## Racing has never been so Cool!

Arctic Thunder, Midway's coolest new adventure racing game delivers action-packed thrills and an unrivaled racing experience for expert sledders and Flatlanders alike!

In this sledders' shootout, players select one of **six different characters**, each with their own **personalities** and **customized sled**. Characters demonstrate special attributes representing their personalities and are outfitted with fully equipped sleds that offer unique handling abilities and a whole lotta attitude.

Sleds swoop through the well-groomed trails of the Swiss Alps or sail through the bitter wind chill of a Chernobyl Nuclear Meltdown. All **six point-to-point tracks** offer **amazing jumps**, **secret short cuts**, **hair raising free-fall drops** and **rewarding power ups** to give players an extreme edge. Players race to the finish, mastering **tricks**, **dodging missiles** and **launching attacks**.

In addition to the **superior graphics** that make Midway's games so popular, the clever snowmobile-like cabinet design with a **built-in fan** and **seat shaker** enhance the action-packed gameplay. As players apply a steady throttle to the handlebar, the sled accelerates, the seat rumbles and the fan blows a thin wind of cold air in your face, making *Arctic Thunder* the most realistic racer to date!

**Built-In Fan:**  
Enhances gameplay experience by creating a burst of cold air adjusted by sled speed.

**Interactive Seat Shaker:**  
Simulates the feel of an actual snowmobile ride with a built-in motor and speaker.
