

# TICKET TRAIL

An exciting, new "HYBRID" that combines a ticket redemption claw machine with a traditional style video board game in an attractive color-changing LED lit cabinet featuring Elaut's RFID technology.

Players strategically position the claw over the desired ticket rolls to try to catch them. The player will be rewarded with the number of ticket roll values dropped into the prize hole and with one or more steps on the video board game.

Navigate the tricky path littered with big ticket values and danger zones to reach the finish line to collect the Bonus Ticket Value, up to 1,000 tickets!

Video board game.

## Ticket Trail RFID 36"

900 x 950 x 2050 mm / 155 kg  
35.5 x 37.5 x 81 in / 342 lbs
