SAFETY PRECAUTIONS

The following safety precautions and advisories are used throughout this manual and are defined as follows.

* WARNING! *
Disregarding this text could result in serious injury.

* CAUTION! *
Disregarding this text could result in damage to the machine.

* NOTE! *
Is an advisory text to hint or help understand.

BE SURE TO READ THE FOLLOWING

* WARNING! *
Always turn OFF Mains AC power and unplug the game before opening or replacing any parts.
Always grasp the plug, not the line cord, when unplugging the game from an electrical outlet.
Always connect the Game Cabinet to a grounded electrical outlet with a securely connected ground line.
Do Not install the Game Cabinet outdoors or in areas of high humidity, direct water contact, dust, high heat or extreme cold.
Do Not install the Game Cabinet in areas that would present an obstacle in case of an emergency, i.e. near fire equipment or emergency exits.

* CAUTION! *
Always use a Digital Multimeter, logic tester or oscilloscope for testing integrated circuit (IC) logic PC boards. The use of a continuity tester is not permitted.
Do Not connect or disconnect any of the integrated circuit (IC) logic PC boards while the power is ON.
Do Not use any fuse that does not meet the specified rating.
Do Not subject the game cabinet to extreme temperature variations. Reliability of electrical components deteriorates rapidly over 60 °C.
MACHINE INSTALLATION AND INSPECTION

When installing and inspecting *Snapshot 2*, be very careful of the following points and pay attention to ensure that the players can enjoy the game safely.

- Be sure to turn the power **OFF** before working on the machine.

  * WARNING! *
  **Always** Turn **OFF** mains power before removing safety covers and refit all safety covers when work is completed.

- Make sure the power cord is not exposed on the surface (floor, ground, etc.) where people walk.

- Check that the rubber glide feet levelers are set correctly on the floor so that the game cabinet is level and stable.

- Always make complete connections for the integrated circuit (IC) logic PC Boards and other connectors. Insufficient insertion can damage the electrical components.

  * CAUTION! *
  **Before** Switching the machine on be sure to check that it has been set on the correct voltage for your area!

  **Refer** To the mains voltage adjustment section of this manual. Machines are normally shipped on 220V AC unless otherwise specified.

- Only qualified personnel should inspect or test the integrated circuit (IC) logic PC Boards.

- If any integrated circuit (IC) logic PC Boards should need servicing, please contact the nearest LAI GAMES Distributor. (Refer to the back page of this manual)
INTRODUCTION
Congratulations on your purchase of Snapshot 2 Studio by LAI Games. We hope you take the time to read this manual and learn about the many features and user-friendly adjustments that can be made to fine-tune the game for maximum earning potential.

DESCRIPTION
Snapshot 2 Studio is a photo booth with dual cameras and mobile integration, that lets players choose which game mode they want to play, and offers a variety of photo decoration options unique to each mode. The Snapshot Companion app is available on both iOS and Android as a companion app to Snapshot 2 Studio.

SNAPSHOT COMPANION APP
Using the Snapshot Companion mobile app, players are able to transfer photos between the booth and their mobiles allowing them to share images with an unlimited number of social networks and applications, as well as import and print any photo from their mobile.

AUTOMATIC UPDATES
Snapshot 2 Studio has a fully automatic updating system when the game has an internet connection. Connect your booth to the internet to take advantage of this feature, or see the Software Updates menu section of this manual for more information.

PACKAGING

CONTENTS
- The Snapshot 2 Studio cabinet
- Operator Manual
- 1 x USB (preloaded with game system image)
- 2 x coin door keys
- IEC Power Cord
- Parts & Accessories

SPECIFICATIONS

DIMENSIONS
- Weight: 360kg (793.67lb) (excluding packaging)
- Weight: 380kg (837.76lb) (including packaging)
- Height: 2446.8mm (96.33”)
- Width: 1459.2mm (57.45”)
- Length: 1880.4mm (74.03”)
- Cabinet Power: Maximum 350W
- Printer Power: Maximum 480W

ELECTRIC SUPPLY
The game can operate on a universal mains input voltage between 88-264VAC 50/60Hz single phase. The supply must be a three wire grounded supply. An adjustment screw is available for fine-tuning the output voltage.
**LOCATION REQUIREMENTS**

- Ambient temperature: 5C - 40C
- Ambient humidity: Low
- Ambient U.V. radiation: Very low
- Vibrations level: Low
CONTENTS DETAILED

ASSEMBLY

**STEP A**

1. Maneuver the cabinet into the desired position.
**STEP B**
1. Lift the header section up, and hold it.
2. Pull down the floor section.
**STEP C**

1. Position the back wall against the floor section and lower the header over the back wall. Fasten with four M6 x 20mm screws, two each per side.
2. Fasten the back wall to the floor with four M6 x 20mm screws, two each per side.
3. Use two M6 x 20mm screws – one each per side – to fasten the header and main cabinet together.
4. Use two M6 x 20mm screws – one each per side – to lock the floor into position.
GAMEPLAY AND MODES

HOW TO PLAY

- Pay to play
- Select a game mode
- Take your photos (in masquerade mode, decorations are picked first)
- Decorate your photos
- Choose your print layout (upsell available here, if option enabled in Coin Settings)
- Collect your photos

OR

- Pay to play
- Log in using the Snapshot app
- Select two photos from your account
- Decorate your photos
- Choose your print layout
- Collect your photos

CLASSIC MODE
Classic mode allows players to take six quick photos, and apply a single filter to all the photos.

FILTER AND DECORATE MODE
Filter and decorate mode allows players to take two photos, apply a preset combination of effects to them, as well as adding stickers and drawing on the photos. Once they’re done, they can select a print layout.

MASQUERADE MODE
Masquerade mode allows players to select two masquerades and then take photos that fit into them. Once they’re done, they can select a print layout.

MY GALLERY MODE
Players who have logged in with the Snapshot Companion App can access My Gallery mode, allowing them to choose two photos from their account to decorate and print.

ATTRACT MODE
The monitor inside Snapshot 2 Studio displays a slideshow of photos taken with Snapshot, demonstrating each mode and its unique features.

PLAY MODE
Snapshot 2 Studio has two play modes. The standard Coin Play mode, where a coin or coins are inserted, or Free Play mode, where no coins are necessary.

COIN PLAY
Coin Play mode is entered from Attract mode, by inserting coins in any of the two coin slots on the front of the machine cabinet, then following the instructions in the “How to Play” section.

FREE PLAY
Free play can be set in one of three ways:
- Entering the operator menu by pressing the red TEST button, then entering the game settings. From here, enter free play settings and turn free play mode on.
- For a single free game, just press the green SERVICE button once.
- Push and hold the green SERVICE button for 5 seconds. This is a temporary free mode, and the game will return to normal when reset.

INITIAL SETUP PROCEDURE
The first time a Snapshot booth is turned on, the initial setup procedure must be performed. This ensures that the booth is set up correctly from the first photo. The setup procedure can be repeated at any time via the System Settings menu.

1. **Calibrate your touch screen**
   The first step is ensuring that your touch screen is correctly calibrated. The calibration process will begin automatically when the game is turned on for the first time. Follow the instructions on screen, and press next to finalize the calibration. If you are unable to press next due to a poor calibration, the calibration process will restart.

2. **Select booth type (after system image only)**
   The first time you start up your Snapshot booth, you will not have to perform this step. It will only appear if you have performed a system image on your booth. Select your booth type, and press next. Your booth type can be changed at any time by going to the System Diagnostics menu, and selecting Change Booth Type.

3. **Connect to a network**
   Connecting your booth to the internet allows you to get free software and content updates, and gives your users access to a host of extra free features using the Snapshot Companion app. If there are any issues connecting to the network, these will be easier to address using the Network Settings menu once the setup procedure is complete. You can always connect later.

4. **Select your time zone**
   Select the correct time zone for your location, using the up and down arrows to scroll through the options. This will ensure that your game history menus and reports will use the correct time. You can change the time zone or current time later by going to System Settings and selecting the Time and Date menu.

5. **Enter your email address**
   Entering your email address allows us to notify you when there are new software or content updates, and what you can expect to see change in your booth in each update.

6. **Setup automatic reports**
   Your Snapshot booth can automatically send you emails containing current audits, as well as warnings when the print media is running low. These settings can be changed later via a link in the report emails. If reports are turned off, you must perform the setup procedure again to turn them on.

7. **Enter your location**
   Entering an accurate location is important so that potential users can locate your Snapshot booth using the Snapshot Companion app. The more information you provide, the more accurate your location in the app will be. You can expect to see your location in the Snapshot app 24-48 hours after your booth registration is completed. LAI Games will contact you when your location is live in the app.

8. **Finished!**
   If you successfully connected to a network, your registration data will now be uploaded to the Snapshot server. If the data is unable to be uploaded immediately, it will automatically try to upload as soon as an internet connection is establish.
GAME SETTINGS

COIN SETTINGS

- **Coin 1 Number of Coins** (Default: 1, Adjustable: 1-20)
  The number of coins that need to be inserted into coin mechanism one, for each credit.

- **Coin 1 Games per Credits** (Default: 1, Adjustable: 1-20)
  The number of games for each credit inserted into coin mechanism one.

- **Common Coin** (Default: On, Adjustable: On/Off)
  This controls the dual coin system. When set to off, both coin systems are separate (double coin system), when set to on, both coin inputs will be combined and into a single accumulated pool. **Example:** This is often used with a DBA set on 25c pulses and 25c coin mech. **NOTE:** The value of both inputs needs to be the same.

- **Coin 2 Number of Coins** (Default: 1, Adjustable: 1-20)
  The number of coins that need to be inserted into coin mechanism two, for each credit.

- **Coin 2 Games per Credits** (Default: 1, Adjustable: 1-20)
  The number of games for each credit inserted into coin mechanism two.

- **Upsell Option** (Default: On, Adjustable: On/Off)
  Enable or disable the option to purchase extra prints at the end of a game.

- **Payment Method Prompt** (Default: Card, Adjustable: Card / Coin / Credit / Amount)
  Set the type of payment prompt that will appear during attract mode. If set to Insert Amount, the next two settings will become active.

- **Currency** (Default: Dollar $, Adjustable: Dollar $ / Rupiah Rp)
  Set the currency that the price per play label will display in.

- **Price** (Default: $1.00, Adjustable: $0.10 - $10.00 / Rp 1,000 – Rp 10,000)
  Set the price that will display in attract mode.
BONUS CREDITS

- **Level One** (Default: Off, Adjustable: On/Off)
  Defines if the first level of bonus credits is active or not.
  - **No. of Coins:** This sets the number of coins that need to be inserted into coin mechanism 1 to reach the bonus credit level 1.
  - **Bonus Credits:** This sets the number of bonus credits that are given when credit level 1 is reached. This is the number of bonus credits given, on top of what has been paid for.
  - **Total Credits:** This sets the total number of credits given when level 1 is reached.

- **Level Two** (Default: Off, Adjustable: On/Off)
  Defines if the second level of bonus credits is active or not.
  - **No. of Coins:** This sets the number of coins that need to be inserted into coin mechanism 1 to reach the bonus credit level 2.
  - **Bonus Credits:** This sets the number of bonus credits that are given when credit level 2 is reached. This is the number of bonus credits given, on top of what has been paid for.
  - **Total Credits:** This sets the total number of credits given when level 2 is reached.

- **Level Three** (Default: Off, Adjustable: On/Off)
  Defines if the third level of bonus credits is active or not.
  - **No. of Coins:** This sets the number of coins that need to be inserted into coin mechanism 1 to reach the bonus credit level 3.
  - **Bonus Credits:** This sets the number of bonus credits that are given when credit level 3 is reached. This is the number of bonus credits given, on top of what has been paid for.
  - **Total Credits:** This sets the total number of credits given when level 3 is reached.

FREE PLAY SETTINGS

- **Free Play Mode** (Default: Off, Adjustable: On/Off)
  Defines if the machine is running in free play mode.

- **Show Waiver** (Default: Off, Adjustable: On/Off)
  Defines if the attract mode shows a marketing waiver when in free play mode.

SOUND SETTINGS

- **Game Volume** (Default: 10, Adjustable: 1-10)
  The volume of the audio during gameplay.
EVENT SETTINGS

The Event Mode Settings menu displays important information on the right hand side. It displays if event mode is currently scheduled to begin at the event start time, as well as the event start and end time, and the total duration of the event in hours. It also shows how many prints have been printed during the current event time frame and in the previous event time frame.

- **Event Schedule** (Default: off, Adjustable: On/Off)
  Schedule the event mode settings to activate at the set event start time.

- **Start Time**
  Set the time that the event will start.

- **End Time**
  Set the time that the event will end.

- **Free Play** (Default: On, Adjustable: On/Off)
  Enable or disable free play during the event time frame.

- **Print Photos** (Default: On, Adjustable: On/Off)
  Enable or disable printing photos during the event time frame.

- **Limit Prints** (Default: On, Adjustable: On/Off)
  Limit the number of prints during the event time frame. Setting a print limit will cause the event to finish once the limit is reached, even if the event end time has not been reached.

- **Max Print Count** (Default: 500, Adjustable: 1-2000)
  The maximum amount of prints allowed during the event time frame. Note that extra photo copies count towards the max print count.

- **Extra Print Copies** (Default: 0, Adjustable: 0-3)
  The number of extra photo copies printed at the end of the game. Settings this to 1 extra print will give each player a total of 2 prints at the end of the game.

- **Internet Features** (Default: Off, Adjustable: Off/On)
  Enable or disable extra features dependent on an internet connection, such as Snapshot app log in functionality and marketing content. **An internet connection is needed for this feature.**

- **Lock Game Outside Event** (Default: On, Adjustable: On/Off)
  If enabled, the game will lock in attract mode outside of the event time frame. The game is not playable when locked in attract mode.
FOOTER LOGOS
Manage the footer logos that appear at the bottom of each print. View, delete and activate existing footer logos, or import new footer logos.

- **Save Photos** (Default: On, Adjustable: On/Off)
  Enable or disable printing the footer logo along the bottom of all photos.

- **IMPORT**
  Import new footer logo files from a USB. Files must be 1386 x 150 pixel sized PNG files located in the root directory of a USB (not within any folders). File name must be “watermark”.

VIEW FOOTER LOGOS
View all footer logos currently stored and choose a footer logo to set as active. Use the UP and DOWN buttons to scroll through logos, and press the red TEST button to set the selected footer logo as active.

DELETE FOOTER LOGOS
View and delete any footer logos currently stored. Use the UP and DOWN buttons to scroll through logos, and press the red TEST button to delete the selected footer logo.

- **Active Footer Logo**
  A shortcut to view and change the active footer logo. Press the red TEST button to select the setting, use the UP and DOWN buttons to scroll through available logos. Press the red TEST button again to set the currently visible footer logo as active.

MANAGE CONTENT
These menus can be used to manage any personalized content, seasonal content or custom modes that your Snapshot unit has.

ACTIVATE CONTENT
If no extra content is activated, all content displayed in Snapshot will be from the default content that comes with the game. Any personalized content that is activated via this menu will be displayed first, replacing some default content. Custom Modes need to be activated before they can be used in the Manage Modes menu.

The information on the right will show the name of the personalized content pack, the type of content it is (personalized content or custom mode), and how many pieces of content it contains.

MANAGE MODES
A maximum of three modes and a minimum of one mode can be activated at any time. The image on the right hand side of the screen acts as a preview of the mode select screen. The log in tile cannot be switched off. Note that a custom mode must be activated via the Activate Content menu before it can be used in the Manage Modes menu.

DELETE CONTENT
A maximum of five content packs can be stored at any time. The Delete Content menu can be used to delete content packs to make space for new ones.

IMPORT CONTENT
Once your content pack is located in the root directory of a USB device, plug it into your Snapshot booth, and the Import Content procedure will guide you through the import process step by step.
AUDITS

1. **Total Coins Mech 1**
   The total number of coin mech 1 pulses since the audits were last cleared

2. **Total Coins Mech 2**
   The total number of coin mech 2 pulses since the audits were last cleared

3. **Bonus Credits**
   The total number of bonus credits issued

4. **Service Credits**
   The total number of service credits issued since the audits were last cleared

5. **Credits Used**
   The total number of credits used

6. **Games Played**
   The total number of games played

7. **Classic Mode Percentage**
   The percentage of players that chose to play Classic Mode

8. **Filter Mode Percentage**
   The percentage of players that chose to play Filter and Decorate mode

9. **Masquerade Mode Percentage**
   The percentage of players that chose to play Masquerade Mode

10. **Average Game Time**
    The average amount of time, in seconds, one game lasts for

11. **Total Prints**
    The total number of prints

12. **Average Number of Prints Per Game**
    The average number of photos printer per game

13. **One Extra Print Percentage**
    The percentage of players that purchased one extra print

14. **Two Extra Prints Percentage**
    The percentage of players that purchased two extra prints

15. **Three Extra Prints Percentage**
    The percentage of players that purchased three extra prints

16. **Total Number of Extra Prints**
    The total number of extra prints that have been purchased

17. **Total Number of Extra Prints Percentage**
    The total percentage of players that have purchased at least one extra print

18. **Print Failures**
    The total number of failed prints

19. **Logged In Percentage**
    The percentage of game plays that have a user logged in

20. **Percentage of Photos Uploaded**
    The percentage of players that choose to upload their photos to the Snapshot server at the end of the game. Uploading photos requires an internet connection.
INPUT AND OUTPUT TESTS

LAMP TESTS

- **PHOTO SLOT LIGHT**  
  Test the photo slot light, located at the top of the print chute.

- **TOP CAMERA LIGHT**  
  Test the arrow lamp that points to the top camera, located directly beneath the top camera.

- **COUNTDOWN LIGHT 1**  
  Test the first countdown light, number one, located above the bottom camera.

- **COUNTDOWN LIGHT 2**  
  Test the second countdown light, number two, located in the center of the two cameras.

- **COUNTDOWN LIGHT 3**  
  Test the third countdown light, number three, located below the top camera.

- **BOTTOM CAMERA LIGHT**  
  Test the arrow lamp that points to the bottom camera, located directly above the bottom camera.

- **BOOTH LIGHTING 1**  
  Test the interior booth lighting by scaling up the brightness from one to ten.

- **BOOTH LIGHTING 2**  
  Test the interior booth lighting by scaling up the brightness from one to ten.

- **BOOTH LIGHTING 3**  
  Test the interior booth lighting by scaling up the brightness from one to ten.

- **RED / GREEN / BLUE RGB**  
  Test the RGB lighting by scaling up the brightness from one to ten.

INPUT TESTS

Test all the inputs on the cabinet. A cross in the checkbox indicates that the input is receiving a signal.

AUDIO TESTS

- **TEST INTERNAL SPEAKERS**  
  Play a voice over through the internal speakers.

- **TEST INTERNAL SPEAKERS**  
  Play a voice over through the external speakers.

GAME HISTORY

PHOTO UPLOAD QUEUE

This menu lists information about player photos that are queued to be uploaded. Hold down the utility button for 3 seconds with an entry selected to delete that photo upload.

**EMAIL**

The email address that the player entered in the booth. This email address must be valid for the user to receive their photos.

**GAME TIME**

The time the player started the game.

**UPLOADED**

How many photos have been uploaded.
**ACTION**
Select an upload and press the red SELECT button to use the action button of the selected upload. The Send Next action will move the selected upload to the next one in the queue.

**STATUS**
The status of the upload. Once a photo is successfully uploaded, it will appear in the Photos Uploaded menu.

**CANCEL UPLOADS**
This button will DELETE ALL pending photo uploads. Players will not receive their photos if they have been deleted from the upload queue. To remove a single upload from the queue, select it and hold down the utility button for 3 seconds.

**UPLOADED PHOTOS**

**EMAIL**
The email address that the player entered in the booth. This email address must be valid for the user to receive their photos.

**GAME TIME**
The time the photo was uploaded.

**ATTEMPTS**
The number of times the game tried to upload the photo and failed, before successfully uploading the photo. If the send attempts of photo uploads are consistently high, consider checking the stability of your internet connection. If using a wifi connection, a wired LAN connection might offer more stability.

**TIME SENT**
The time the photo was uploaded.

**PRINT HISTORY**
The print history menu can be used to view photos from previous games, as well as reprint them. Note that photos can only be reprinted in the same print layout that the player originally chose.

**GAME ID**
A unique game ID assigned to each Snapshot game. One game ID can have more than one print history item assigned to it.

**GAME MODE**
The game mode that the player selected at the beginning of the game. Note that if you have Internet Features turned on, players can access My Gallery mode, which is still counted as a Filter Mode game.

**GAME TIME**
The time that the player began their game.

**PRINTED**
Shows the result of the print. A failed print is represented by a cross, and a successful print is represented by a tick.

**ACTION**
Highlighting a print history item and pressing the red SELECT button will perform the action for that item. Reprint will reprint the photos, as displayed on the right hand side of the screen.

<td>Corrupt Audit Files</td>
<td>The game was switched off during a critical point in saving data.*</td>
<td>The game automatically recovers from this error, but please note that the audits will have been reset.</td>
</tr>
</tbody>
</table>

*Please note that in most cases, there will be no issues caused by switching a game off at any point during operation or from sudden power failures. Corrupted data errors will only occur if all data backups are corrupted simultaneously, which is highly unlikely.
CURRENT ERRORS
This menu lists information on all current/active errors. Further information on the error is provided in the information box on the left of the top screen. Use the UP and DOWN buttons to select an error, then press the red TEST button to attempt to clear it or be taken to the relevant menu for troubleshooting.

ERROR HISTORY
This section lists all errors, both current and already cleared. The type of error, date it occurred on and the date it was cleared on (if applicable) are listed.

ERROR SETTINGS
There are a number of ways the Snapshot 2 Studio cabinet can notify you that there is an error with the machine. These can be switched on or off in the operator menu by entering Errors and then Error Settings. The silent red lighting alert is the default setting. The error history can also be cleared by pressing the red TEST button with the clear error history option selected.

</table>

- **Hard Error When Print Media Empty** (Default: On, Adjustable: On/Off)
  Enabling this will cause the game to lock in attract mode when print media runs out. This will stop players from being able to play the game when there is no print media available.

- **Hard Error When Printer Errors** (Default: On, Adjustable: On/Off)
  Enabling this will cause the game to lock in attract mode when there is a printer error. This will stop players from being able to play the game when the printer has an error.

CLEAR ALL ERRORS
This button will clear all current errors as well as the error history.

PRINTERS INFORMATION
This page will show the name of the printer and how many prints are remaining on the bottom right hand of the screen.

- **Print Photos** (Default: On, Adjustable: On/Off)
  Enable or disable printing the players photo at the end of a game.

- **TEST PRINT**
  Perform a test print. If successful, this will clear any current printer errors.

- **RESET PRINTER DRIVERS**
  If a new printer has been installed or the printer not found error is appearing, reset the printer drivers and restart the cabinet. The game will automatically reinstall the printer drivers when the game is restarted.
SYSTEM SETTINGS

- **External Screen Side** (Default: Left Side, Adjustable: Left Side/Right Side)
  Set which side of the booth the external screen and printer are located on.

PHOTO STORAGE

- **Save Photos** (Default: On, Adjustable: On/Off)
  Enable or disable saving a digital copy of all the photos taken. NOTE: If you are saving your customers photos, please let them know.

- **Number of Photos Saved** (Default: 500, Adjustable: 1-1000)
  Set the maximum number of photos to save. When this limit is reached, old photos will be deleted to make space for new photos.

- **COPY PHOTOS**
  Copy all currently stored photos to a USB device.

- **DELETE PHOTOS**
  Delete all photos currently stored.

SCREEN CALIBRATION
This menu is used for calibrating the touch screen.

CAMERA ALIGNMENT
The currently highlighted camera will show a live feed on the right hand side of the screen. If the top and bottom cameras are not assigned correctly, use the Swap Camera Positions button to swap the position of the cameras. NOTE: Swapping the cameras will restart the game.

TIME AND DATE SETTINGS
Change the time zone, system time and date, and the format in which the time and date will be displayed in all menus. **An incorrect time zone or system time can cause issues when logging in with the Snapshot Companion App.**

LANGUAGE
Change the language of all in game text.

SOFTWARE UPDATES
The Software Updates menu lets you check if there are any game updates available and view the change log for previous updates.

**CHECK FOR UPDATES**
Manually check if an update is available. If automatic updates are enabled, this action will be performed automatically. The booth must be restarted to apply an update, and will take around an extra one minute to start up when applying the update.

**VIEW CHANGE LOG**
The change logs menu allows you to view a history of updates as well and available, unapplied updates. Applied updates will show a green tick next to the version number. Using the blue UP and DOWN buttons allows you to scroll through the list, and view the changes in each update on the right hand side of the screen.
**AUTOMATIC UPDATES**
If this setting is enabled, updates will be automatically downloaded and applied. The booth must be restarted to apply an update, and will take around an extra one minute to start up with applying the update.

**INSTALL UPDATE**
Manually download and install the latest update. The booth must be restarted to apply an update, and will take around an extra one minute to start up with applying the update.

**SETUP PROCEDURE**
The setup procedure can be run again at any point by selecting it in the System Settings menu. This will clear all the data entered in the previous setup procedure.

**SYSTEM DIAGNOSTICS**

**COPY LOGS**
Automatically copies a zip file onto a USB that contains all relevant game data. LAI Games support may request this file to assist in troubleshooting. A message will show on screen to notify you if the file has been copied successfully.

**UPLOAD LOGS**
Automatically uploads game logs to the Snapshot server. LAI Games support may request this file to assist in troubleshooting. A message will show on screen to notify you if the file has been uploaded successfully.

**CHANGE BOOTH TYPE**
This menu can be used to change the booth type. During normal operation it should not be necessary to change the booth type, as this setting is already configured before the booth is shipped.

**NETWORK SETTINGS**
To take advantage of the full set of Snapshot 2 Studio features, LAI Games strongly recommends that you connect your Snapshot 2 Studio booth to the internet. This allows players to access a host of extra features available when using the free Snapshot 2 Studio Companion app and highly incentivizes repeat plays.
The Network Settings menu can be used to connect to a wired or wireless network. On the right side of the menu, information for all currently connected adapters is shown. The Quixant comes with two Ethernet adapters installed. If you plug in your own network adapter, please wait a few seconds for the list to refresh.

**AUTOMATIC UPDATES**
One of the benefits of having your Snapshot 2 Studio booth connected to an internet connection is the automatic update feature. Whenever the game is turned on, it will automatically check with our server to see if there is an update patch available. If there is, it will download the patch in the background, causing no interruption to normal gameplay. Once the patch is downloaded, the next time the game is turned on it will take less than a minute to apply the patch. When the game finishes starting up, it will be running the latest software.
CONNECT TO A NETWORK

WIRED NETWORK
1. Plug an Ethernet cable into one of the two Ethernet ports on the Quixant.
2. Enter the operator menu and navigate to the Network Settings menu.
3. Select Connect to a Network.
4. Select the first option, “Wired Network.”
5. Press the red TEST button to connect to the selected network.
6. Wait for the software to confirm the connection.
7. You should now be connected to the internet. This can be confirmed by checking that the “Wired Network” label is now green and has a small “connected” label underneath it.
8. Press back to return to the Network Settings menu. The adapter being used should now have a green “Connected” status.

WIRELESS NETWORK
1. Enter the operator menu and navigate to the Network Settings menu.
2. Select Connect to a Network.
3. Allow the menu a few seconds to refresh, then select the wireless network you wish to connect to.
4. Press the red TEST button to connect to the selected network.
5. If a password is required, you will be prompted to enter it using the onscreen keyboard.
6. Wait for the software to confirm the connection.
7. You should now be connected to the internet. This can be confirmed by checking that the wireless network name you connected to is now green and has a small “connected” label underneath it.
8. Press back to return to the Network Settings menu. The adapter being used should now have a green “Connected” status.

TEST CONNECTION
To test the current network connection, select Test Connection and press the red TEST button. The software will attempt to connect to the internet.

- Internet Features (Default: Off, Adjustable: On/Off)
  Enable or disable extra features dependent on an internet connection, such as Snapshot app log in functionality and marketing content. This setting is off by default but will automatically be turned on if a network connection test succeeds. You must have an internet connection to your Snapshot booth for Internet Features to work.

VERIFY THE CONNECTION
Once a network connection has been established, test uploading a photo from the booth to confirm the system is functional.

LOG IN WITH THE APP
The Snapshot Companion app is available on both the Google Play Store and the iOS App Store. Download the app and log in. Go to the Booth Log in tab. On the booth, insert a credit and select the blue Log In tile (if the tile is grey, please return to the Network Settings menu and turn Internet Features on). Hold the QR code displayed in the app up to the bottom camera in the Snapshot booth. The tile will turn green to confirm that the log in has been successful. Play any mode, and the photos will be uploaded automatically to the app once the game has ended.
**UPLOAD A PHOTO TO A NEW ACCOUNT**
You don’t need the Snapshot Companion app to get a digital copy of your photos. Play any mode in Snapshot, and at the end of the game, when prompted, enter your email address (if the game never shows the registration screen, please return to the Network Settings menu and turn Internet Features on). The game will send an email containing a digital copy of your photos.

**TROUBLESHOOTING**

**LOGGING IN WITH THE APP**
The issue in this case could be with the app, the internet connection, or the Snapshot server. If the tile shows an orange error, the QR code is being detected as invalid for that account. If the error is red, the booth was unable to connect to the server to verify the QR code:

**Red Error**
- Use the Test Connection feature in Network Settings. The result of this test can help narrow down the issue.
  - *Server timed out*—This means that the Snapshot server is currently down, though the internet connection is active. We will be working on getting the server up and running ASAP.
  - *Server returned wrong content*—This means that something is interfering with the connection between the booth and the server. Most common causes are a firewall or a network setup that requires logging in through a webpage.
  - *Error*—The booth was unable to connect to the internet at all. If this error appears, test the connection a few times to confirm the result. If it consistently confirms an error, please check that your internet connection is working.
  - *Success*—The booth was able to connect to the server successfully. Try logging in again.

**Orange Error**
- The QR code on the app automatically refreshes itself for security purposes. This may have failed.
  - Log out of the app and log back in again. This will manually refresh the QR code.
  - Ensure the phone has a network connection. The phone needs an active network connection to refresh its QR code and to receive photos.

**UPLOADING PHOTOS TO A NEW ACCOUNT**
If you never received an email from the booth (check your spam, junk folders), the Game History menu can provide more information. See the Game History section of this manual for more information.

If photos are moving from the Photo Upload Queue to the Photos Uploaded menu regularly, then the system is working correctly. If photos have more than 1 or 2 attempts before succeeding, then your internet connection may be slow or unreliable.

If photos fail to upload, then there may be a problem with the network connection.
CREATING A BOOTABLE USB

THINGS YOU WILL NEED

- A completely empty USB that has a capacity of at least 4GB.
- NOTE: Everything on this USB will be COMPLETELY ERASED. Ensure that there are no important files on it.
- The downloaded game software file (this is an ISO file, for example, Snapshot2.4.iso).
- The program Rufus, free download from http://rufus.akeo.ie/

INSTRUCTIONS

1. Plug your empty USB into your personal computer. **NOTE:** Ensure you only have one USB device plugged into the computer, to guarantee that the wrong device is not accidentally wiped.
2. Run the program Rufus (the file should be called rufus_v1.3.4, though the numbers may vary).
3. Under the first option, Device, select your USB device from the drop down menu. **NOTE:** If your device is not listed in the drop down menu, click the white arrow button next to the heading Format Options. Under the new Advanced Options section, check the first check box. This enables “List fixed (non-flash) or unpartitioned USB disks.”
4. To the right of the option called Create a bootable disk using: there is a button with an image of a CD on it. Click this button.
5. Select your ISO file and click Open.
6. Ensure that all the check boxes and settings match the image to the right.
7. Click Start, and in the window that pops up, click OK. This process can take up to 5 minutes, depending on the size of the ISO file.
8. When the process is finished, DONE should show at the bottom of the Rufus window.
9. The bootable USB is now finished.
**UPDATING A CABINET USING A BOOTABLE USB**

1. Ensure that the cabinet is turned off.
2. Plug in the USB. Ensure that no other USB’s are plugged in.
3. Switch on the cabinet.
4. The operating system should boot straight into the USB, bringing up a black box that will display progress. This process will take around 20 minutes. The percentage at the bottom of the box will continue to update until it reaches 100%.

5. Once the process is finished, the last line of text in the black box will instruct you to remove the USB.

6. Remove the USB.
7. The cabinet will now automatically reboot.
8. Your game has successfully been updated.
SECTION A: SERVICE INSTRUCTIONS

*NOTE*
Be sure to read the following carefully before servicing the machine.

LOCATING AND ACCESSING PARTS
The following pictures identify the location of the main serviceable items.

CABINET REAR

- Upper Camera
- External Speakers
- Internal Speakers
- Lower Camera
- PCB Assembly
- Camera Indicator Lights
- External Monitor
- Internal Lighting
- Printer
- Power Supply 12VDC
- Mains Power Input
OPERATOR PANEL – SERVICE CONTROLS

- Utility Button
- Service / Back Button
- USB Port
- Counters x3
- Volume Dial
- Up Button
- Test / Enter Button
- Down Button

MONITOR CONTROLS

- Up Button
- Down Button
- Select Button
- Power Button
- Power LED
- Menu Button
- Auto Button
FUSES
Four fuses control the main circuits in the cabinet. Fuse F1 located near the power supply controls the booth lighting. Fuses F2 and F3 located near the power supply control the LCD monitors. Fuse F4 located on the PCB assembly board controls power to the audio amplifier.

PARTS DESCRIPTION

SPEAKERS
Four speakers are used for system sounds. Left audio channel is used for the two outside speakers and the right is used for the two inside speakers.

BOOTH LIGHTING
Three lighting channels are available to illuminate the booth. Brightness is controlled from the RGB controller with power applied via fuse F4.

EXTERNAL MONITOR
The external monitor shows the attract mode images. It can be installed on either left or right sides of the cabinet using existing electrical connections.

PRINTER
The printer aligns with the print door to dispense photos to the player. The printer can be installed on either the left or the right side of the cabinet. The printer door is easily removed and relocated to either side using existing electrical connections.

COUNTERS
Counters will increment for each coin input and each photo printed. All counters are under software control. COIN1/COIN2 counters are triggered by the coin mechanism inputs. PRINT OUT counter is triggered every time the print sensor is triggered.

BUTTONS
Press the green SERVICE/BACK button to issue a service credit from attract mode. Press the red TEST/ENTER button to enter the operator menu from attract mode. When in the operator menu, use all four buttons to navigate through the menu.

VOLUME KNOB
Use to adjust the speaker’s sound level.

POWER INLET/MAINS SWITCH
The power inlet is a standard IEC inlet socket with mains power switch, located at the rear of the machine. There is a main power fuse internal in this IEC socket. The fuse should be a M205, 250VAC, 3A.

* WARNING! *
ALWAYS turn OFF mains power and unplug the game before replacing any fuses, and ALWAYS use the correct rated fuse.
POWER SUPPLY
The power supply is located at the back of the cabinet, and is accessed via the rear service panel of the machine. It is a SP-320-12 12V 25A Universal AC input switching power supply. It can handle AC input from 100-240VAC at 50/60Hz. An adjustment screw is available for fine-tuning the output voltage.

LAMPS

* WARNING *
Always turn OFF mains power and unplug the game, before replacing any lamps.
Always replace the lamps with the same or equivalent size, wattage and voltage.

COIN DOOR LAMPS (LED)
The coin door lamps all are 12V/DC T10 LED or equivalent and can be accessed via the coin door.

BUTTON LAMPS (LED)
The button lamps all are 12V/DC T10 LED or equivalent and can be accessed by removing the operator panel.

BOOTH LIGHTING (LED)
Internal booth lighting is all white LED strip and can be accessed by removing the holder brackets behind the rear service panels. Always replace LED booth lighting strip with the same type as different lighting levels can dramatically affect photo quality.

MAINTENANCE

EXTERIOR
• Regularly dust and clean the external cabinet areas as required, using a soft water-damp cloth and mild soap.
• Check for blown bulbs and replace as required. Check all LED strips are functioning and repair as required.
• Check the monitor image is clear.
• Wipe the monitor clean with a soft damp cloth.

INTERIOR
• Regularly dust and vacuum the interior of the cabinet, taking care to remove any objects that may have fallen.
• Check and tighten all fixing hardware and fasteners as required.

* WARNING! *
Always turn OFF mains power and unplug the game before cleaning the interior of the machine.
SECTION B: TECHNICAL DETAILS

POWER SUPPLY
The single universal AC input power supply generates 12VDC for the entire machine. The green LED indicates powered operation.
The power supply output voltage should be 12VDC. It can be adjusted when necessary by turning the blue adjustment trimpot with a small Philips screwdriver.

It is advised that anybody using SECTION B for repairing or modifying any of the components of the game should be a qualified technician, having at least a basic knowledge of digital components, integrated circuits and electricity.
COIN OPTIONS REFERENCE GUIDE

By default, the coin door contains a micro switch connected to the COIN2 input for crediting the machine.

A 9 way Molex connector has been installed on the coin door which can be optionally used to make adaptors for most electronic coin systems and comparators. The following picture illustrates the connector pinout.

![Connector Pinout Image]

- Shell part number: Molex 03-09-1092
- Pins:
  - Molex 02-09-1119 (loose)
  - Molex 02-09-1117 (chain)

PIN1 = GND
PIN2 = COIN1 input
PIN3 = 12VDC
PIN7 = GND
PIN8 = COIN2 input
PIN9 = 12VDC

Contact your nearest LAI Games distributor for harnessing to suit different coin comparators and bill acceptors.

UNIVERSAL CARD LINK CONNECTION

A 9 pin Universal Card Link connector exists on the operator panel inside the coin door.

![Universal Card Link Image]

- Mating shell part number: Molex 9-pin housing: 03-09-2092
- Pins part number: Wire Gauge and Terminals: 02-09-2103 (14-20 gauge wire) or 02-09-2118 (18-22 gauge wire)

**Pin 1.** +12v - Supply to Card System.
**Pin 2.** Coin 1 - input to the game PCB.
**Pin 3.** Coin 2 - input to the game PCB.
**Pin 4.** Coin meter 1 - is connected to the coin meter 1 output from the game PCB and can be used by card systems for monitoring purposes.
**Pin 5.** Coin meter 2 - is connected to the coin meter 2 outputs from the game PCB and can be used by card systems for monitoring purposes.
**Pin 6.** Ticket Meter - is connected to the Ticket 1 Meter output from the game PCB and can be used by card systems for monitoring purposes.
**Pin 7.** Empty
**Pin 8.** Empty
**Pin 9.** Ground - is connected to the common Ground connection, the same ground as the Game PCB.
SECURITY DONGLE
A security dongle is required to be plugged in before the game will start and must remain plugged in at all times. If the dongle is missing, the game will not run, and the screen will remain black.

QUIXANT QXi-200
The front and rear panels as well as required connections are shown below.

SATA LED – flashes to indicate disk activity.
+3.3V – lights when internal power regulator is operating.
+12V – lights when the QXi-200 has power. Power supply must be between 8~14VDC to operate.
The rear panel contains connections for the FB182 IO PCB, power supply and speaker. All connections are required to be plugged in for proper operation.

J1, J2, J3, J4, J5 – connect to FB194.
PWR – Connects to the 12VDC power supply.

OPERATOR WILL TAKE NOTE

By accepting delivery of and placing this hardware and licensed software into operation, the Operator represents and warrants that it will only operate the hardware and licensed software provided by LAI Games in compliance with the regulatory requirements of the country, state, and/or municipality in which the hardware and licensed software are used and/or operated. LAI Games has provided this hardware and licensed the software **only** for legitimate and legal use, and any use of the hardware and licensed software in a manner that violates any laws of the country, state, and/or municipality in which the hardware and licensed software are used and/or operated is wholly unauthorized and shall be at Operator’s sole and complete risk.

Operator assumes any and all risk and liability for any civil or criminal legal claims or causes of action arising from the unauthorized use and/or operation of the provided hardware and licensed software, such improper and unauthorized use specifically including, but not limited to:

(a) Operating or allowing the operation of the hardware and licensed software in a manner that violates the laws and regulations of the country, state, and/or municipality in which the hardware and licensed software are used or operated;

(b) Assembling or causing the assembly of the hardware in a manner not authorized by or disclosed in this manual;

(c) Any tampering with, changes to, or modifications of the licensed software that occur after the software leaves LAI Games’ factory that is not made by authorized LAI Games personnel and that is directly or indirectly caused by Operator; and

(d) Any tampering with the computer chip/electronic programmable read only memory (EPROM) by or on behalf of Operator that directly or indirectly causes the tamper-indicating holographic seal on the computer chip/EPROM to be broken or damaged in any way.

LAI Games shall have no liability related to such improper and unauthorized use and/or operation of the hardware and licensed software, and Operator shall indemnify, defend, and hold LAI Games harmless for any claim or cause of action brought against LAI Games arising from Operator’s or Operator’s representative’s improper and unauthorized use and/or operation of the hardware and licensed software.

Any improper and unauthorized use shall completely and totally void any and all warranties, both express and implied, of the hardware and licensed software provided by LAI Games.
WARRANTY

LAI Games warrants its manufactured products for a period of 3 months inclusive of parts and labor from the date of sale.

LAI Games exclusive obligation is to repair any item with any defects as a result of faulty workmanship or materials, providing the defective item or items of equipment are returned to the LAI Games distributor from which the machine was purchased.

LAI Games shall have no obligation to make repairs necessitated by negligence or interference to any component by any unauthorized personal. This will automatically void any existing warranty.

IF MAKING A WARRANTY CLAIM:

(a) A Copy of the sales invoice must accompany the claim.

(b) To and from Transport and freight costs are not covered by the warranty.

(c) Warranty is not transferable with the sale of a machine from one owner to another.
