To ensure safe operation of the machine, be sure to read this Operation Manual before use.

Keep this Operation Manual in a safe place for quick access whenever needed.

The actual product may differ slightly from the illustrations in this manual.

The specifications of the machine and the contents of this operation manual are subject to change without prior notice due to product improvements.
Introduction

Thank you very much for purchasing MARIOKART ARCADE GP DX (referred to as the “machine” in this manual).

This Operation Manual describes:

- How to safely install, operate, move, transport, maintain and dispose of the machine.
- How to make full use of the machine’s functions and operate it correctly.
- How to ensure the safety of players and bystanders.

Contact for Machine and Machine Repair Inquiries

- For inquiries regarding the machine or machine repairs, contact your distributor.

The copyrights, trademarks and other rights used by the machine are noted at the end of this Operation Manual.
1. Safety Precautions – Be sure to read to ensure safe operation –

Instructions to the Owner

If you delegate the work for installing, operating, moving, transporting, maintaining or disposing the machine to other people, ensure that these people read the relevant sections of this operation manual carefully before starting work, and observe the corresponding precautions.

1-1 Levels of Risk

The safety and property damage precautions on the machine labels and in this Operation Manual are classified according to their risk level, as follows.

⚠️ WARNING : Failure to avoid these risks may result in serious injury or death

⚠️ CAUTION : Failure to avoid these risks may result in light injury or damage to other property

Notes about functionality that are not linked to safety are indicated with the following symbol.

⚠️ NOTICE : Information about product functions or protection

1-2 Definition of “Technician”

This Operation Manual is designed for arcade personnel. However, the sections marked “Must be performed by a technician” in the Table of Contents are written for technicians. These must be performed by technicians only.

Technician: A person involved in the design, manufacture, inspection, maintenance or service at an amusement device manufacturer, or a person involved routinely in the maintenance or management (such as repair) of amusement devices and has specialist knowledge of electricity, electronics or mechanical engineering equivalent to or higher than a technical high school graduate.
1-3 Critical Safety Precautions

**WARNING**

- Should an abnormality occur, turn off the power switch immediately to stop operations. Then, be sure to disconnect the power cord plug from the outlet. Operating the machine while the abnormality persists may result in a fire or accident.
- Sections of the LCD monitor remain at a high temperature and high voltage even after the power switch is turned off. To avoid electric shock or burns, be careful not to accidentally touch these sections.
- Dust accumulating on the power cord plug may cause a fire. Inspect the plug regularly and remove any dust.
- Fully insert the power cord plug into the outlet. Poor contact may generate heat and cause a fire or burns.
- Damage to the power cord may result in a fire, electric shock or electrical leakage. Be sure to observe the following.
  - Keep the power cord away from heaters.
  - Do not twist the power cord.
  - Do not forcibly bend the power cord.
  - Do not alter the power cord.
  - Do not bundle the power cord.
  - Do not pull the power cord. (Always unplug by holding the plug and not the power cord.)
  - Do not place objects on the power cord.
  - Do not allow the power cord to be caught between the machine and other devices or the wall.
  - Do not do anything else that might damage the power cord.
- Do not expose the power cord and power cord plug to water. It may result in electric shock or electrical leakage.
- Do not touch the power cord plug with wet hands. It may result in electric shock.
- The power capacity of the machine is AC 120 V (or AC 230 V), 3.2 A. To prevent fire and electric shock, use interior wiring that conforms to these power supply specifications.
- Use a power supply voltage range of AC 110 V to 130 V (or AC 230 V). Using a voltage outside this range may result in a fire or electric shock. However, to ensure that the machine operates in the optimum condition, keep the voltage at AC 120 V (or AC 230 V) as much as possible.
- To ensure safe use of the machine, be sure to perform the pre-operation inspection (see “7-2 Pre-operation Inspection” on page 20) and service (see “8B. Service” on page 59) described in this Operation Manual. Omitting these inspections or service may result in an accident.
- Use the consumables and service parts (including screws) that are specified by our company. To order parts, contact your distributor.
- Do not modify the machine without permission. Do not perform any operations that are not described in this Operation Manual. Modifying the machine may create unforeseen hazards.
- If you decide to transfer the ownership of this machine, be sure to provide this Operation Manual with the machine.
1-4 Machine Warning Labels

![Image of warning labels]

**WARNING**

- The warning labels contain important information for ensuring safety. Be sure to observe the following.
  - To ensure that the warning labels attached to the machine are always clearly visible, install the machine in an appropriate location with ample illumination, and keep the labels clean at all times. Make sure that the labels are not hidden by other game machines or objects.
  - Do not remove or alter the warning labels.
  - If a warning label becomes excessively dirty or damaged, replace it with a new one. To order warning labels, contact your distributor.

---

**WARNING**

- **SHOCK HAZARD**
- **Do Not Open.**
- **Refer Servicing to Service Personnel.**

---

**CAUTION**

- The seat moves forward and back, and may pinch your fingers or other items. Do not touch the gaps between the seat unit and the main base or surrounding areas.

- **Caution sticker Seat Slide (C)**
  - Part No.: 461-776

2. Specifications

(1) Rated power supply AC: 120 ± 10 V (50/60 Hz)/230 V ± 10 V (50/60 Hz)
(2) Rated power consumption: 570 W
(3) Maximum consumption current: 4.75 A/2.4 A
(4) Monitor: LCD monitor (42-inch)
(5) Dimensions when installed: Width (W) 40.476” × depth (D) 63” × height (H) 93.7”

103 cm  160 cm  238 cm
2. Specifications

Front assembly
Width (W) 40.476” × depth (D) 30.3” × height (H) 74.8”
103 cm 77 cm 190 cm

Seat assembly
Width (W) 22” × depth (D) 33.9” × height (H) 51.2”
56 cm 86 cm 130 cm

Signboard assembly
Width (W) 36.1” × depth (D) 12.3” × height (H) 22.4”
91.8 cm 31.2 cm 56.9 cm

(6) Weight
① When installed
 Approx. 506 lb 230 kg.
② When disassembled
 Front assembly  Approx. 402.6 lb 183 kg.
 Seat assembly  Approx. 96.8 lb 44 kg.
 Signboard assembly  Approx. 6.6 lb 3 kg.
3. Package Contents

- Make sure that all the items below are contained in the product package.
- If any items are missing, contact your distributor.

MEMO
4. Overall Structure (Part Names)

Front

- Title panel
- Signboard assembly
- LCD monitor
- Rainbow PC board (top cover)
- Control cover
- Steering assembly
- Rainbow PC board (monitor side)
- Pedal assembly
- Service door
- LED bar (S)
- Slide unit
- Rainbow PC board (seat)
- Seat assembly

Rear

- Rear door
- Level adjuster
- Level adjuster
- Cord box assembly
- Power cord
5. Delivery and Installation Conditions

**WARNING**

- Install the machine according to the instructions in this Operation Manual. If you do not follow these instructions, it may result in a fire, electric shock, injury or malfunction.
- Fully insert the power cord plug into the outlet. Poor contact may generate heat and cause a fire or burns.
- Be sure to install the ground wire. Failure to install the ground wire may result in electric shock in the event of electrical leakage. (See “8A-2-3 Connecting the Power Cord and Ground” on page 66.)
- Install the machine securely by using the level adjusters. Unstable machine installation may result in an accident or injury. (See “8A-1-2 Connecting the Front Assembly to the Seat Assembly and Level Adjuster Adjustment” on page 57.)

5-1 Installation Conditions

5-1-1 Installation Locations to Avoid

**WARNING**

- The machine is designed for indoor use. Never install the machine outside or in the following locations.
  - A location exposed to direct sunlight
  - A location exposed to rain or water leaks
  - A damp location
  - A dusty location
  - A location close to heaters
  - A hot location
  - An extremely cold location
  - A location exposed to condensation caused by temperature differences
  - A location that obstructs an emergency exit or fire extinguishing equipment
  - An unstable location or a location exposed to vibration
5-1-2 Play Zone for the Installed Machine

**CAUTION**

- Create a play zone around the machine so that the player does not make contact with bystanders or passersby.

**NOTICE**

- Keep 19.7” (50 cm) or more between the rear of the machine and the wall or other machines to enable the rear door to be removed for service.
- The room height must be 94.5” (240 cm) or more from the floor to the ceiling.

- When installing two or more machines, keep a gap of 3.9” (10 cm) or more between the machines.
  Example: Installing two machines
5-2 Required Dimensions for the Delivery Route (Such as Doors and Corridors)

The machine is disassembled at the time of shipment. The sizes of the main parts are as follows.

- Front assembly
  Width (W) 40.476” (103 cm.) x depth (D) 30.3” (77 cm.) x height (H) 74.8” (190 cm.) Weight 402.6 lb 183 Kg.

- Seat assembly
  Width (W) 22”(56 cm.) x depth (D) 33.9”(86 cm.) x height (H) 51.2”(130 cm) Weight 96.8 lb 44 kg
6. Moving and Transporting

**WARNING**

- Do not leave the machine on a slope. It may fall over or cause an accident.

6-1 Moving (On the Same Floor)

**WARNING**

- When moving the machine on the same floor, first separate the front assembly from the seat assembly.
  Failure to do this may result in floor damage, or the machine may block your view and result in a collision or other accident.
  (See “8A-1 Assembly” on page 55.)
- (See 6 in “8A-1-2 Connecting the Front Assembly to the Seat Assembly and Level Adjuster Adjustment” on page 57.)

**NOTICE**

- Move the machine carefully to avoid damaging it.
- The plastic areas are weak. Do not exert strong amounts of force on them.
- Even when moving the machine only a short distance, be sure to raise the level adjusters to their highest level.
  (See “8A-1-2 Connecting the Front Assembly to the Seat Assembly and Level Adjuster Adjustment” on page 57.)
- Be sure to turn the power off before performing these operations.
- Handle the power cord carefully. (See “8A-2-3 Connecting the Power Cord and Ground” on page 66.)
6-2 Transporting

6-2-1 Transporting Manually (Such as Carrying on Stairs)

**WARNING**

- Before transporting the machine manually, be sure to separate the front assembly, seat assembly and signboard assembly, and raise all the level adjusters to their highest level. (See “8A-1 Assembly” on page 55.) Transporting the machine (such as carrying it on stairs) while it is fully assembled may result in an accident.
- When transporting the machine manually, be sure to use the following number of people. Overburdening yourself may result in an accident or injury.
  - Front assembly (approx. 402.6 lb 183 kg): 8 people or more
  - Seat assembly (approx. 96.8 lb 44 kg): 2 people or more

- Do not subject the machine to impact while lowering it.

![Diagram of Front assembly and Seat assembly](image-url)
6-2-2 Transporting on a Vehicle

**WARNING**

- Before transporting the machine on a vehicle, be sure to separate the front assembly, seat assembly and signboard assembly, and raise all the level adjusters to their highest level. Transporting the machine while it is fully assembled may result in an accident.
- When using a fork lift to transport the machine, observe the following. Failure to observe the following instruction may result in an accident, such as the machine falling over.
  - Make sure that the machine is balanced properly during transportation.
- When transporting the machine manually, be sure to use the following number of people. Overburdening yourself may result in an accident or injury.
  - Front assembly (approx. 402.6 lb 183 kg) : 8 people or more
  - Seat assembly (approx. 96.8 lb 44 kg) : 2 people or more

![Diagram of front and seat assembly]

**NOTICE**

- Do not subject the machine to impact while lowering it.
### 7. Operation

#### WARNING

- Should an abnormality occur, turn off the power switch immediately to stop operations. Then, be sure to disconnect the power cord plug from the outlet. Operating the machine while the abnormality persists may result in a fire or accident.
- Dust accumulating on the power cord plug may cause a fire. Inspect the plug regularly and remove any dust.
- Fully insert the power cord plug into the outlet. Poor contact may generate heat and cause a fire or burns.
- Before operating the machine, be sure to check that installation has been performed according to the instructions and specified procedures (5. Delivery and Installation Conditions, page 13) in this Operation Manual. Failure to install the machine correctly may result in a fire, electric shock, injury or malfunction.
- The warning labels contain important information for ensuring safety. Be sure to observe the following.
  - To ensure that the warning labels attached to the machine are always clearly visible, install the machine in an appropriate location with ample illumination, and keep the labels clean at all times. Make sure that the labels are not hidden by other game machines or objects.
  - Do not remove or alter the warning labels.
  - If a warning label becomes excessively dirty or damaged, replace it with a new one.

To order warning labels, contact your distributor.

- To ensure safe use of the machine, be sure to perform the pre-operation inspection (see “7-2 Pre-operation Inspection” on page 20) and service (see “8B. Service” on page 69) described in this Operation Manual. Omitting these inspections or service may result in an accident.

### 7-1 Safety Precautions for Playing

#### CAUTION

- If players start feeling ill because of the game images or light stimulation, they must stop playing immediately.
- In rare cases, stimulation by lights or video images may cause the player to have a seizure or lose consciousness. If this happens, advise the player to consult a doctor as soon as possible. When pre-school children play, instruct their parents or guardians to observe them.
7-2 Pre-operation Inspection

Check the items below before starting machine operations.
If there is an abnormality, resolve it by referring to “8B-2 Troubleshooting” on page 70.

7-2-1 Safety Inspection (Before Power On)

⚠️ WARNING ⚠️

- Before operating the machine, perform “7-2-1 Safety Inspection (Before Power On)” on page 20.
  This is required to prevent accidents or injuries.
- Before operating the machine, check “5-1-1 Installation Locations to Avoid” on page 13. This is required to prevent accidents or injuries.
- Operating the machine while parts are broken, damaged or deteriorated, or while the installation is defective, may result in an injury to the player or a bystander. If you discover an abnormality, replace the affected part immediately. To order parts, contact your distributor.

1. Are all warning labels in place? (See “1-4 Machine Warning Labels” on page 3.)
2. Are all warning labels legible? (See “1-4 Machine Warning Labels” on page 3.)
3. Are all level adjusters adjusted properly? (See “8A-1-2 Connecting the Front Assembly to the Seat Assembly and Level Adjuster Adjustment” on page 57.)
4. Is the specified play zone provided? (See “5-1-2 Play Zone for the Installed Machine” on page 14.)
5. Are the power cord and communication cables laid out safely so they will not cause players or other customers to trip over them?
6. Is the power cord securely connected to the outlet and the cord box assembly on the bottom of the machine rear? (See “8A-2-3 Connecting the Power Cord and Ground” on page 66.)
7. Is the power cord plug free from dust? (See “8A-2-3 Connecting the Power Cord and Ground” on page 66.)
8. Are molded parts such as the seat assembly free from damage?

Inspect the following items after turning on the power switch. If you discover an abnormality, turn off the power switch immediately to stop operations. Then, disconnect the power cord plug from the outlet and contact your distributor.

9. Is any part of the power cord or plug abnormally hot?
10. Does touching the machine give a tingling electric shock?
11. Is there a burning smell, abnormal noise or vibration?
12. Is there any other abnormality, damage or malfunction?
7-2-2 Function Inspection (After Power On)

Check the following items in Test mode. (See “7-4-2 Adjustment Switches” on page 25.)

(1) Check the lamps. (Do the fluorescent lamp and Mario button light up?)
   (See “7-6-4 (b) LAMP TEST” on page 39.)
(2) Check the Mario button operation.
   (See “7-6-4 (a) SWITCH TEST” on page 37.)
(3) Check the steering operation.
   (See “7-6-4 (a) SWITCH TEST” on page 37.)
(4) Check the pedal operation.
   (See “7-6-4 (a) SWITCH TEST” on page 37.)
(5) Check the displayed images. (Does the monitor operate properly?)
   (See “7-6-5 Screen Adjustment (MONITOR TEST)” on page 41.)
(6) Check the audio. (Is sound produced by each speaker?)
   (See “7-6-6 Volume Adjustment (SOUND TEST)” on page 42.)
7-3 Playing the Game

⚠️ CAUTION ⚠️

- If you discover anyone behaving as follows, tell them to stop immediately. Such behavior may cause an accident.
  - Two people sitting on the machine at the same time.
  - A person other than the player touching the control parts (steering wheel).
- If players start feeling ill because the game images or light stimulation, they must stop playing immediately.
- In rare cases, stimulation by lights or video images may cause the player to have a seizure or lose consciousness. If this happens, advise the player to consult a doctor as soon as possible. When pre-school children play, instruct their parents or guardians to observe them.

■ Game Overview

- This action racing game allows communication-linked VS Race game play by up to four players. Players operate karts driven by game characters and participate in races. During a race players can use items to obstruct rival karts or power-up their own kart in order to gain advantages with the goal of ultimately winning the race.
- Three game modes are available to support game play by various numbers of players. These are the single-player GRAND PRIX mode, the Two Player CO-OP mode, and a VERSUS mode for two to four players (in case of two players this becomes Two Player VERSUS mode).

■ Flow when starting the game

- When a player inserts the required number of coins, the player’s entry in a VS Race is registered. At this time the displays of other communication-linked cabinets change to the VS Race entry screen and the game waits for other players to join. If other players insert the required number of coins within the time limit, a VS Race game is established. The game starts when VS Race entry is registered at all communication-linked cabinets or when the entry time limit counts down to “0”. (When there are no VS Race challengers, a single-player game starts.)
- After that the players select their characters, shoot facial photos, and make other selections, and then operation shifts to the respective game mode according to the number of players.

■ GRAND PRIX Mode (single-player game)

- In this mode the player competes in various Cup races consisting of distinctive courses such as the TOAD CUP or the MARIO CUP.
- All race opponents are played by the CPU (computer).
- Each Cup race consists of four rounds. Rounds 1 and 3 and Rounds 2 and 4 use the same courses, but the difficulty level differs.
- One game play consists of a single round.
- **Two Player CO-OP mode (two-player game)**
  - Two Player CO-OP mode can be selected when two players register to enter a game. Unlike a normal race, in this mode the two players form a team and compete against teams played by the CPU. The race results convert each player’s ranking into a point score, and the total points of the two players in each team are compared to determine the team rankings.
  - In Two Player CO-OP mode, players can use a special item called a Fusion Kart. When either player uses this item, the team member in the rear is instantly transported to the position of the team member in front, and the players’ karts fuse together to form a single large kart.
  - The gunner rotates the turret by operating the steering wheel, and can fire projectiles to attack rival karts by pressing the Item button.
  - The driver performs the same operations as normal to drive the kart.
  - In addition, in the Fusion Kart state, the player that used the item becomes the gunner and the other player becomes the driver.
  - When the two players of the player team drive within a certain closeness to each other, a Friendship shield is generated.
  - This shield lets players defend against attacks from CPU teams. (*The Friendship shield effect is not available to CPU teams.)*

- **VERSUS mode (2-player to 4-player game * In case of two players this is displayed as Two Player VERSUS mode.**
  - This mode allows players within the same venue to race against each other.
  - The course selection is decided by a majority vote. If two courses receive the same number of votes, the easier course is selected.

- **Auto-Accel function**
  - To enable children who are too small to reach the accelerator pedal to play the game, all modes feature an Auto-Accel function that automatically starts running the kart when the accelerator pedal is not pressed for one second or more.
  - The screen displays the message “Auto-Accel is on!” during auto acceleration.
  - If the accelerator pedal or the brake pedal is pressed, the Auto-Accel function is canceled.

- **Easy facial photos**
  - This product has a function that uses software to automatically recognize the position of the player’s face and align the frame with that position when taking the facial photo displayed during the race.
  - This lets players take photos without having to adjust their face position.
7-4 Explanation of the Power Switch and Adjustment Switches

7-4-1 Power Switch Position and Turning the Power Switch On

1. Turn on the power switch of the machine.

- Do not turn the power switch on and off repeatedly, because it may cause a machine malfunction.
7-4-2 Adjustment Switches

Open the service door for access to the adjustment switches.

(a) Service switch (red)
Press this button to increase the coin count without operating the coin counter.

(b) Select switch
In Test mode, flip this switch up or down to select an item or setting (value).

(c) Test switch
Turn this switch on to activate Test mode.
Test mode is used to test the monitor and other parts.

(d) Enter switch (red)
After selecting an item or setting (value) with the select switch, press this button to enter or execute the selection.
7-5 Flow during Game Startup

7-5-1 Self-test

The machine automatically executes a self-test after the power is turned on. When the power switch is turned on, the self-test screen appears on the monitor. If no problems are found, the display then changes to the title screen. If an abnormality is found, an error message is displayed on the monitor and the machine stops operating. When an error message is displayed, refer to “8B-2 Troubleshooting” on page 70 and cancel the error.

PLEASE DO NOT TOUCH THE STEERING WHEEL

[Self-test screen]

● Do not touch the steering wheel while the self-test is underway. If the steering wheel is moved, the machine may display an error message and stop operating.
7-5-2 Network Status Indication in the Title Screen

The NBLINE connection status is displayed in the title screen.

(a) **NBLINE connection status**

- **Online**: The machine is correctly connected to NBLINE.

- **Offline**: The machine is not connected to NBLINE. The game cannot be operated properly in this condition, so see “8B-3 (1) Network Errors” on page 73 and resolve the problem.

(b) **Display when game play includes credits added using the Service switch**

The color of the CREDIT(S) text displayed at the lower right of the title screen indicates whether game play includes credits added using the Service switch.

<table>

7-5-3 Software Update

**NOTICE**

- Once the software update preparations have started, do not turn off the power switch until the update is complete and the title screen appears on the monitor. Turning off the power partway through the update may corrupt the data on the HDD.

1. When software update data is found on the network server during the self-test, the machine displays the “PREPARING UPDATE” screen and downloads the update data. The machine restarts automatically when the download is complete.

![PREPARING UPDATE screen](image)

2. After the machine restarts, the “SOFTWARE UPDATE PREPARATION COMPLETE” screen appears. Press the Item button to start the update. The game cannot be started unless the software is updated.

![SOFTWARE UPDATE PREPARATION COMPLETE screen](image)
3. Press the Item button to start data expansion. When data expansion is complete, the machine automatically restarts and rewrites the data.

STARTING SOFTWARE UPDATE screen

4. After the update is complete, check the software revision number in the title screen.

- When an urgent update becomes necessary during operation, the message “Software update required” appears in the title screen. Follow the instructions on the screen, and turn the power switch off and then on again to update the software.
- When turning the power switch off and then on again, wait 30 seconds or more between operations to protect the electronic circuits.
7. Operation

7-5-4 Reload NBLINE POINTS Notification Screen

1. When the remaining NBLINE POINTS become low during operation, a message notifying that the points are low appears. Refer to “7-6-10 RELOAD NBLINE POINTS” on page 52 and reload the NBLINE POINTS.

Remaining NBLINE POINTS Low screen
7-6 Test Mode

7-6-1 MENU Screen

1. Use the supplied service key to open the service door.
2. When the Test switch is set to ON, the MENU screen appears on the monitor.
   (See “7-4-2 Adjustment Switches” on page 25.)
3. Flip the Select switch up and down to select the item.
   The selected item blinks.
4. Press the Enter switch to enter the selected item.
   When the selection is entered, the Test menu for that item appears.
5. After finishing all the adjustments, set the Test switch to Off. The display returns to
   the game screen.

To return to the I/O TEST screen, select EXIT and press the Enter switch.
(c) NAMCAM (CAMERA) TEST

This screen is used to adjust the facial recognition position of the NamCam (camera).

NAMCAM (CAMERA) TEST screen

- Adjust the cabinet installation position to enable facial recognition during gameplay.
  - Adjust the ambient lighting environment so that two or more frames appear around the player’s face (Facial Recognition Level 2 or 3) when sitting in the seat and facing the camera.
  - At minimum adjust so that at least one frame appears around the player’s face (Facial Recognition Level 1).
- When a Facial Recognition Level of 2 or more cannot be achieved, check the following points and adjust the environment.
  - Facial recognition may be difficult if there are bright lights around the seat or if bright light directly enters the camera lens.
  - Facial recognition may be difficult if it is too dark around the seat.
  - Facial recognition may be difficult if a bright light such as a spotlight directly shines on the player’s face.
  - When making the adjustment, do not wear sunglasses, a mask, or a cap, etc.

</tr>
</tbody>
</table>

To return to the NETWORK TEST screen, select EXIT and press the Enter switch.
7-6-8 Displaying Game Data (BOOKKEEPING)

This screen displays various game related data.

1. In the MENU screen, select BOOKKEEPING to display the BOOKKEEPING screen.
2. Flip the Select switch up and down to select the item. The selected item blinks.
3. Press the Enter switch to enter the selected item. The screen for the selected item appears.
4. After checking all the items, flip the Select switch up or down to select EXIT and press the Enter switch to return to the MENU screen.
7-6-9 OTHER OPTIONS

This screen displays various information such as the current time and software version, and is used to access the REFORMAT OPTIONS screen.

1. In the MENU screen, select OTHERS. The following screen appears.
2. Flip the Select switch up and down to select the item. The selected item blinks.
3. Press the Enter switch to enter the selected item. The screen for the selected item appears.
4. After checking all the items, flip the Select switch up or down to select EXIT and press the Enter switch to return to the MENU screen.

<table>

7-6-11 Adjustments after Parts Replacement (GO TO I/F INITIALIZE)

**NOTICE**

- Be sure to perform the following initialization process after replacing the game PC board, steering assembly interface or pedal assembly interface, or after initializing the backup data. The game will not play properly without performing this initialization.
- After initializing the analog interfaces, the SWITCH TEST screen (see “7-6-4 (a) SWITCH TEST” on page 37) appears. Make sure that OK is displayed on the screen when the steering wheel, accelerator pedal and brake pedal are operated.

1. Set the Test switch to ON and select I/O TEST in the MENU screen. (See “7-6-4 Input/Output Test of Switches (I/O TEST)” on page 36.)

2. In the I/O TEST screen, select GO TO I/F INITIALIZE. The following screen appears.

3. Set the steering wheel to the center position, release your hands from the steering wheel, and also release your feet from the accelerator and brake pedals. (* Initialization will not be completed successfully if the steering wheel or the accelerator or brake pedals are operated.)

4. In this condition, press the Enter switch. The analog interfaces will be initialized.

5. After the initialization is complete, the SWITCH TEST screen (see “7-6-4 (a) SWITCH TEST” on page 37) appears. Turn the steering wheel fully to the right and then fully to the left, and make sure that RIGHT OK and LEFT OK are displayed on the screen.

6. Fully depress the accelerator pedal, and make sure that OK is displayed on the screen for each.

7. Flip the Select switch up and press the Enter switch to return to the I/O TEST screen.

7-7 Daily Cleaning

- Do not use alcohol or other organic solvents. This may degrade the materials.

1. Wipe away any dirt with a dry soft cloth. When the machine becomes extremely dirty, wipe away the dirt using a soft cloth moistened with a neutral cleanser, then wipe lightly using a cloth dampened with a small amount of water, and finally wipe dry using a dry soft cloth.
8. Technician’s Manual — Must be performed by a technician —

8A. Installation and Assembly

8A-1. Assembly

8A-1-1 Installing the Signboard Assembly

WARNING

- The signboard assembly is installed while standing in a high location. Use a stool or similar platform. Working in an unnatural body posture may cause injury or machine damage.

1. On the top of the front assembly, install two torx bolts (M5 x 16) until the bolt heads protrude by approx. 0.1”.

2. Temporarily attach POP bracket (R) and POP bracket (L) to the torx bolts installed in step 1, and then fully tighten the POP brackets with the torx bolts installed in step 1 and two more torx bolts (M5 x 16).
3 Fasten the title panel with four torx bolts (M5 x 16).

4 To remove, perform the procedure in reverse.
8A-1-2 Connecting the Front Assembly to the Seat Assembly and Level Adjuster Adjustment

1. The joint brackets for the seat are shipped inside the front assembly as shown in the figure on the left. Loosen the bolt retaining the bracket, remove the bracket and rotate it so the narrow slot is facing forward (away from the seat) as shown in the figure on the right. Then tighten the bolt and add a second bolt from the spare parts kit as shown. For ease of installation, the bolts (M8 x 30 torx bolt) may be installed by hand leaving a gap slightly larger than thickness of the bracket and then the bracket can be installed by placing the large holes of the bracket over the bolts and then sliding the bracket as shown toward the player. Once in place tighten using a ratchet wrench.

2. Place the seat assembly near the front assembly, and pull out two connectors from inside the front assembly.

3. Pull out two connectors from inside the seat assembly, and connect them to the connector from step 2.
— Must be performed by a technician —

4 Insert the joint bracket into the seat assembly. While connecting these parts, be careful not to pinch the connectors or harness.

5 From the side surfaces of the seat assembly, fasten the seat assembly to the front assembly with two flat washers (ø9 x 30 x 2.3) on each side (four in total) and two torx bolts (M8 x 30) on each side (four in total).

6 Lower the level adjusters until the casters are at a height of approx. 0.2” (0.5 cm) from the floor. (Two on the front assembly and two on the seat assembly; four in total.)
8A-1-3 Inserting the USB Dongle

**WARNING**

- To avoid electric shock accident or injury to yourself or others as well as damage to the electronic circuitry, be sure to turn off the power switch before starting this task.

- The USB dongle is for use exclusively with this machine. Do not use it with other equipment. Do not insert other USB dongles into this machine. Doing so may cause the machine to malfunction.
- Be sure to turn off the power switch before inserting the USB dongle.

1. Remove the rear door. (See in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

![Diagram of a machine with a rear door, Torx bolt, and Service key (BACK).]
2. Insert the USB dongle into the USB slot of the game PC board (see the figure below).
8A-2. Connecting the Communication Cables

⚠️ WARNING ⚠️
- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the game cabinet power switch before starting work.
- Be careful not to let the cabinet sheet metal or other objects damage the cables extending from the bottom of the cabinet. It may result in fire or electric shock.

⚠️ CAUTION ⚠️
- Lay out the communication cables safely so that they will not cause players, bystanders or passersby to trip over them.

🔥 NOTICE 🔥
- Careless network system installation or other work makes networks susceptible to hacking, and can result in communication errors, lost data, and other trouble. In consideration of recovery when trouble occurs and hacking countermeasures, it is recommended to commission installation and other work to professionals.
- When laying communication cables on the floor, it is recommended to use commercially available cable molding to protect the cables.
- Failure to observe the following items may result in communication trouble and prevent proper game play. Be sure to connect the communication cables correctly according to the instructions.
  -Disconnected communication cables may result in communication trouble. When laying communication cables on the floor, be sure to arrange the cables so that passersby do not trip over them.
  - Do not bundle communication cables with power cords or pass them through the same cable moldings as power cords.
  - Install the communication cables with sufficient leeway so that they are not forcibly bent or stretched and there is no excessive load applied.
8A-2-1 Connection Diagrams

**WARNING**
- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the main power switch before starting work.

1. Refer to the figures below, and connect the supplied router and communication cables.
   - Be sure to connect the communication cables from the Game PC Board to the contents router to maintain a stable communication environment.
   - Up to four machines can be connected to a single contents router.
   - The connection work required for network communication differs according to the conditions of the installation location. Therefore, this Operation Manual describes an outline of the connections.
   - For inquiries regarding individual support at each installation location, contact your distributor.

(1) Example of connection.

![Connection Diagram](image)

- Set the PCB ID of each machine before performing communication-linked VS Race game play. The setting method is described in “8A-3 Setting the PCB ID” on page 68.
8A-2-2 Connection Method

1. Turn off the power switch. (See “8A-2-4 Power Switch Position and Turning the Power Switch On” on page 67.)

2. Remove the rear door. (See “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

3. Connect the communication cable (5 m) to the LAN port of the Game PC Board.
4 Position the communication cable (5 m) in the U-shaped cut-out on the lower panel, and return the rear door to its original position.

5 Attach the rear door.

6 Connect the power cord plug to the power supply jack and the communication cables (5 m) to the LAN ports of the supplied contents router.

7 Connect the communication cable (1 m) used for connection to the NBLINE router (the router connected to NBLINE) to the WAN port.
- Must be performed by a technician -

**NOTICE**

- Check the shape of the communication cable connectors and insert them with the proper alignment.
- Insert the communication cable connectors firmly. If a connector becomes loose, communication will not operate properly.
- Clamp the harnesses and communication cables with sufficient leeway so that they are not stretched and there is no excessive force applied.
8A-2-3 Connecting the Power Cord and Ground

**WARNING**

- Be sure to install the ground wire using one of the methods below.
- Failure to install the ground wire may result in electric shock.
- Connect the ground using a 3P plug.

1. Insert the socket side of the power cord into the power input of the cord box assembly on the bottom of the front assembly rear panel.

2. Insert the power plug of the power cord into the outlet.
8A-2-4 Power Switch Position and Turning the Power Switch On

1. Turn on the power switch of the machine.

**NOTICE**

- Be sure to turn the power switches on in the following order.
  1. Contents router
  2. This machine

  If the power is not turned on in this order, communication will not be performed correctly between the game server and the machine, and the game may not operate properly.

- Do not turn the power switch on and off repeatedly, because it may cause a machine malfunction.

- When turning the power switch off and on, wait 30 seconds or more between operations.
8A-3. Setting the PCB ID

When connecting two to four machines for communication-linked VS Race game play, make the following setting.

1. Use the supplied service key (FRONT) to open the service door.
2. When the Test switch is set to ON, the MENU screen appears on the monitor. (See “7-4-2 Adjustment Switches” on page 25.)
3. Flip the Select switch up or down to select GAME OPTIONS and press the Enter switch to display the GAME OPTIONS screen.

GAME OPTIONS screen

- Check that (a) NUMBER OF CONNECTED DRIVE UNITS matches the number of actually connected Driver Cabinets with the power turned on.
- Set (b) PCB ID to “1,” “2,” “3” and “4” in order from the leftmost Cabinet.
  * When more than one Driver Cabinet has the same PCB ID, an error message appears.
- Set the Test switch to OFF and close the service door.
8B. Service

**WARNING**
- To avoid electric shock, accidents or injuries to yourself or other people, be sure to turn off the power switch before performing service work (such as repairs or correcting malfunctions).

8B-1 Inspections and Service

**WARNING**
- Perform periodic service. Failure to perform service may result in an accident.
- Perform the inspections every day before starting operations. These are required to prevent accidents.
(See “7-2 Pre-operation Inspection” on page 20.)

8B-1-1 Inspection Items

After performing “7-2 Pre-operation Inspection” on page 20, check the following items periodically for any abnormalities.

(1) Level Adjuster Inspection

1. Check that the level adjusters are fixed securely. (See “8A-1-2 Connecting the Front Assembly to the Seat Assembly and Level Adjuster Adjustment” on page 57.)

(2) Power Cord Plug Inspection

1. Check that the power cord is firmly inserted into the machine’s cord box and the power outlet.
2. Clean any dust or other dirt from the connection parts.
3. Check for cracks or dirt on the power cord covering. If there is any abnormality on the power cord, be sure to replace it.

(3) Screw Looseness Inspection

Check the following parts for looseness. Fully retighten any loose parts.

1. Cap bolts (M6 x 30) for fastening the steering assembly
   (See “8B-4-1 (5) Replacing the Steering Assembly” on page 83.)
2. Torx bolts (M5 x 25) for fastening the pedal assembly
   (See “8B-4-3 (1) Removing and Installing the Pedal Assembly” on page 96.)
8B-2 Troubleshooting

⚠️ WARNING ⚠️

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.
- If the problem is not described in “8B-2 Troubleshooting” or the problem persists despite taking the appropriate action, turn off the power switch immediately to stop operations and contact your distributor. Continuing operations may result in an accident.

⚠️ NOTICE ⚠️

- If a malfunction occurs, first make sure that all the connectors are connected securely.
- Repair of the PC boards will be performed by your distributor, so never perform a continuity check of a board with a tester or any other tool. The IC may be damaged by the internal voltage of the tester.
- To order repairs or parts, contact your distributor.
- When sending parts for repair, be sure to pack them properly. Particularly when sending the Game PC Board, wrap the part in sponge or air bubble wrapping before packing it in a cardboard box. Make sure that the box is not exposed to outside pressure.

## 8B-3 Error Displays

When an error is detected at startup or during game play, an error screen appears and machine operation stops. Refer to the error code tables below to identify and resolve the cause of the error. When a screen not described in the error code tables appears or the error occurs again despite taking the appropriate action, something else may be causing the error. In these cases contact your distributor.

8B-4 Removing and Installing Assemblies and Parts

8B-4-1 Front Assembly

(1) Replacing the Rainbow PC Board (top cover)

⚠️ WARNING ⚠️

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

1. Remove the four torx bolts (M5 x 25) from the front of the front assembly, and then remove the top cover.

2. Replace the Rainbow PC Board.

3. To install, perform the procedure in reverse.
(2) Removing and Installing the Control Cover

**WARNING**
- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

1. Remove the two torx bolts (M5 x 25) from the front of the front assembly, and the six torx bolts (M5 x 25) from under the control cover.

2. While lifting up the control cover, remove it towards you. On the rear, disconnect and remove the two connectors of the Item button and Mario button.

3. To install, perform the procedure in reverse.

**NOTICE**
- When installing the control cover, be careful not to trap the harness.
(3) Replacing the Item Button, Mario Button and Lamps

The Item button is used as an example in the following procedure. Use the same procedure to replace the Mario button.

**WARNING**
- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

1. Remove the control cover. (See “8B-4-1 (2) Removing and Installing the Control Cover” on page 77.)

2. Turn the illuminated switch to the left to unlock it, and then remove it.

3. Pull out the lamp.

4. Replace the Item button and the lamp.

5. To install, perform the procedure in reverse.
   Use the same procedure to replace the Mario button.
   * The LED lamp has positive and negative polarity. Take care to position the lamp correctly during replacement.

**NOTICE**
- After completing the replacement, be sure to check the operation.
  (See “7-6-4 (a) SWITCH TEST” on page 37.)
(4) Replacing the LCD Monitor

**WARNING**
- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**CAUTION**
- The LCD monitor weighs approx. 22 lb (10 kg). Be very careful while working, because dropping it may cause injury.

1. Remove the two torx bolts (M5 x 30) from the rear of the front assembly, and then unlock the rear door with the service key (BACK) and remove it.

2. Remove the two connectors of the LCD monitor.
3. Remove the control cover. (See “8B-4-1 (2) Removing and Installing the Control Cover” on page 77.)

4. Remove the top cover. (See “8B-4-1 (1) Replacing the Rainbow PC Board (Top cover)” on page 76.)

5. Remove the three torx bolts (M5 x 25), disconnect the connector and then remove the monitor side BK (L). Remove the monitor side BK (R) in the same way.

6. Remove the three torx bolts (M5 x 25), and then remove the monitor stopper (lower).
7. Loosen the two torx bolts (M5 x 25) on the rear of the camera assembly, and then remove the monitor stopper (upper).

8. Lift up the monitor glass slightly, pull out the bottom side towards you and remove it.
9 Remove the four torx bolts (M5 x 25), and then remove the LCD monitor.

10 Remove the four Phillips pan head screws (M4 x 10), remove the LCD brackets and replace the LCD monitor.

11 To install, perform the procedure in reverse.
(5) Replacing the Steering Assembly

**WARNING**
- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**CAUTION**
- The steering assembly weighs approx. 26.5 lb (12 kg). Be very careful while working, because dropping it may cause injury.

1. Remove the rear door. (See 1 in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)
2. Remove the two connectors of the steering assembly.

3. Remove the control cover. (See “8B-4-1 (2) Removing and Installing the Control Cover” on page 77.)
4. Remove the two torx bolts (M5 x 25), and then remove the control panel under cover.
5 Remove the four cap bolts (M6 x 30) and the ground terminal, then slowly pull out the steering assembly and replace it.

6 To install, perform the procedure in reverse.

- After completing the replacement, be sure to initialize and check the operation. (See “7-6-11 Adjustments after Parts Replacement (GO TO I/F INITIALIZE)” on page 53 and “7-6-4 (a) SWITCH TEST” on page 37.)
(6) Replacing the Rainbow PC Board (monitor side)

There are six LEDs. The replacement of the top left LED is described below.

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

1. Remove the monitor side BK (L). (See 5 in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

2. Remove the four countersunk washer nuts (M4), and remove the monitor side LED BK (L).

3. Disconnect the connector, remove the two Phillips pan head screws (with spring washer) (M3 x 6), and remove the Rainbow PC Board.

4. To install, perform the procedure in reverse.

**NOTICE**

- After completing the replacement, be sure to check the operation. (See “7-6-4 (b) LAMP TEST” on page 39.)
(7) Replacing the Camera

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

1. Remove the top cover, monitor side cover (L) and monitor side cover (R).
   (See 1 in “8B-4-1 (1) Replacing the Rainbow PC Board (top cover)” on page 76.)

2. Disconnect the connector, remove the two Phillips pan head screws (with flat and spring washers) (M2 x 10), and remove the camera assembly.

3. To install, perform the procedure in reverse.

**NOTICE**

- After completing the replacement, be sure to check the operation.
  (See “7-4-6 (c) NAMCAM (CAMERA) TEST” on page 40.)
(8) Replacing the LED Bar (L)

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**NOTICE**

- The PC board is sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling the PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

1. Turn off the power switch. (See “8A-2-4 Power Switch Position and Turning the Power Switch On” on page 67.)

2. Remove the six torx bolts (M5 x 25), and remove the top acrylic.

3. Remove the two Phillips pan head screws (with flat and spring washers) (M4 x 8), disconnect the connector and replace the LED bar (L).

4. To install, perform the procedure in reverse.
8B-4-2 Front Assembly Rear Side

(1) Replacing the Game PC Board

**WARNING**
- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**CAUTION**
- The Game PC Board weighs approx. 17.6 lb (8 kg). Be very careful while working, because dropping it may cause injury.

1. Remove the rear door. (See 1 in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

2. Disconnect the nine connectors, remove the four countersunk washer nuts (M6), and remove the Game PC Board together with the rack base.
3 Turn over the Game PC Board. Remove the six Phillips pan head screws (with flat and spring washers) (M4 x 14), remove the rack base and replace the Game PC Board.

4 To install, perform the procedure in reverse.

- When sending a part for repair (Game PC Board), wrap it in sponge or bubble wrap before packing it in a cardboard box. Make sure that the box is not exposed to outside pressure.
- After completing the replacement, be sure to check the operation and initialize. (See “7-6 Test Mode” on page 31.)
— Must be performed by a technician —

**NOTICE**

- When installing, follow the indications on the game PC board, and connect the connectors correctly.

- Black
- Orange
- Yellow-green
(2) Replacing the STR4 (M) PC Board

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**NOTICE**

- To avoid damaging the electronic circuits, make sure that the connector direction is correct when connecting the connectors.
- The PC board is sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling the PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

1. Remove the rear door. (See 1 in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)
2. Disconnect the six connectors, remove the STR4 (M) PC board from the locking spacers, and replace it.
3. To install, perform the procedure in reverse.

**NOTICE**

- After completing the replacement, be sure to check the operation and initialize. (See “7-6-11 Adjustments after Parts Replacement (GO TO I/F INITIALIZE)” on page 53 and “7-6-4 (a) SWITCH TEST” on page 37.)
(3) Replacing the NA-JV (M) PC Board

**WARNING**
- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**NOTICE**
- To avoid damaging the electronic circuits, make sure that the connector direction is correct when connecting the connectors.
- The PC board is sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling the PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

1. Remove the rear door. (See 1 in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

2. Disconnect the four connectors, remove the NA-JV (M) PC board from the locking spacers, and replace it.

3. To install, perform the procedure in reverse.
(4) Replacing the Amp PC Board

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**NOTICE**

- To avoid damaging the electronic circuits, make sure that the connector direction is correct when connecting the connectors.
- The PC board is sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling the PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

1. Remove the rear door. (See in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

2. Disconnect the four connectors, remove the amp PC board from the locking spacers, and replace it.

3. To install, perform the procedure in reverse.
(5) Replacing the Switching Regulator (12 V)

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**NOTICE**

- To avoid damaging the electronic circuits, make sure that the connector direction is correct when connecting the connectors.
- The PC board is vulnerable to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling the PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

1. Turn off the power switch. (See “8A-2-4 Power Switch Position and Turning the Power Switch On” on page 67)

2. Remove the rear door. (See 1 in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

3. Remove the eight screws, disconnect the ring terminals from the regulator, remove the two Phillips pan head screws (with flat and spring washers M4 x 12), and replace the switching regulator (12 V).

4. To install, perform the procedure in reverse. Refer to the figure above for the ring terminal connection locations.

**NOTICE**

- When connecting the ring terminals, check the harness colors and contact conditions carefully to avoid damaging the electronic circuits.
(6) Replacing the Fuse

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.
- Never use a fuse other than the specified fuse (250 V 5 A), because it may cause a fire. A fuse is required to prevent a fire or accident. To order a fuse, contact your distributor.

1. Remove the rear door. (See 1 in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

2. Replace the fuse (5 A SB).

3. To install, perform the procedure in reverse.
8B-4-3 Pedal Assembly

1. Remove the rear door. (See 1 in “8B-4-1 (4) Replacing the LCD Monitor” on page 79.)

2. Disconnect the connector.

3. Remove the four torx bolts (M5 x 25), and then slowly remove the pedal assembly.

4. To install, perform the procedure in reverse.

- After completing the replacement, be sure to check the operation and initialize. (See “7-6-11 Adjustments after Parts Replacement (GO TO I/F INITIALIZE)” on page 53 and “7-6-4 (a) SWITCH TEST” on page 37.)
8B-4-4 Seat Assembly

(1) Replacing the Slide Unit

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.
- The slide unit and seat weigh approx. 33.1 lb. When laying down and removing the slide unit and seat, there is a danger of trapping your hands or an object. Make sure there is no one in the surrounding area.

1. Remove the six Phillips pan head screws (M5 x 25), remove the under cover. Then remove the 10 flange socket bolts (M6 x 30) to remove the seat slide assembly.

![Diagram of Seat Assembly](image)

2. Remove the four flange socket bolts (M8 x 40), and replace the slide unit.

![Diagram of Slide Unit](image)

3. To install, perform the procedure in reverse.
(2) Replacing the LED Bar (S)

This machine uses two LED bars (S). Refer to the procedure below, and replace the LED bar (S) that corresponds to the malfunction location.

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**NOTICE**

- The PC board is sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling the PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

1. Turn off the power switch. (See “8A-2-4 Power Switch Position and Turning the Power Switch On” on page 67.)

2. Remove the eight button head bolts (M4 x 8) and eight flat washers (M4), and remove the seat back cover.

![Diagram of seat back cover with labeled parts: Seat back cover, Flat washer (M4), Button head bolt (M4 x 8).]
3. Disconnect the two connectors, remove the four Phillips tap-in binding screws (M4 x 8), and remove the seat LED bracket.

4. Remove the cord clip and the two Phillips pan head screws (with flat and spring washers) (M4 x 8), and remove the LED bar (S).

5. To install, perform the procedure in reverse.
Install the LED bar (S) so that the light emitters face the direction shown in the figure below. (When installing, the light emitters face toward the inside.)

When installing, take care to press the LED Bar (S) all the way into the guide in the center of the LED tube cap (L) so that it will not come loose.
(3) Replacing the Rainbow PC Board (seat)

This machine uses two Rainbow PC Board (seat). Refer to the procedure below, and replace the Rainbow PC Board (seat) that corresponds to the malfunction location.

**WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

**NOTICE**

- The PC board is sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling the PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

1. Turn off the power switch. (See “8A-2-4 Power Switch Position and Turning the Power Switch On” on page 67.)

2. Remove the two torx bolts (M5 x 25), and remove the Tail Lamp Panel.

3. Remove the connector.

![Diagram of Rainbow PC Board (seat)](image-url)
— Must be performed by a technician —

4 Disconnect the connector, remove the two Phillips pan head screws (with spring washer) (M3 x 6), and remove the Rainbow PC Board.

5 To install, perform the procedure in reverse.
9. Disposal

⚠️ WARNING ⚠️

- When disposing of the machine, follow the applicable regulations for collection, transportation and disposal.
- When delegating the collection, transportation and disposal of the machine, be sure to delegate to specialists in each field.

OpenSSL 1.0.1c
This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/)

LICENSE ISSUES
========

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

OpenSSL License
---------------------

/* ===================================================================

MICROSOFT SOFTWARE LICENSE TERMS

WINDOWS EMBEDDED STANDARD 7

These license terms are an agreement between you and NAMCO BANDAI Games Inc. ("NBGI"). Please read them. They apply to the software included on this device. The software also includes any separate media on which you received the software.

The software on this device includes software licensed from Microsoft Corporation or its affiliate. The terms also apply to any Microsoft updates, supplements, Internet-based services, and support services for this software, unless other terms accompany those items. If so, those terms apply.

If you obtain updates or supplements directly from Microsoft, then Microsoft, and not NBGI, licenses those to you.

As described below, using the software also operates as your consent to the transmission of certain computer information for Internet-based services.

By using the software, you accept these terms. If you do not accept them, do not use the software. Instead, contact NBGI to determine its return policy for a refund or credit.

If you comply with these license terms, you have the rights below.

1. USE RIGHTS
   Use. The software license is permanently assigned to the device with which you acquired the software. You may use the software on the device.

2. ADDITIONAL LICENSING REQUIREMENTS AND/OR USE RIGHTS
   a. Specific Use. NBGI designed the device for a specific use. You may only use the software for that use.
   b. Other Software. You may use other programs with the software as long as the other programs directly support the manufacturer’s specific use for the device, or provide system utilities, resource management, or anti-virus or similar protection. Software that provides consumer or business tasks or processes may not be run on the device. This includes email, word processing, spreadsheet, database, scheduling and personal finance software. The device may use terminal services protocols to access such software running on a server.
   c. Device Connections. You may not use the software as server software. In other words, more than one device may not access, display, run, share or use the software at the same time. You may use terminal services protocols to connect the device to a server running business task or processes software such as email, word processing, scheduling or spreadsheets. You may allow up to ten other devices to access the software to use File Services, Print Services, Internet Information Services, and Internet Connection Sharing and Telephony Services.

The ten connection limit applies to devices that access the software indirectly through "multiplexing" or other software or hardware that pools connections. You may use unlimited inbound connections at any time via TCP/IP.
d. Remote Access Technologies. You may access and use the software remotely from another device using remote access technologies as follows.
Remote Desktop. The single primary user of the device may access a session from any other device using Remote Desktop or similar technologies. A “session” means the experience of interacting with the software, directly or indirectly, through any combination of input, output and display peripherals. Other users may access a session from any device using these technologies, if the remote device is separately licensed to run the software.
Other Access Technologies. You may use Remote Assistance or similar technologies to share an active session.
Other Remote Uses. You may allow any number of devices to access the software for purposes other than those described in the Device Connections and Remote Access Technologies sections above, such as to synchronize data between devices.
e. Font Components. While the software is running, you may use its fonts to display and print content. You may only
  • embed fonts in content as permitted by the embedding restrictions in the fonts; and
  • temporarily download them to a printer or other output device to print content.
f. Icons, images and sounds. While the software is running, you may use but not share its icons, images, sounds, and media.

3. VHD BOOT. Additional copies of the software created using the software’s Virtual Hard Disk functionality (“VHD Image”) may be pre-installed on the physical hard disk of the device. These VHD Images may only be used for maintaining or updating the software installed on the physical hard disk or drive. If the VHD Image is the only software on your device, it may be used as the primary operating system but all other copies of the VHD Image may only be used for maintenance and updating.

4. POTENTIALLY UNWANTED SOFTWARE. The software may include Windows Defender. If Windows Defender is turned on, it will search this device for “spyware,” “adware” and other potentially unwanted software. If it finds potentially unwanted software, the software will ask you if you want to ignore, disable (quarantine) or remove it. Any potentially unwanted software rated “high” or “severe,” will be automatically removed after scanning unless you change the default setting. Removing or disabling potentially unwanted software may result in
  • Other software on your device ceasing to work, or
  • Your breaching a license to use other software on this device
By using this software, it is possible that you will also remove or disable software that is not potentially unwanted software.

5. SCOPE OF LICENSE. The software is licensed, not sold. This agreement only gives you some rights to use the software. NBGI and Microsoft reserve all other rights. Unless applicable law gives you more rights despite this limitation, you may use the software only as expressly permitted in this agreement. In doing so, you must comply with any technical limitations in the software that allow you to use it only in certain ways. For more information, see the software documentation or contact NBGI. You may not:
  • work around any technical limitations in the software;
  • reverse engineer, decompile or disassemble the software;
  • make more copies of the software than specified in this agreement;
  • publish the software for others to copy;
  • rent, lease or lend the software; or
  • use the software for commercial software hosting services.
Except as expressly provided in this agreement, rights to access the software on this device do not give you any right to implement Microsoft patents or other Microsoft intellectual property in software or devices that access this device.
6. **INTERNET-BASED SERVICES.** Microsoft provides Internet-based services with the software. Microsoft may change or cancel them at any time.

   a. **Consent for Internet-Based Services.** The device may contain one or more of the software features described below. These features connect to Microsoft or service provider computer systems over the Internet. In some cases, you will not receive a separate notice when they connect. For more information about these features, visit go.microsoft.com/fwlink/?linkid=104604.

   **By using these features, you consent to the transmission of this information.** Microsoft does not use the information to identify or contact you.

   **Computer Information.** The following features use Internet protocols, which send to the appropriate systems computer information, such as your Internet protocol address, the type of operating system and browser, the name and version of the software you are using, and the language code of the device where you installed the software. Microsoft uses this information to make the Internet-based services available to you. NBGI has elected to turn on the following features on the device:

   - **Plug and Play and Plug and Play Extensions.** You may connect new hardware to your device. Your device may not have the drivers needed to communicate with that hardware. If so, the update feature of the software can obtain the correct driver from Microsoft and install it on your device.

   - **Web Content Features.** Features in the software can retrieve related content from Microsoft and provide it to you. Examples of these features are clip art, templates, online training, online assistance and Appshelp. You may choose to switch them off or not use them.

   - **Digital Certificates.** The software uses x.509 version 3 digital certificates. These digital certificates confirm the identity of user sending information to each other and allow you to encrypt the information. The software retrieves certificates and updates certificate revocation lists over the Internet.

   - **Auto Root Update.** The Auto Root Update feature updates the list of trusted certificate authorities. You can switch off this feature.

   - **Windows Media Digital Rights Management.** Content owners use Windows Media digital rights management technology (WMDRM) to protect their intellectual property, including copyrights. This software and third party software use WMDRM to play and copy WMDRM-protected content. If the software fails to protect the content, content owners may ask Microsoft to revoke the software's ability to use WMDRM to play or copy protected content. Revocation does not affect other content. When you download licenses for protected content, you agree that Microsoft may include a revocation list with the licenses. Content owners may require you to upgrade WMDRM to access their content. Microsoft software that includes WMDRM will ask for your consent prior to the upgrade. If you decline an upgrade, you will not be able to access content that requires the upgrade. You may switch off WMDRM features that access the Internet. When these features are off, you can still play content for which you have a valid license.

   - **Windows Media Player.** When you use Windows Media Player, it checks with Microsoft for

     - compatible online music services in your region;
     - new versions of the player; and
     - codecs if your device does not have the correct ones for playing content.

   You can switch off this feature. For more information, go to: go.microsoft.com/fwlink/?Linkid=51331.
• Malicious Software Removal/Clean On Upgrade. Before installation of the software, the software will check and remove certain malicious software listed at www.support.microsoft.com/?kbid=890830 ("Malware") from your device. When the software checks your device for Malware, a report will be sent to Microsoft about any Malware detected or errors that occurred while the software was checking for Malware. No information that can be used to identify you is included in the report. You may disable the software’s Malware reporting functionality by following the instructions found at www.support.microsoft.com/?kbid=890830.

• Network Awareness. This feature determines whether a system is connected to a network by either passive monitoring of network traffic or active DNS or HTTP queries. The query only transfers standard TCP/IP or DNS information for routing purposes. You can switch off the active query feature through a registry setting.

• Windows Time Service. This service synchronizes with www.time.windows.com once a week to provide your device with the correct time. The connection uses standard NTP protocol.

• Search Suggestions Service. In Internet Explorer, when you type a search query in the Instant Search box or type a question mark (?) before your search term in the Address bar, you will see search suggestions as you type (if supported by your search provider). Everything you type in the Instant Search box or in the Address bar when preceded by a question mark (?) is sent to your search provider as you type. Also, when you press Enter or click the Search button, the text in the Instant Search box or Address bar is sent to the search provider. If you use a Microsoft search provider, use of the information sent is subject to the Microsoft Online Privacy Statement. This statement is available at go.microsoft.com/fwlink/?linkid=31493. If you use a third-party search provider, use of the information sent will be subject to the third party’s privacy practices. You can turn search suggestions off at any time. To do so, use Manage Add-ons under the Tools button in Internet Explorer. For more information about the search suggestions service, see go.microsoft.com/fwlink/?linkid=128106.

• Consent to Update Infrared Emitter/Receiver. The software may contain technology to ensure the proper functioning of the infrared emitter/receiver device shipped with certain Media Center-based products. You agree that the software may update the firmware of this device.

• Media Center Online Promotions. If you use Media Center features of the software to access Internet-based content or other Internet-based services, such services may obtain the following information from the software to enable you to receive, accept and use certain promotional offers:
  • certain device information, such as your Internet protocol address, the type of operating system and browser you are using, and the name and version of the software you are using,
  • the requested content, and
  • the language code of the device where you installed the software.

• Your use of the Media Center features to connect to those services serves as your consent to the collection and use of such information.

• Media Playback Updates. The software on the device may include media playback features which receives updates directly from the MSCORP Media Playback Update servers. If activated by your manufacturer, these updates will be downloaded and installed without further notice to you. The manufacturer is responsible for ensuring these updates work on your device.
Windows Update Agent. The software on the device includes Windows Update Agent ("WUA"). This feature enables your device to access Windows Updates either directly from MSCORP Windows Update server or from a server installed with the required server component and from the Microsoft Windows Update server. To enable the proper functioning of the Windows Update service in the software (if you use it) updates or downloads to the Windows Update service will be required from time to time and downloaded and installed without further notice to you. Without limiting any other disclaimer in these license terms or any license terms accompanying a Windows Update, you acknowledge and agree that no warranty is provided by Microsoft Corporation or their affiliates with respect to any Windows Update that you install or attempt to install on your device.

b. Use of Information. Microsoft may use the device information, error reports, and Malware reports to improve our software and services. We may also share it with others, such as hardware and software vendors. They may use the information to improve how their products run with Microsoft software.

c. Misuse of Internet-based Services. You may not use these services in any way that could harm them or impair anyone else’s use of them. You may not use the services to try to gain unauthorized access to any service, data, account or network by any means.

7. PRODUCT SUPPORT. Contact NBGI for support options. Refer to the support number provided with the device.

8. MICROSOFT .NET BENCHMARK TESTING. The software includes one or more components of the .NET Framework (".NET Components"). You may conduct internal benchmark testing of those components. You may disclose the results of any benchmark test of those components, provided that you comply with the conditions set forth at go.microsoft.com/fwlink/?LinkId=66406. Notwithstanding any other agreement you may have with Microsoft, if you disclose such benchmark test results, Microsoft shall have the right to disclose the results of benchmark tests it conducts of your products that compete with the applicable .NET Component, provided it complies with the same conditions set forth at go.microsoft.com/fwlink/?LinkId=66406.

9. BACKUP COPY. You may make one backup copy of the software. You may use it only to reinstall the software on the device.

10. DOCUMENTATION. Any person that has valid access to your device or internal network may copy and use the documentation for your internal, reference purposes.

11. PROOF OF LICENSE. If you acquired the software on the device, or on a disc or other media, a genuine Certificate of Authenticity label with a genuine copy of the software identifies licensed software. To be valid, this label must be affixed to the device, or included on or in NBGI’s software packaging. If you receive the label separately, it is not valid. You should keep the label on the device or packaging to prove that you are licensed to use the software. To identify genuine Microsoft software, see http://www.howtotel.com.

12. TRANSFER TO A THIRD PARTY. You may transfer the software only with the device, the Certificate of Authenticity label, and these license terms directly to a third party. Before the transfer, that party must agree that these license terms apply to the transfer and use of the software. You may not retain any copies of the software including the backup copy.
13. NOTICE ABOUT THE H.264/AVC VISUAL STANDARD, THE VC-1 VIDEO STANDARD, THE MPEG-4 VISUAL STANDARD AND THE MPEG-2 VIDEO STANDARD. This software may include H.264/AVC, VC-1, MPEG-4 Part 2, and MPEG-2 visual compression technology. If the software includes those visual compression technologies MPEG LA, L.L.C. requires this notice:

THIS PRODUCT IS LICENSED UNDER ONE OR MORE VIDEO PATENT PORTFOLIO LICENSES SUCH AS, AND WITHOUT LIMITATION, THE AVC, THE VC-1, THE MPEG-4 PART 2 VISUAL, AND THE MPEG 2 VIDEO PATENT PORTFOLIO LICENSES FOR THE PERSONAL AND NON-COMMERCIAL USE OF A CONSUMER TO (i) ENCODE VIDEO IN COMPLIANCE WITH THE ABOVE STANDARDS (“VIDEO STANDARDS”) AND/OR (ii) DECODE VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL AND NON-COMMERCIAL ACTIVITY OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE VIDEO UNDER SUCH PATENT PORTFOLIO LICENSES. NONE OF THE LICENSES EXTEND TO ANY OTHER PRODUCT REGARDLESS OF WHETHER SUCH PRODUCT IS INCLUDED WITH THIS PRODUCT IN A SINGLE ARTICLE. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE WWW.MPEGLA.COM.

14. NOTICE ABOUT THE MP3 AUDIO STANDARD. This software includes MP3 audio encoding and decoding technology as defined by ISO/IEC 11172-3 and ISO/IEC 13818-3. It is not licensed for any implementation or distribution in any commercial product or service.

15. NOT FAULT TOLERANT. The software is not fault tolerant. NBGI installed the software on the device and is responsible for how it operates on the device.

16. RESTRICTED USE. The Microsoft software was designed for systems that do not require fail-safe performance. You may not use the Microsoft software in any device or system in which a malfunction of the software would result in foreseeable risk of injury or death to any person. This includes operation of nuclear facilities, aircraft navigation or communication systems and air traffic control.

17. NO WARRANTIES FOR THE SOFTWARE. The software is provided “as is”. You bear all risks of using it. Microsoft gives no express warranties, guarantees or conditions. Any warranties you receive regarding the device or the software do not originate from, and are not binding on, Microsoft or its affiliates. When allowed by your local laws, NBGI and Microsoft exclude implied warranties of merchantability, fitness for a particular purpose and non-infringement.

18. LIABILITY LIMITATIONS. You can recover from Microsoft and its affiliates only direct damages up to two hundred fifty U.S. Dollars (U.S. $250.00). You cannot recover any other damages, including consequential, lost profits, special, indirect or incidental damages. This limitation applies to:

- anything related to the software, services, content (including code) on third party internet sites, or third party programs, and
- claims for breach of contract, breach of warranty, guarantee or condition, strict liability, negligence, or other tort to the extent permitted by applicable law.

It also applies even if Microsoft should have been aware of the possibility of the damages. The above limitation may not apply to you because your country may not allow the exclusion or limitation of incidental, consequential or other damages.

19. EXPORT RESTRICTIONS. The software is subject to United States export laws and regulations. You must comply with all domestic and international export laws and regulations that apply to the software. These laws include restrictions on destinations, end users and end use. For additional information, see www.microsoft.com/exporting.

20. ENTIRE AGREEMENT. This agreement, additional terms (including any printed-paper license terms that accompany the software and may modify or replace some or all of these terms), and the terms for supplements, updates, Internet-based services and support services that you use, are the entire agreement for the software and support services.
21. APPLICABLE LAW
   a. United States. If you acquired the software in the United States, Washington state law governs the
      interpretation of this agreement and applies to claims for breach of it, regardless of conflict of laws
      principles. The laws of the state where you live govern all other claims, including claims under state
      consumer protection laws, unfair competition laws, and in tort.
   b. Outside the United States. If you acquired the software in any other country, the laws of that
      country apply.

22. Third Party Programs. Microsoft provides the following copyright notices for third party software
    included in the software. These notices are required by the respective copyright holders and do not change
    your license to use this software.

    Portions of this software are based in part on the work of Spider Systems © Limited. Because Microsoft has
    included the Spider Systems Limited software in this product, Microsoft is required to include the following
    text that accompanied such software:
    Copyright 1987 Spider Systems Limited
    Copyright 1988 Spider Systems Limited
    Copyright 1990 Spider Systems Limited

    Portions of this software are based in part on the work of Seagate Software.

    Portions of this software are based in part on the work of ACE*COMM Corp. Because Microsoft has
    included the ACE*COMM Corp. software in this product, Microsoft is required to include the following text
    that accompanied such software:
    Copyright 1995-1997 ACE*COMM Corp

    Portions of this software are based in part on the work of Sam Leffler and Silicon Graphics, Inc. Because
    Microsoft has included the Sam Leffler and Silicon Graphics software in this product, Microsoft is required
    to include the following text that accompanied such software:
    Copyright © 1988-1997 Sam Leffler

    Permission to use, copy, modify, distribute, and sell this software and
    its documentation for any purpose is hereby granted without fee, provided
    that (i) the above copyright notices and this permission notice appear in
    all copies of the software and related documentation, and (ii) the names of
    Sam Leffler and Silicon Graphics may not be used in any advertising or
    publicity relating to the software without the specific, prior written
    permission of Sam Leffler and Silicon Graphics.

    THE SOFTWARE IS PROVIDED "AS-IS" AND WITHOUT WARRANTY OF ANY KIND,
    EXPRESS, IMPLIED OR OTHERWISE, INCLUDING WITHOUT LIMITATION, ANY
    WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
    IN NO EVENT SHALL SAM LEFFLER OR SILICON GRAPHICS BE LIABLE FOR
    ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES OF ANY KIND,
    OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS,
    WHETHER OR NOT ADVISED OF THE POSSIBILITY OF DAMAGE, AND ON ANY THEORY OF
    LIABILITY, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE
    OF THIS SOFTWARE.

    Portions Copyright © 1998 PictureTel Corporation

    Portions of this software are based in part on the work of Highground Systems. Because Microsoft has
    included the Highground Systems software in this product, Microsoft is required to include the following text
    that accompanied such software:
Copyright © 1996-1999 Highground Systems

Windows 7 incorporates compression code from the Info-ZIP group. There are no extra charges or costs due to the use of this code, and the original compression sources are freely available from http://www.info-zip.org/ or ftp://ftp.info-zip.org/pub/infozip/src/ on the Internet.

Portions Copyright © 2000 SRS Labs, Inc

This product includes software from the 'zlib' general purpose compression library.

Portions of this software are based in part on the work of ScanSoft, Inc. Because Microsoft has included the ScanSoft, Inc. software in this product, Microsoft is required to include the following text that accompanied such software:

TextBridge® OCR © by ScanSoft, Inc.

Portions of this software are based in part on the work of University of Southern California. Because Microsoft has included the University of Southern California software in this product, Microsoft is required to include the following text that accompanied such software:

Copyright © 1996 by the University of Southern California
All rights reserved.

Permission to use, copy, modify, and distribute this software and its documentation in source and binary forms for any purpose and without fee is hereby granted, provided that both the above copyright notice and this permission notice appear in all copies, and that any documentation, advertising materials, and other materials related to such distribution and use acknowledge that the software was developed in part by the University of Southern California, Information Sciences Institute. The name of the University may not be used to endorse or promote products derived from this software without specific prior written permission.

THE UNIVERSITY OF SOUTHERN CALIFORNIA makes no representations about the suitability of this software for any purpose. THIS SOFTWARE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Other copyrights might apply to parts of this software and are so noted when applicable.

Portions of this software are based in part on the work of James Kanze. Because Microsoft has included the James Kanze software in this product, Microsoft is required to include the following text that accompanied such software:

COPYRIGHT AND PERMISSION NOTICE
All rights reserved.

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, publish, distribute, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, provided that the above copyright notice(s) and this permission notice appear in all copies of the Software and that both the above copyright notice(s) and this permission notice appear in supporting documentation. Permission is also given to modify the software to any extend, under the condition that, in the modified software, the prefix "GB_" is changed to something else, and the name directories for includes files ("gb" in this distribution) is also changed.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF THIRD PARTY RIGHTS. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR HOLDERS INCLUDED IN THIS NOTICE BE LIABLE FOR ANY CLAIM, OR ANY SPECIAL INDIRECT OR CONSEQUENTIAL DAMAGES, OR ANY
DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

Except as contained in this notice, the name of a copyright holder shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Software without prior written authorization of the copyright holder.

This product contains software from Cisco ISAKMP Services.

Portions of this software are based in part on the work of RSA Data Security, Inc. Because Microsoft has included the RSA Data Security, Inc. software in this product, Microsoft is required to include the following text that accompanied such software:

Copyright © 1990, RSA Data Security, Inc. All rights reserved.

License to copy and use this software is granted provided that it is identified as the "RSA Data Security, Inc. MD5 Message-Digest Algorithm" in all material mentioning or referencing this software or this function. License is also granted to make and use derivative works provided that such works are identified as "derived from the RSA Data Security, Inc. MD5 Message-Digest Algorithm" in all material mentioning or referencing the derived work.

RSA Data Security, Inc. makes no representations concerning either the merchantability of this software or the suitability of this software for any particular purpose. It is provided "as is" without express or implied warranty of any kind.

These notices must be retained in any copies of any part of this documentation and/or software.

Portions of this software are based in part on the work of OpenVision Technologies, Inc. Because Microsoft has included the OpenVision Technologies, Inc. software in this product, Microsoft is required to include the following text that accompanied such software:

Copyright 1993 by OpenVision Technologies, Inc.

Permission to use, copy, modify, distribute, and sell this software and its documentation for any purpose is hereby granted without fee, provided that the above copyright notice appears in all copies and that both that copyright notice and this permission notice appear in supporting documentation, and that the name of OpenVision not be used in advertising or publicity pertaining to distribution of the software without specific, written prior permission. OpenVision makes no representations about the suitability of this software for any purpose. It is provided "as is" without express or implied warranty.

OPENVISION DISCLAIMS ALL WARRANTIES WITH REGARD TO THIS SOFTWARE, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS, IN NO EVENT SHALL OPENVISION BE LIABLE FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

Portions of this software are based in part on the work of Regents of The University of Michigan. Because Microsoft has included the Regents of The University of Michigan software in this product, Microsoft is required to include the following text that accompanied such software:

This work (and included software, documentation such as READMEs, or other related items) is being provided by the copyright holders under the following license. By obtaining, using and/or copying this work, you (the licensee) agree that you have read, understood, and will comply with the following terms and conditions.

Permission to copy, modify, and distribute this software and its documentation, with or without modification, for any purpose and without fee or royalty is hereby granted, provided that you include the following on ALL copies of the software and documentation or portions thereof, including modifications:

1. The full text of this NOTICE in a location viewable to users of the redistributed or derivative work.
2. Any pre-existing intellectual property disclaimers, notices, or terms and conditions. If none exist, the W3C Software Short Notice should be included (hypertext is preferred, text is permitted) within the body of any redistributed or derivative code.
3. Notice of any changes or modifications to the files, including the date changes were made. (We recommend you provide URLs to the location from which the code is derived.)

THIS SOFTWARE AND DOCUMENTATION IS PROVIDED "AS IS," AND COPYRIGHT HOLDERS MAKE NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE OR DOCUMENTATION WILL NOT INFRINGE ANY THIRD PARTY PATENTS, COPYRIGHTS, TRADEMARKS OR OTHER RIGHTS.

COPYRIGHT HOLDERS WILL NOT BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF ANY USE OF THE SOFTWARE OR DOCUMENTATION.

The name and trademarks of copyright holders may NOT be used in advertising or publicity pertaining to the software without specific, written prior permission. Title to copyright in this software and any
associated documentation will at all times remain with copyright holders.

Portions of this software are based in part on the work of Sun Microsystems, Inc. Because Microsoft has included the Sun Microsystems, Inc. software in this product, Microsoft is required to include the following text that accompanied such software:

Sun RPC is a product of Sun Microsystems, Inc. and is provided for unrestricted use provided that this legend is included on all tape media and as a part of the software program in whole or part. Users may copy or modify Sun RPC without charge, but are not authorized to license or distribute it to anyone else except as part of a product or program developed by the user.

SUN RPC IS PROVIDED AS IS WITH NO WARRANTIES OF ANY KIND INCLUDING THE WARRANTIES OF DESIGN, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, OR ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICE.

Sun RPC is provided with no support and without any obligation on the part of Sun Microsystems, Inc. to assist in its use, correction, modification or enhancement.

SUN MICROSYSTEMS, INC. SHALL HAVE NO LIABILITY WITH RESPECT TO THE INFRINGEMENT OF COPYRIGHTS, TRADE SECRETS OR ANY PATENTS BY SUN RPC OR ANY PART THEREOF.

In no event will Sun Microsystems, Inc. be liable for any lost revenue or profits or other special, indirect and consequential damages, even if Sun has been advised of the possibility of such damages.

Portions of this work are derived from "The Draft Standard C++ Library" Copyright © 1995 by P.J. Plauger published by Prentice-Hall and are used with permission.

Portions of this software are based in part on the work of Hewlett-Packard Company. Because Microsoft has included the Hewlett-Packard Company software in this product, Microsoft is required to include the following text that accompanied such software:

About Notice:
This software is based on software available from http://mpvtools.sourceforge.net.
This software processes a format called MPV. MPV is an open specification for managing collections
and multimedia playlists of photo, video, and music content and associated metadata and is available
at no cost from the Optical Storage Technology Association. More information about the MPV
specification can be found at http://www.osta.org/mpv.

Permission Notice:
Permission is hereby granted, free of charge, to any person obtaining a copy of this software and
associated documentation files (the "Software"), to deal in the Software without restriction, including
without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell
copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the
following conditions:
The above copyright notice, this permission notice, and the above About Notice shall be included in all
copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR
IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS
FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE AUTHORS
OR COPYRIGHT HOLDERS BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY,
WHETHER IN AN ACTION OF CONTRACT, TORT OR
OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE
OR OTHER DEALINGS IN THE SOFTWARE.

Except as contained in this notice, the name of a copyright holder shall not be used in advertising or
otherwise to promote the sale, use or other dealings in this Software without prior written authorization
of the copyright holder.
