are not kept.

## 6-5 COMFIRMATION OF ASSEMBLY

In the test mode, ascertain that the assembly has been made correctly and IC Board is satisfactory. In the test mode, perform the following test: (refer to chapter 9).

## 9-2-3 INPUT TEST

This menu is used to test the system inputs such as steering, pedals and buttons. To implement the test, press each device that is listed and check the results on screen.

## 9-2-4 OUTPUT TEST

This menu is used to test the system oututs such as Lamps and LED.

## 9-2-5 COIN SETTINGS

As this system utilises a Credit Board PCB, it is important that the setting remain 1 COIN 1 PLAY. Deveation from this setting when using the Credit Board PCB can result in unusual credit outputs.

## 9-2-8 NETWORK TEST

Apply and configure the network of each cabinet (only appiles if 2 or more cabinets are linked).

## 9-2-9 CALIBRATION TEST

This test is required to calibrated both steering mechanism and control pedals. This procedure is always carried out at the factory before dispatch. However, certain conditions can have an effect on calibration and it is recommended that re-calibration be carried out at point of installtion.

## A CAUTION

- The operator MUST apply the Epileptiform Seizure Label to this product. Failing to apply this label may result in the player/observer suffering from a photosensitive seizure. Warning the potential player/ observer of this before the start of a game may prevent such accidents.
- It is also important to apply the correct language label for each location. There are nine (9) different language labels - please apply the label which matches your location.

## STOP IMPORTANT

Application of any warning labels must be placed in a location which is easy for the player/observer to read. Please follow the instructions below and apply the label in the location stated.

The Epileptiform Seizure label is supplied in 9 different languages. Please choose the label which matches your language location.

Apply the label to the top left hand corner of the Control Panel. This location is unobstructed and can be easily read by players and observers alike.

7 PRECAUTIONS WHEN MOVING THE MACHINE

## A WARNING

- Always disconnect the power cable before moving the product. If it is moved with the power cable connected, the cable could be damaged, causing fire or electric shock.
- To move the unit over the floor, pull in the adjustors and have the casters contact the floor. While moving the unit, be careful that the casters do not roll over the power cord or the ground wire. If cord or wire is damaged, there could be electrical shocks and/or short circuits.
- When crossing a sloped or stepped area, always have the machine travel lengthways. Travelling with the machine in a sideways position could result in the machine falling over onto its side. Always use a minimum of two people working together plus lifting apparatus to accommodate slopped areas or stairs.
- To lift up the cabinet, hold it at the bottom at the designated lifting points. If you hold it anywhere else, the weight of the cabinet could cause damage to parts or attachments, resulting in injury.
- Do not push the cabinet from the side when moving. Pushing from the side as it may result in the cabinet falling over.

## stop IMPORTANT

- When moving the cabinet, do not grip or push the Billboard Plate. Doing so could deform or damage the part.
- If moving through a door or place with a low ceiling such as an elevator, you should take apart the billboard and billboard plate.

## 7-1 PRECAUTIONS WHEN MOVING

## stop IMPORTANT

- When moving the cabinet, do not grip or push the Billboard Plate. Doing so could deform or damage the part.
- If moving through a door or place with a low ceiling such as an elevator, you should take apart the billboard and billboard plate.

To manouver the machine in and out of buildings it may be nessecary to remove the Billboard Plate.
Please refer to Section 6 in this manual for instructions on removal.
If moving the cabinet within the same location the Billboard can remain intact and the Stabilizing Brackets can be left in place but loosened and secured at a higher level to allow the cabinet to move.

Ensure that the casters come into contact with the floor before moving.

## stor IMPORTANT

－When moving the cabinet，do not push from the side．Pushing from the side may result in the machine falling over．
－When moving the cabinet always push or pull from the rear．

## 8 GAME DESCRIPTION

Showdown is the latest ground－breaking racing game from legendary arcade machine manufacturer Sega in collaboration with racing software specialists Codemasters，the team behind 2010＇s hugely successful GRID arcade racing game．
Showdown delivers thrills and full contact racing in every event，each an electrifying festival of energy，speed and destruction that demands repeat play．

Players will fully commit on every corner and overtake as they take on spectacular circuits set across the world．Showdown＇s tracks are littered with obstacles，pinch points，multiple－routes and ramps to deliver action－ packed，white－knuckle action in each and every race．Players become fully immersed in the action with the game＇s stunning graphics．An all－ new handling system makes the game both accessible and rewarding for the player as they dive into a new world of motorised mayhem bursting with speed，style and destruction．

Showdown features an exciting＇unlock＇mechanic that is awarded to the player after every game．The reward is dependent on the event raced and the result，which means that even if the player doesn＇t finish in 1st place they still receive a bonus code for finishing．

When the game is in credit the player has the option to enter a code using the keypad，located to the right of the steering wheel，or to press the start button．

Entering a valid code will unlock content that the player can select in various pre－race menus．
The code entry section in the bottom right corner of the screen will change to show the code has been accepted．

Any content that has been unlocked will appear first in
the menu selection screens，so that it can be easily found．It will also display the＇Bonus Item＇text and logo in the top right hand corner．

Any content previously unlocked or ordinarily available will precede the bonus items．

An incorrect code can be entered a maximum of 3 times, at this point the player will need to press the start button to start their game. A code can be entered again after the game is over.

After finishing an event, the player's bonus code will be displayed on screen and remain there for 10 seconds. If the player inserts another credit within this time, or already has a credit available, the game will automatically apply this bonus code to the game. After 10 seconds the code will disappear from the screen, any
 credits inserted after this will require a bonus code to be entered or to play the game without a code.

Showdown's unique composite 'unlock' system allows players to keep the bonus items they have collected and then use them at any location encouraging repeat play. When a player uses a code and then unlocks a new feature they are given a new code with the new item added to their previous collection.

Bonus codes are awarded by the game, via Segascores.com and also distributed via Sega Amusements' social media.

## 8-2 GAME SELECTION

## WHEN THE MACHINE IS IN CREDIT AND THE START BUTTON IS PRESSED, THE FOLLOWING SCREEN IS DISPLAYED, INDICATING THE GAME PLAY AVAILABLE.

When a cabinet is not linked up to any other cabinets, once the player presses the Start button, they will be taken straight to a Single Player game where they are given the option between CHALLENGE and TOUR.

The first action for the player is to select whether to enter into a Multiplayer or Single Player game. Turning the Steering Wheel left and right will highlight the option and pressing the Accelerator pedal, or the start button, will confirm the player's selection.

During this selection process, a countdown is displayed in the top left hand corner of the screen. If the player does not make a selection within this time, the highlighted option will be selected.

If the player has entered into a Single Player game, they will have the choice of two game modes - Challenge or Tour.
Again, turning the steering Wheel left and right will highlight the option and pressing the Accelerator pedal, or the start button, will confirm the player's choice.

During this selection process, a countdown is displayed in the top left hand corner of the screen. If the player does not make a selection within this time, the highlighted option will be selected.

Name Entry
Before the player can pick an event to play, they must first enter a 3 letter name to represent them in their chosen event.

If the player fails to enter their initials in the allotted
 time, or enters a forbidden combination they will be assigned 'PLA'.
*PLEASE NOTE* The 3 letters are used to authentic a players high score on the Sega Scores leader boards when used with the QR Code provided on the race results screen.
Please visit www.segascores.com for more details.

Turning the Steering Wheel left and right will highlight the option and pressing the Accelerator pedal, or the start button, will confirm the player's choice.

During this selection process, a countdown is displayed in the top left hand corner of the screen.

## 8-3 CHALLENGE

Challenge mode can be played in either Single Player or Multiplayer format. This mode features four types of events each with different rules and requirements in order for the player to achieve 1st place. All events have eight racers. Any cars not controlled by human players will be AI controlled.

Turning the Steering Wheel left and right will highlight the option and pressing the Accelerator pedal, or the start button will, confirm the player's choice.

During this selection process, a countdown is displayed in the top left hand corner of the screen. If the player does not make a selection within this time, the highlighted option will be selected.

## DEMLITION

A closed arena map where the aim is to take out opponents by smashing, bashing and shunting them to oblivion. Points are awarded for hitting opponents. The harder you hit them, the more points you earn. Maximum points are awarded for depleting the health of an opponent. The player with the most points at the end of timer wins.

## KNOCKOUT

Push pedal to metal and drive it like you stole it as you knock out opponents from the top of the platform, and try to stay on top yourself. Use boost to deliver crunching T-Bone crashes or dash out the way of incoming hits. Points are awarded for knocking opponents off the podium as well as causing damage. Maximum points are awarded for knocking opponents off the podium. The player with the most points at the end of timer wins.

## RACE-OFF

A no holds barred, wild racing event where it's a fight to the finish line by any means necessary. Show your opponents who is the true king of the road by smashing them off it as you sprint for the chequered flag. The first player to complete all laps wins.

## CROSSROARDS

Race on a classic figure of eight circuit where it's full-on carnage at the track's intersection points. The first player to complete all laps wins.

## TOUR

Tour is a single player only mode against 7 AI opponents over 3 of the Challenge events.

Turning the Steering Wheel left and right will highlight the option and pressing the Accelerator pedal, or the start button, will confirm the player's choice.

During this selection process, a countdown is displayed in the top left hand corner of the screen. If the player does not make a selection within this time, the highlighted option will be selected.

To unlock the next event the player must place in the top 3 positions. After each event the player is awarded points, the points across all 3 events are combined. The player with the highest score will be crowned the victor!

If a player fails to complete an event they will have the option of inserting a credit and continuing from the start of the same event.

## 8-4 MULITIPLAYER

If the player selects Multiplayer they will be taken to a waiting lobby. This gives the chance for other players to join in. A maximum 4 human players in total can race in any event, the rest are AI controlled.

Any cabinets connected in the same network will be shown a challenge available screen.
After inserting a credit, the challenging players are able to enter their bonus code, or just press the start button to join.

If other players join the multiplayer game, when the timer runs out, all players will then have the chance to enter their name.

Please see NAME ENTRY above for more information.
If other players do no join the multiplayer game then the player that initiated the multiplayer game will instead play a single player game.

Challenge mode is the only option available for multiplayer games. Although some event locations may be different to the single player challenge events, the event types are the same.
These are Crossroads, Demolition, Knockout and Race-
 Off.

In a multiplayer game, event selection is decided upon by a voting system. Each player within the game will be given their choice of event to select.

Once all players have selected an event, whichever event has the most votes will be played.
In the case of a tie, the event will be selected at random.
The players are then taken through the default Car and Livery select screens.

If a player has selected both their car and livery whilst others are still making their selections, the player will be held on a Waiting For Other Players screen.

When all players have made their selection, the event will begin.

## 8-5 CARS

The next choice for the player is to select which car to drive. There are ten car classes featuring twenty cars - from muscle cars and pick-up trucks to sports cars and even a hearse! This means there is a ride to suit every driver's desire! Each has its own strengths, weaknesses and character, so players can choose their favourite, or conquer them all as they take on Showdown's different race events.

Turning the Steering Wheel left and right will highlight the option and pressing the Accelerator pedal, or the start button, will confirm the player's choice.

During this selection process, a countdown is displayed in the top left hand corner of the screen. If the player does not make a selection within this time, the highlighted option will be selected.

The four main classes available are:
PICKUP
SALOON
SPECIAL
TUNED

## 8-6 LIVERIES

After selecting the class of car the player can select a livery (paint job)

Turning the Steering Wheel left and right will highlight the option and pressing the Accelerator pedal, or the start button, will confirm the player's choice.

During this selection process, a countdown is displayed in the top left hand corner of the screen. If the player does not make a selection within this time, the highlighted option will be selected.

The four main liveries available are:
FLIP

HANS
NO FEAR
SIMPSON

## 8-7 ON-SCREEN DISPLAY

Before the event begins, a brief video is played that shows the player an overview of the course and a hint box informing the player what they have to do.

After this introduction the countdown timer begins and at this point the game begins.

The On Screen Display will differ according to event type, however there are some details that appear in all game modes.

## 9 EXPLANATION OF TEST AND DATA DISPLAY

Perform tests and data checks periodically by manipulating the TEST Button and SERVICE Button in the cabinet. Follow the instructions in this chapter to conduct checks when the game machine is first installed, when money is being collected, or when the game machine does not operate properly.

Shown overleaf are the tests and screens to be used for different problems.

## A WARNING

- When installing 2 of more cabinets which are networked together. The GAME SETTINGS which are adjusted within the first cabinet are reflected throughout all cabinets within that network.

## stop IMPORTANT

- When changing the game configuration within the TEST MODE, be sure to exit all screens in the correct manner by choosing exit. DO NOT turn the machine ON/OFF to resume game. Changes WILL NOT take effect unless the correct method is used.

## 9-1 SWITCH UNIT AND COIN METER

## A WARNING

Never touch places other than those specified. Touching places not specified can cause electric shock and short circuit accidents.

## stop IMPORTANT

- Adjust the sound to the optimum volume, taking into consideration the environmental requirements of the installation location.
- Removing the Coin Meter circuitry renders the game inoperable.

## 9-1-1 SWITCH UNIT (U.S. TYPE)

Open the coin chute door, and the switch unit shown will appear. The functioning of each SW is as follows:

9-1-1 FIG. 01

| TEST Button (TEST): | For the handling of the Test Button, refer to the <br> following pages. |
| :--- | :--- |
| SERVICE Button (SERVICE): | Gives credits without registering on the coin meter. |
| Sound Volume Switch (SOUND VOLUME): | Adjust sound volume for all of the machines' speakers. |
| Coin Counter | Counts and displayes coins in $\$ 0.10$ units. |

## 9-2 TEST MODE

- The details of changes to Test Mode settings are saved when you exit from Test Mode by selecting EXIT from the system test mode menu. Be careful because if the power is turned off before that point, changes to the settings will be lost.
- Entering the Test Mode clears fractional number of coins less than one credit and bonus adder data.
- Use with the specified settings. If settings other than those specified are used, inappropriate operations or malfunction may occur.

## 9-2-1 TEST MENU

The following options are available from the System Test Menu.

Use the SERVICE button to move the cursor to the desired test item. Press the TEST button to enter the selected item.

SYSTEM INFORMATION: INPUT TEST: OUTPUT TEST: COIN SETTINGS: SOUND SETTINGS:

## 9-3 TROUBLESHOOTING

Problem
Linked cabinets will not sync together in the attract mode.
Causes
1.Network cables are not connected.
2.The cabinets are using security keys from different regions
3.Network cables are faulty.

## Solutions

1.Reconnect the network cables to each cabinet.
2.Ensure each cabinet has the same region which is viewable on the System Information page. Cabinets will only link together from the same region.
3.Replace the faulty network cables. Contact the company from whom the unit was purchased.

## Problem

Cabinets are unable to start a Multiplayer session together.
Causes
1.Network cables are not connected.
2. Cabinets have different Track Packs enabled.
3.Cabinet ID's are not set up correctly.

Solutions
1.Ensure network cables are properly connected to the cabinets.
2.Go into Game Settings in the Test Menu and ensure each cabinet is set to the same Track Pack.
3.Go into the Network Settings and ensure each cabinet has a different Cabinet ID. Confirm the settings and then the cabinets will reset with the new changes saved.

## Problem

The Steering Wheel does not work correctly in the game.

## Causes

1.The Steering Wheel has not been calibrated correctly.

## Solutions

1.Go into the Calibration Settings in the Test Menu and select Calibrate Steering.

## Problem

The Pedals do not work correctly in the game. Vehicles move forward or backwards with no player input.

## Causes

1.The Pedals have not been calibrated correctly.

## Solutions

1.Go into the Calibration Settings in the Test Menu and select Calibrate Brake and follow the on screen instructions. Once this has been done, select Calibrate Accelerator and follow the on screen instructions.

## Problem

No audio can be heard in either the attract mode, or throughout the game.

## Causes

1.The audio level has not been correctly set with the Hardware Volume Control inside the cash drawer.
2.The volume levels within the Sound Settings in the Test Menu have not been set correctly.

## Solutions

1.Go into the cash drawer and adjust the Hardware Volume Control until audio in the game can be heard.
2.Enter the Sound Settings menu from the Test Menu and check that all volume levels are set to the appropriate levels. Options are available within this menu to test the volume levels of each setting to make sure each are correct.

## Problem

High Score Tables have not been cleared after attempting to clear them in the Bookkeeping menu.

## Causes

1.The high scores have only been cleared on one cabinet when multiple cabinets are linked together.

## Solutions

1.When multiple cabinets are linked together, the high score tables will only be cleared if the process is done on all connected machines at the same time. Each cabinet must be in the Bookkeeping menu, and then Clear High Scores should be selected on each one and then confirmed. If any cabinets are left in the attract mode during this, the high score tables will not be cleared.

Problem
An error message appears in the game that says: "IO BOARD NOT DETECTED".
Causes
1.The IO USB cable has become disconnected.

## Solutions

1.Reconnect the IO USB cable to the game board and perform a power cycle.

Problem
An error message appears in the game that says: "SECURITY KEY NOT DETECTED".
Causes
1.The security key has become disconnected.

Solutions
1.Reconnect the security key to the game board and perform a power cycle.

## 10 CONTROLLER UNIT(S)

## AWARNING

- When working with the product, be sure to turn the power off. Working with the power on may cause an electric shock or short circuit.
- Be careful not to damage the wires. Damaged wires may cause an electric shock, short circuit or present a risk of fire.
- Exercise due caution in performing soldering work. If soldering iron is handled carelessly, there could be fires or burns.

## ACAUTION

- When fastening plastic parts, be careful not to tighten screws or nuts excessively. If these are tightened to excess, parts could be damaged, resulting in injuries from fragments, etc.
- After the unit has been disassembled and reassembled again, check carefully that the unit has been reassembled correctly.
- Be sure to inspect the outer covers on both gear and hand brake units.
- Assemble so that there is no gap between the $L$ and $R$ covers. If there is a gap or rattling, the players could get fingers or hands caught, resulting in injury.

## stop IMPORTANT

- Once the product has been disassembled, use slack preventive agent (product No. : 090-0012-N). Coat screws with suitable amounts of this agent and then tighten them. If this agent is not used, the product might start rattling or come apart.
- Use the slack preventive agent prescribed in these instructions. If any other agent is used, there could be chemical changes that inhibit the use of screws and part surfaces could be damaged.
- Be careful not to damage or lose small parts or screws.
- When a part has been replaced, be sure to always make adjustments and check conditions in Test Mode.

## 10-1 CONTROLLER - EXPLODED DIAGRAM

The exploded diagram below shows the Active Steering Wheel Assy. Each part is tagged with a part number. Please quote this number when ordering spare parts.

## 10-2 KEYPAD

## A WARNING

- When working with the product, be sure to turn the power off. Working with the power on may cause an electric shock or short circuit.
- Be careful not to damage the wires. Damaged wires may cause an electric shock, short circuit or present a risk of fire.

If the Keypad switch input does not function correctly on the INPUT TEST screen, the switch may need to be replaced. To carry out this maintenance, you must first remove the Keypad unit.
For this task, you will need a tamper proof wrench (for M5 screws), /and a Phillips-head screwdriver (for M4 screws).

## 10-2-1 KEYPAD REMOVAL

Turn the POWER OFF

Using the M5 tamper proof wrench remove the four tamper proof screws, 1 located in each of the corner of the KEYPAD

Gently lift out the Upper Acrylic and

## 10-3 BRAKE AND ACCELERATOR UNIT

## A WARNING

When working with the product, be sure to turn the power off. Working with the power on may cause an electric shock or short circuit. However, the unit must be switched on when using test mode. Do not touch any part of the unit except those areas indicated.

Be careful not to damage the wires. Damaged wires may cause an electric shock, short circuit or present a risk of fire.

This work should be performed by site maintenance personnel or other skilled professionals. Work performed by non-technical personnel can cause a severe accident such as an electric shock.

To prevent accidents while working or while operating the product after it has been installed, be sure not to conduct any procedures other than those given in this manual. There are cases in which procedures not covered in this manual require special tools and skills.
If a procedure not given in this manual is required, request service from the office given in this manual or from the point of purchase.

## stop IMPORTANT

Be sure to perform volume's move value setting in the Input Test in the Game Test Mode after replacing or adjusting the Volume.

If the accelerator or brake pedals are not functioning correctly, you may need to adjust the positioning of the volume or replace it with a new one. In addition, you should apply grease to the gear contacts and spring parts once every three months.

When the accelerator pedal is not being pressed, the accelerator volume should have a value of 30 H or less. When the pedal is being pressed, the value should be C 0 H or greater.
When the brake pedal is not being pressed, the value should be 35 H or less. When the pedal is being pressed, it should be D0H or more. You can view these values in test mode. Note that the unit must be switched on to use test mode. Do not touch any part of the unit except those areas indicated when the unit is switch on, as there is a danger of electrical shock or short-circuit.
For this task, you will need a Phillips-head screwdriver (for M4, M5 screws).

## Adjusting Procedure

1
On the accelerator and brake pedal unit, remove the two truss screws and lift off the front cover.

2
Loosen the single screw that secures the potentiobase, and move the base to adjust the volume values.

Secure the potentiobase.

4
Configure the volume values on the INPUT ASSIGNMENTS screen in Game Test Mode.

Check that the values change smoothly in response to pedal input.

## 10-3-1 ADJUSTING/REPLACING THE VOLUME POT

## Replacing the Volume

Remove the two screws and lift off the potentio cover.

Detach the connector from the volume to be replaced.

Remove the single screw that secures the potentiobase. (see 10-31 FIG. 02).

Without detaching the volume, remove the potentiobase. (see 10-31 FIG. 03).

Remove the base and gear from the volume, and replace it.

After replacement, configure the volume as described above in "Adjusting Procedure"

When you have finished, check that the values change smoothly in response to pedal input.

## stop IMPORTANT

Use only the specified grease. Using any other kind of grease can result in damage to parts.

Once every three months, you should apply grease to the gear contacts and spring parts. Use Grease Mate-brand spray grease (Part No.: 090-0066).

## 11 GRAPHICS DISPLAY

11-1 SAFETY PRECAUTIONS WHEN HANDLING THE MONITOR

Responding to breakdown or abnormality

- If smoke or a strange odor appears, immediately unplug the power cable from the power source.

Continuing to use the product may cause a fire or an electric shock. Ensure that smoke is no longer emitted, and contact the point of purchase.

- If nothing displays on the screen, immediately unplug the power cable from the power source.

Continuing to use the product may cause a fire or an electric shock. Contact the point of purchase and request an inspection.

- If water or a foreign object enters the monitor's interior, immediately unplug the power cable from the power source.

Continuing to use the product may cause a fire or an electric shock. Contact the point of purchase and request an inspection.

- If the monitor is dropped or the cabinet is damaged, immediately unplug the power cable from the power source.
Continuing to use the product may cause a fire or an electric shock. Contact the point of purchase and request an inspection.
During operation
- Do not repair, reconstruct, or disassemble the monitor.

The monitors interior contains high voltage parts. A fire or an electric shock could result.

For inspections, adjustments, and repair of the monitors interior, request work from the point of purchase.

- Do not insert foreign objects.

If metal objects or flammable materials such as paper are inserted into the interior through ventilation openings or other apertures, an electric shock could result.

- In the event of a thunder storm, do not touch the product or the power cable. An electric shock could result.
- Make sure to perform appropriate adjustments. Do not operate the product when the screen is flickering, distorted, or experiencing other abnormalities. Images from an improperly adjusted screen could cause players and other customers to experience dizziness, headaches, and other ailments.

## 11-2 CLEANING THE SCREEN SURFACE

## ACAUTION

- Use a soft, dry cloth (flannel-type) to wipe away dirt. Do not use materials such as coarse mesh gauze.
- Alcohol (ethanol) is the recommended solvent for removing dirt. When using a cleaning agent, follow the precautions below.
- Dilute neutral cleaning agents for home use with water. Soak a soft cloth in the solution, and wring it thoroughly before wiping the screen.
- Do not use abrasive cleaning agents or powders, or cleaning agents containing bleach.
- Do not use alkaline cleaning agents such as glass cleaners, or solvents such as thinners.
- Do not scrub or scratch the screen surface with abrasive materials such as brushes or scrub brushes.

## CLEAN THE SCREEN DAILY.

## 11-3 ADJUSTMENT METHOD

## stop IMPORTANT

All adjustment values are set accurately at the time of shipping from the factory. Do not readjust these values needlessly or apply adjustments not specified in this manual. The display may not appear properly if the values are incorrect.

## CONTROL - ADJUSTMENT PROCEDURE

This sections explains basic control procedures for making adjustments using the buttons on the 'Monitor Adjustment Board'

This Adjustment Board, and the
Monitor Power Supply are located
behind the Rear Door.

## Button Names and Functions

SELECT: Gains entry to the Item selected in the menu. (Highlights in Yellow when selected) Exits the Item adustment. Any changes made during this operation are actioned.

| DOWN: | Moves the cursor (Black Bar) down to select a menu item. <br> Decrease the value of, or change, a selected menu item. |
| :--- | :--- |
| UP: | Move the cursor (Black Bar) up to select a menu item. <br> Increase the value of, or change, a selected menu item. |
| LED: | LED illuminates green: Monitor is operating. <br> LED flashes red: Power is off. |
| POWER: | Turns the LCD Display ON and OFF. (Usually, it's not necessary to operate.) |

## On-Screen Display (OSD)

Press the MENU Button while the OSD is not displayed to bring up the Picture Menu. On the Picture Menu, it is possible to perform various screen adjustments.

11-3 Fig. 04

Use the UP and DOWN Buttons to move the 'Black Bar'to the item you want to adjust. After selecting the desired item, pressing the SELECT Button will extend the MENU Screen and allow adjustments to be changed.

Within each item, press the SELECT Button to exit the adjustment screen. The adjustment values at this time will be saved simultaneously.

11-3 Fig. 05

CSM (Selects Operation Mode))
Selection availble - 6500K - 9300K - USER

## BRIGHTNESS

(Adjust Brightness)
Adjust screen Brightness. - Values: 0-100
( 0 " being the darkest setting, and " 100 " being the brightest)
CONTRAST
(Adjust Contrast)
Adjust Contrast level. - Values: 0-100
( 0 " having the least amount of difference between light and dark, and " 100 " having the most)

NOTE : The Red, Green, and Blue adjustments are unavailable in the Mode of Operation selected on the Screen shown in 11-3 Fig. 06. These adjustments can only be made is the CSM option is set to 'User'.

## 12 COIN HANDLING

PLEASE NOTE: That this product does not come with a Coin Validator unless stated at time of order. Information below pertains to the type of Validator that is supplied upon request...

## Handling the Coin Jam

If the coin is not rejected when the REJECT button is pressed, open the coin chute door and open the selector gate. After removing the jammed coin, put a normal coin in and check to see that the selector correctly functions.

## 12-1 CLEANING THE COIN SELECTOR

## stop IMPORTANT

- Remove and clean smears by using a soft cloth dipped in water or diluted chemical detergent and then squeezed dry.
- Never apply machine oil, etc. to the Coin Selector.
- After cleaning the Coin Selector, insert a regular coin in the normal working status and ensure that the selector correctly functions.

The Coin Selector should be cleaned once every 3 months.
When cleaning, follow the procedure below:
1
Turn the power for the machine OFF. Open the Coin Chute Door

Remove the Coin Selector from the Coin Chute Door

Open the gate and dust off by using a soft brush (Small soft Paint Brush, etc.)

FIG. 12-1a

## CLEANING THE COIN SELECTOR (MECHANICAL).

1
Remove and clean smears by using a soft cloth dipped in water or diluted chemical detergent and then squeezed dry.

Remove the CRADLE.. When removing the retaining ring (E ring) be very careful so as not to bend the rotary shaft.

Remove stain from the rotary shaft and shaft receiving portions by wiping off with a soft cloth. etc.

FIG. 12-1b

After wiping off as per previous step, further apply a dry cloth to completely dry the Coin Selector.

## Coin Insertion Test

Once every month, when performing the Coin SW Test, simultaneously check the following:

Does the Coin Meter count satisfactorily?
Does the coin drop into the cashbox correctly?

Is the coin rejected when inserted while keeping the REJECT Button pressed down?

FIG. 12-1c

## CLEANING THE COIN SELECTOR (SR3/NRI)

Remove and clean smears by using a damp soft cloth dipped in water. DO NOT use any diluted chemical detergent or cleansing agent as this will impair the workings of the component.

2
Open the reject gate to gain access to the rundown path.

FIG. 12-1d

FIG. 12-1e

FIG. 12-1f

Pictures for illustration purposes only.. Model shown is SR3 Coin validator. Visual differences
between models but process remain the same.

## 12-2 FAULT FINDING

## Fault Finding

The following information is presented for customers' guidance in rectifying a fault but does not cover all possible causes.

All acceptors with electronic faults should be returned to an approved service centre for repair.

| SYMPTOM | INVESTIGATE | POSSIBLE CAUSE |
| :---: | :---: | :---: |
| Acceptor does not work (all coins reject) | Connector | Poor Contact |
|  |  | Loose Wire |
|  | Power Supply | Not switched on |
|  |  | Incorrect voltage |
|  |  | Inadequate current |
|  |  | Rise time too slow |
|  | Inhibit all inputs | Acceptor Inhibited |
|  | Accept gate | Gate not free or dislocated |
|  | Accept channel | Obstruction |
|  | Reject gate | Not fully closed |
|  | LED on rear cover RED | EEPROM chksm error |
|  |  | SR Sensor fault |
|  |  | Credit opto fault |
|  |  | Credit sensor blocked |
|  |  | Reject lever pressed |
|  | LED on rear cover YELLOW | Reinstall power |
| Poor Acceptance | Power Supply | Voltage less than 10 v (Voltage drops when coil engages) |
|  | Accept gate | Gate jam or dislocated |
|  | Connector | Loose |
|  | Coin rundown | Dirty |
|  | Bank Select | Both banks enabled |
| Coin stick or jam in acceptor. | Accept channel | Acceptor dirty or may have some damage |
|  | Accept gate |  |
|  | Reject gate |  |
| A true coin type rejects | Label | Coin not programmed |
| No accept signal | Connector | Loose or broken wire |
|  | Accept channel | Path dirty or obstructed |

## 12-3 ADJUSTING THE PRICE OF PLAY (EXCEL)

## stop IMPORTANT

- SEGA amusement products are fitted with either an EXCEL CREDIT PCB or a VTS (Volume, Test, Service) PCB. Both these components operate coin handling in the same way. Only one of these components are fitted.
- The price of play is determined by the configuration of switches located on either an EXCEL board or VTS board. The type of board used is determined by product location. Switch settings for both types of board remain the same.

This product comes equipped with a Money Controls SR3 Coin Acceptor. To adjust the price of play ALL credit setting are adjusted via the EXCEL CREDIT BOARD.

## IMPORTANT!

The CREDIT SETTINGS within the SYSTEM TEST MODE must be set to 1 coin 1 credit to allow the CREDIT BOARD to function correctly.

The VTS BD has a built in Credit Board. This is controlled by 2 DIL Switches. These allow the operator to select the price of play, type of coin acceptor and region.

## EXCEL Credit Board

DIP SWITCHES

Table 5 12-4

## 13 LAMPS AND LIGHTING

## AWARNING

- When working with the product, be sure to turn the power off. Working with the power on may cause an electric shock or short circuit.
- You may get burned by a hot fluorescent lamp or other lamps. Pay full attention to the lamps when performing the work.
- Be sure to use lamps of the designated rating. Using lamps of undesignated rating can cause a fire or malfunctioning.
- There is the danger of short circuits or smoke generation due to deterioration of insulation in lighting fixtures resulting from age deterioration. Check for anomalies such as the following: Does it smell like something is burning? Is there socket discoloration? Are any lamps being replaced frequently? Do lamps not go on properly?

## ACAUTION

The Coin Door Lamp utilises a 12 v 1.2 w Wedge Bulb. It is important that you replace this bulb or any other bulb of that of the same voltage and rating. Failing to observe this caution may result in PCB failure or possible fire hazard.

13-1 COIN DOOR LAMP

Step 1. Open the Coin Door and locate the Lamp Housing directly behind the Coin Insert Bezel.

Step 2. Hold the Lamp Housing firmly between your index finger and thumb and gently pull upwards. Do Not try to remove the Lamp Housing whilst holding the bulb as the bulb may break causing injury.

Step 3. Once the Lamp Housing has been removed, carefully
 hold the bulb between your fingers and pull the Lamp Housing away.

Do not twist either bulb or Lamp Housing whilst removing the bulb as this may cause damage to both bulb and or Housing.

Type: Wedge Bulb-12v, 1.2w
Step 4. Simply push-fit a replacement bulb of the same type and follow these steps in reverse to refit.

## A WARNING

this work on top of the cabinet, should not be undertaken without THE USE OF A SUITABLE STEP OR FOOTSTOOL.

## A WARNING

MAKE SURE THAT THE MAIN SUPPLY VOLTAGE TO THE MACHINE IS SWITCHED OFF BEFORE ATTEMPTING TO CARRY OUT THIS WORK

## ACAUTION

THE BILLBOARD IS LOCATED AT HEIGHT AND WEIGHTS APPROX 7KG. MAKE SURE THAT A FOOTSTOOL OR STEP LADDERS ARE USED. ALSO HAVE ANOTHER PERSON HELP IN THE REMOVAL PROCCESS.

1
The Billboard LED strip is located inside the back section of the Billboard housing, before attempting to change, TURN THE POWER OFF.

To gain access to the LED strip, extract the six (6) fixing screws which hold the Billboard Title Panel in place and remove.

Remove the 5x Philips screws which secure the Lower Speaker Panel Bkt. Whilst another person takes the strain of the Title Panel, carefully remove the (6) fixings which secure the Title Panel.

Both Billboard \& Race Leader LED strips are available. Both LED strips are self adhesive.

Disconnect the harness from the relevant LED strip and carefully peel away from the cabinet..

## WARNING

MAKE SURE THAT THE MAIN SUPPLY VOLTAGE TO THE MACHINE IS SWITCHED OFF BEFORE ATTEMPTING TO CARRY OUT THIS WORK

## Start Button Lamp，View Change Button Lamp

Remove the 4 tamper proof screws．

Please note that the images shown may differ from actual product but the process is the same．

Remove the Switch Plate．The Switch Plate contains wiring connections．Disconnect the connector，taking care not to damage the wiring．

There is a metal fitting at the base of the buttons on the Button Plate. Rotate this metal fitting to unlock it, then remove the printed circuit board from the Button Plate.

5 Press and turn the lamp counter-clockwise to remove it.

START LAMP 12V 2W (Pt No LT1060)
VIEW LAMP 12V 2W (Pt No LT1060)

Replace the bulb with one matching the specification stated , then reassemble the Unit in the reverse order and refit the Button Unit to the control Panel.

## 13-4 WOOFER PLATE LED LIGHTING

The WOOFER PLATE at the rear of the ASSY SEAT is actively illuminated. To check the functionality or to replace the LED PCB, follow the steps below.

## WARNING

MAKE SURE THAT THE MAIN SUPPLY VOLTAGE TO THE MACHINE IS SWITCHED OFF BEFORE ATTEMPTING TO CARRY OUT THIS WORK

Remove the (4) fixings and washers from around the circumfrance of the WOOFER PLATE.

[^0]

Remove the (2) Phillips Self
Tap Screws.

Remove the (2) Phillips self tapping screws fromt the Assy Woofer Bracket and remove. The LED PCB is located on the inner side.

| Remove the (2) Phillips machine Screws. | $\longrightarrow 0_{\mathrm{J}}^{0}$ |
| :---: | :---: |
| LED PCB <br> Pt No 838-1 4973-01 | $\rightarrow \mathrm{a}_{\theta} \mathrm{日}^{\circ}{ }^{\mathrm{a}} \mathrm{\square}$ |

Re-assemble by following these intructions in reverse order. PLEASE NOTE : When refitting the Woofer Plate be very careful not to overtighten the (4) fixings. Overtightening these fixings WILL cause the Woofer Plate to crack.

## 14 PERIODIC INSPECTION

The items listed below require periodic check and maintenance to retain the performance of this machine and to ensure safe business operation.
When handling the controller, the player will be in direct contact with it. In order to always allow the player to enjoy the game, be sure to clean it regularly. Also, it is advisable to provide wet tissue, etc. available for player use.

## WARNING

- Every 6 months check to see if power cords are damaged, the plug is securely inserted, dust is accumulated between the socket outlet and the power plug, etc. Using the product with accumulated dust in the interior may cause fire or electric shock.
- Never use a water jet, etc. to clean the inside and outside of the cabinet. If wetness occurs for any reason, do not use the product until it has completely dried.
- Once a year, request the office shown on this manual or the dealer from whom the product was originally purchased to perform the internal cleaning. Using the product with accumulated dust in the interior may cause fire or other accidents.
Note that you are liable for the cost of cleaning the interior parts.
- There is the danger of accidents involving electrical shorts circuits or fire caused by factors such as the deterioration of insulation in electrical and electronic equipment over time. Check that there are no abnormalities such as odors from burning.

14 TABLE 01 PERIODIC INSPECTION TABLE

| ITEMS | DESCRIPTION | PERIOD |
| :--- | :--- | :--- |
| CABINET | Confirm that adjusters contact <br> floor | Daily |
|  | Volume inspection | Monthly |
|  | Gear alignment inspection | Every 3 months |
|  | Greasing | Every 3 months |
| KEYPAD | Switch inspection | Monthly |
| SWITCH ASSY (START) | Switch inspection | Every 3 months |
| ACCELERATOR \& BRAKE | Volume inspection | Monthly |
|  | Gear and spring potion greasing | Every 3 months |
|  | Screen cleaning | Weekly |
|  | Confirm settings | Monthly or <br> when moving |
| COIN CHUTE DOOR | Coin switch inspection | Monthly |
|  | Coin insertion test | Monthly |
|  | Selector cleaning | Every 3 months |
| SEAT | Greasing to the seat rail | Every 3 months |
| GAME BOARD | Confirm settings | Monthly |
| POWER CABLES | Inspection, Cleaning | 6 months |
| INTERIOR | Cleaning | Yearly |
| CABINET SURFACES | Cleaning | As appropriate |

## Cleaning the Cabinet Surfaces

When the cabinet surfaces are badly soiled, remove stains with a soft cloth dipped in water or diluted (with water) chemical detergent and squeezed dry. To avoid damaging surface finish, do not use such solvents as thinner, benzine, etc. other than ethyl alcohol, or abrasives, bleaching agent and chemical dustcloth.
Some general-purpose household, kitchen and furniture cleaning products may contain strong solvents that degrade plastic components, coatings, and print. Before using any cleaning product, read the product's cautionary notes carefully and test the product first on a small area that is not highly visible.

## Seat (Greasing to Seat Rail Portion)

Move the Seat to the rear most position and apply spray greasing to the portion shown at the right once every 3 months using NOK KLUBER L60 or GREASE MATE SEGA PART No. 090-0066.

After greasing, move the Seat a few times forward and backward so as to allow the grease to be applied all over uniformly.
Be sure to wipe grease which attaches to the surfaces of the PROTECT RUBBER on the Seat Rail, or any excess grease.

## 15 TROUBLESHOOTING

## 15-1 TROUBLESHOOTING (WHEN NO ERROR MESSAGE IS SHOWN)

## AWARNING

- In order to prevent electric shock and short circuit, be sure to turn power off before performing work.
- Be careful so as not to damage wirings. Damaged wiring can cause electric shock or short circuit.
- After removing the cause of the functioning of the Circuit Protector, reinstate the Circuit Protector. Depending on the cause of the functioning, using the Circuit Protector as is without removing the cause can cause generation of heat and fire hazard.
- In the event that a problem cannot be resolved by employing the procedures listed in this Manual, be sure to request service from the office shown on this Manual or the dealer from whom the product was originally purchased. Attempts to employ procedures other than those specified in this Manual can cause electrical shock, shorting, or fire.
- In the event of a problem that is not described here, be sure to contact the office shown on this Manual or the dealer from whom the product was originally purchased. Careless attempts at repair can result in electrical shock, shorting, or fire.

If a problem occurs, first check to make sure that the wiring connectors are properly connected.

15 TABLE 01

| PROBLEM | CAUSE | COUNTERMEASURES |
| :--- | :--- | :--- |
| When the main SW is <br> turned ON, the machine <br> is not activated. | The power is not ON. | Firmly insert the plug into the outlet. |
|  | Incorrect power source/voltage. | Make sure that the power supply/voltage <br> are correct. |
|  | The Fuse on the AC Unit has blown <br> due to momentary over current. | After eliminating the cause of overload, <br> replace the specified rating fuse. |
|  | The fuse of the connect board has <br> blown due to momentary over <br> current. | After eliminating the cause of overload, <br> replace the specified rating fuse. |
| LED lamp inside <br> Billboard Unit not <br> lighting | Connector connection fault. | Check connections to the Billboard Unit. |
|  | Replace LED strip | Replace LED strip |

|  | Sound is not emitted. | Sound volume adjustment is not correct | Adjust the Switch Unit's sound adjustment volume. |
| :---: | :---: | :---: | :---: |
|  |  | Faulty connections for various connectors | Check the connections for the game board, amp, speakers and Volume connectors |
|  |  | Malfunctioning BD, amp and speaker | Perform Sound Test. |
|  | Sounds are emitted and the lamps are lit, but the screen is black. | Faulty connections for the visual signal connector or the monitor power connector | Check the connections for the monitor and game board connectors. |
|  |  | Faulty LCD Display | See Chapter 11 |
|  | Colors on the monitor screen are strange. | Faulty connection for the visual signal connector. | Check the visual signal connector connection and make sure it is secured properly. |
|  |  | Screen adjustment is not appropriate. | Make adjustment appropriately. |
|  | The on-screen image sways and/or shrinks. | The power source and voltage are no correct. | Make sure that the power supply and voltage are correct. |
|  | Does not accept input from any switch or | Faulty connector connections. | Check the connection for the I/O Board and Cabinet connector. |
|  | volume. |  | Check the power for the I/O Board. |
|  | Does not accept input from the Keypad. | Faulty connector connections. | Check the connections for the connectors in the Control Panel and between the Control Panel and the Cabinet. |
|  |  | Broken Microswitch. | Replace the KEYPAD |
|  | Steering (Servomotor) response is incorrect. | Incomplete power on check. | Power on and verify that the power on check completes properly. |
|  |  | Deviation of the volume value. | Adjust the volume value in the Test Mode. |
|  |  | Volume gear engagement fault. | Adjust the engagement of the gear. |
|  |  | Volume malfunctioning. | Replace the volume. |
|  |  | Detached wires. | Check for faulty wire connections around moving parts. <br> When replacing wires, secure them so that they do not touch any moving parts. |
|  | No response from Steering (Servomotor). | Failure of power-on checking procedure. | Reconnect the power and complete a power-on checking procedure. |
|  |  | Faulty connector connections. | Check the connections for the connectors between the Game Board and Servodriver and between the Servodriver and the Servomotor. |
|  |  | Thermal element in the Servodriver is operating. | Occurs when the internal temperature reaches $70^{\circ} \mathrm{C}\left(158^{\circ} \mathrm{F}\right)$ and corrects automatically when the unit cools. |
|  |  | Momentary overload caused a fuse on the Servodriver to blow. | Contact the company from whom the unit was purchased. |

| Steering (Servomotor) is weak in its force feedback | Ageing of the force feedback mechanism | Reset in the Test Mode. |
| :---: | :---: | :---: |
| Does not accept input in from the Reset Button unit. | Faulty connector or connections. | Check the connections between the I/O Board, the Cabinet and the Reset Button Unit |
|  | Faulty Microswitch | Replace Microswitch |
| The accelerator or brake does not perform appropriately. | Incorrect volume setting. | Adjust the volume value in the Test Mode. |
|  | Faulty Volume attachment or adjust gear alignment. | Adjust the volume attachment and verify in Test Mode. |
|  | Faulty connector or connections. | Check the connections for the accelerator and brake connectors and the connectors between the accelerator, brake and cabinet. |
|  | Failure of the volume. | Replace the volume. |
| Start button and View Change button input does not work and they do not flash. | Faulty connector or connections. | Check the connections for the connectors between the I/O Board, the cabinet and the control panel and those inside the control panel. |
| Start button and View Change button input works, but they do not flash. | Unverified settings or operation. | The Start button only flashes when Free Play is set. Check the operation in Test Mode. |
|  | The lamp is blown. | Replace the lamp. |
| Failure of the network play. | Network play is wrongly set. | Reset correctly. |
|  | Communication cables are disconnected. <br> Communication cables are wrongly connected. | Reconnect the cables. |
|  | Damage of communication cables. | Replace the cables. Contact the company from whom the unit was purchased. |

## AWARNING

- In case fuse replacements other than those stated in this manual are necessary, contact where you purchased the product from for inquiries regarding this matter.
- In order to prevent an electric shock, be sure to turn power off and unplug from the socket outlet before performing work by touching the internal parts of the product.
- Be careful so as not to damage wirings. Damaged wiring can cause electric shock and short circuit accidents.
- Be sure to use fuses meeting specified rating. Using fuses exceeding the specified rating can cause fire and electric shock accidents.
- After eliminating the cause of the blowing of fuse, replace the fuse. Depending on the cause of fuse blowing, continued use with the fuse as is blown can cause generation of heat and fire hazard.

## 16 GAME BOARD

## A WARNING

- When working with the product, be sure to turn the power off. Working with the power on may cause an electric shock or short circuit.
- Be careful not to damage the wires. Damaged wires may cause an electric shock, short circuit or present a risk of fire.
- Do not use this product with connectors other than those that were connected and used with the game board at the time of shipping. Do not carelessly connect wires to connectors that were not used at the time of shipping, as this may cause overheating, smoke or fire damage.

## A CAUTION

In this product, setting changes are made during the test mode. The game board need not be operated. Use the game board, etc. as is with the same setting made at the time of shipment so as not to cause electric shock and malfunctioning.

## stop IMPORTANT

Static electricity from your body may damage some electronics devices on the IC board. Before handling the IC board, touch a grounded metallic surface so that the static electricity can be discharged.

## 16-1 CONTROL BOARDS - LOCATION

## A WARNING

- When returning the game board after making repairs or replacements, make sure that there are no errors in the connection of connectors. Erroneous connections can lead to electrical shock, short circuits or fires.
- When connecting a connector, check the direction carefully. Connectors must be connected in only one direction. If indiscriminate loads are applied in making connections, the connector or its terminal fixtures could be damaged, resulting in electrical shock, short circuits or fires.

The machine is fitted with Game Board Unit(s) and several other Ancilliary Boards which are mainly fitted inside the Base Box. Each machine contains the its own Europa Game Unit and set of Boards allowing them to run independantly of each other. Only qualified Personnel should attempt to Service these Units and before gaining access to the machine, it should be isolated from the mains supply.

The Game Board Unit is located under the Player Seat, and to gain access the following procedure should be carried out.

Unlock the Seat Lid and then remove the Security Bolt located on each edge of the Lid.

Lock (J9117)

Once released, the Seat Lid may be opened by tilting it backwards.
Due to the weight of the unit, great care should be taken when opening the Seat Lid, if dropped Impact Damage is likely to occur.

Before opening the unit, a protective cushion or padding should be placed on the ground in the approximate position where the seat back will touch the floor. This is to help prevent the back of the seat from getting scratched and marked and when opening, the back of the seat should be carefully lowered to the floor, placing it on the protective cushion.

The Control Boards are located under the front floor section of the base. To gain access, remove the four screws (2 each side of the footplate)

When screws have been removed, TILT the footplate in an upwards direction until the LIP on the backside of the footplate is clear of the front section of floor and REMOVE the plate.

The Game Unit and Control Boards located inside the Cockpit Base are laid out in the following manner. When replacing a board, make sure that any connectors being removed should be handled correctly with any location fastener if any being released before disconnecting the connector.

Always disconnect a plug by holding the housing and never tug on the wiring as this may damage the terminations inside the connecter and lead to electrical failure.

The Assy Game Board is located to the rear of the cabinet. The Game Board can be removed from this assembly by removing the (4) fixings which retain it to the shock absorbers.

## A CAUTION

Do not open the Game Board without the express permission of SEGA. If for any reason entry has been gained into the Game Board without the permission of SEGA, then all warranty rights become void.
When returning the Game Board to SEGA for service, then please make sure that adequate packaging is used as damage in transit make occur.

## 17 COMMUNICATION PLAY

For this game, up to 6 machines can be networked together allowing up to 6 players to play simultaneously. In this instance, connecting the communication cable and adjustment to the settings for communication play will be required.

## 17-1 INSTALLATION PRECAUTIONS

## WARNING

- Before starting to work, ensure that the Power SW is OFF. Failure to observe this can cause electric shock or short circuit.
- Use care so as not to damage wirings. Damaged wiring can cause electric shock or short circuit.
- Do not touch undesignated places. Touching places not designated can cause electric shock or short circuit.
- The work described below should be carried out by the site maintenance personnel or other qualified professional. Work carried out by personnel without the necessary skill or technology can cause accident.
- To perform work safely and avoid serious accident such as the cabinet falling down, do not perform work in places where step-like grade differences, a ditch, or slope exist.
- To prevent accidents while working or while operating the product after it has been installed, be sure not to conduct any procedures other than those given in this manual. There are cases in which procedures not covered in this manual require special tools and skills. If a procedure not given in this manual is required, request service from the office given in this manual or from the point of purchase.

## ACAUTION

- To perform work safely, be sure to secure the space corresponding to number of machines to be linked. Failure to observe this can cause accident.
- To avoid accidents, use a cable cover that will not cause patrons to trip when laying network cables in areas of heavy foot traffic.
- To prevent accidents and acts of vandalism, cover the network cables with the strongest cover possible.

Since 2 or more machines are to be linked, sufficient power corresponding to the number of machines used need to be supplied. Note that as a standard, the per machine capacity should be 14 A for the $100-120 \mathrm{~V}$ area, and 8 A for the $220-240 \mathrm{~V}$ area.

## Distance between Machines

The maximum distance between the game machines depends on the length of the cables connecting them, but make sure the units are separated from each other by at least $75 \mathrm{~cm}(29.5 \mathrm{in})$ so that players can pass between them.

17-1 Fig 01

## 17－2 CONNECTING THE COMMUNICATION CABLE

To enable network play，the Hubs inside each of the game machines involved must be connected with network（LAN） cables．Up to a maximum of 4 machines（4 Players）can be Networked together，all that＇s required is to link between the Hubs of each of the machines that are to complete the＇Network＇．
Please refer to Chapter 6－3 for location of Network connections on A／C unit．

1
Turn off the power and unplug the power cord from the outlet．

Using Chapter 6 of this manual as reference，move the machines so that they are lined up．
Leave enough space behind each Unit to allow access for a Network HUB（only required for 3 or more seats）which when located will be positioned near the Slave Cockpit of each Machine．

When linking 2 seats or＂Twin＂cabinet，use a single Lan Cable，Pt．No．600－7279－0200UK （Supplied）．Connect the Lan cable directly to the $\mathrm{A} / \mathrm{C}$ unit between both cabinets

When linking 3 or more seats a Hub Kit must be used．Please contact SEGA or your local distributors office for further technical or sales information

Once the desired Network connections have been established，power on the machines and enter TEST MODE to allocate each seat a number within the NETWORK TEST．

A typical illustration of 4 seats in a network

## 17-3 NETWORK PLAY SETTINGS

Each of the linked machines must be set up for network play. If the machines are not set up correctly, network play will not be possible.
For this game, up to 4 machines can be connected to allow up to 4 players to play simultaneously.

1
Turn on the power on each machine to be used in network play.

Initiate TEST MODE on ALL machines.

Select the GAME TEST MODE and press the Test button to display the GAME TEST MENU screen.

Select the NETWORK SETTINGS in the GAME TEST MENU screen and press the Test button.

Perform the CABINET ID setting. Set the different ID number to each machine. Be sure to assign one of them with the ID number of " 1 "

Cause all of the machines to exit from the TEST MODE. Always select EXIT in the SYSTEM TEST MENU screen.

## stop IMPORTANT

- In network play, difficulty level and other settings are made from CABINET ID Number 1. Changing the settings at CABINET ID Number 1 also changes the settings for other units.
- When networking machines it is important that all trailing network cables are placed safely away from players and observers alike. Untidy cables may cause a trip or electrical hazard.

## 18 DESIGN-RELATED PARTS

For the warning display stickers, refer to Section 1.

## A WARNING

The DC power wire color for this product is different from previous SEGA titles. Working from the previous wire colors will create a high risk of fire.

The color codes for the wires used in the diagrams in the following chapter are as follows.
A PINK
B SKY BLUE
C BROWN
D PURPLE
E LIGHT GREEN
Wires other than those of any of the above 5 single colors will be displayed by 2 alphanumeric characters.

```
1 RED
2 BLUE
3 YELLOW
G GREEN
5 ~ W H I T E
7 ORANGE
8 BLACK
9 GRAY
```

If the right-hand side numeral of the code is 0 , then the wire will be of a single color shown by the lefthand side numeral (see the above).

Note 1: If the right-hand side numeral is not 0 , that particular wire has a spiral color code. The lefthand side character shows the base color and the right-hand side one, the spiral color.

Note 2: The character following the wire color code indicates the size of the wire.

| U: | AWG16 |
| :--- | :--- |
| K: | AWG18 |
| L: | AWG20 |
| None: | AWG22 |

[^0]:    3
    Remove the (2) Phillips self tapping screws fromt the Assy Woofer Bracket and remove. The LED PCB is located on the inner side.
